solutions were adopted unanimously and will be landmarks in the fight against tobacco. This great success is due to three facts which emerged from the discussions: 1.

It appears clearly now that the risks associated with tobacco are much greater than previously assumed.

File Type PDF

Out of two regular smokers, one will die from a tobacco related disease. 2. Reducing tobacco consumption can be achieved but the data collected in several countries show that it requires a global strategy. This strategy was much debated during the conference. The resolutions adopted

Action to fight the grow-

of the need to act for
tobacco control. The

sectors of transportation, railways are in a period of restructuring their management and technology. New methods of organization are introduced, commercial and tariff policies change radically, a more entrepreneurial spirit is required. At the

File Type PDF

same time, new high-speed tracks are being constructed and old tracks are renewed, high-comfort rolling stock vehicles are being introduced, logistics and combined transport are being developed. Awareness of environmental issues and search for greater safety give to the railways a new role

within the transportation system. Meanwhile, methods of analysis have significantly evolved, principally due to computer applications and new ways of thinking and approaching old problems. Therefore it becomes necessary to come up with a new scientific approach to

tackle management and engineering aspects of railways, to understand in-depth the origins and inter-relationships of the various situations and phenomena and to suggest the appropriate methods and solutions to solve the various emerging problems. This book aims to cover the need

File Type PDF
Enpc 4th Edition

for a new scientific approach for railways. It is written for railway managers, economists and engineers, consulting economists and engineers, students of schools of engineering, transportation and management. The book is divided into three distinct parts: Part A deals with the

the specific railway component. In this way, both the requirement for a theoretical analysis is met, and the need of the railway manager and engineer for tables, nomographs, regulations, etc. is satisfied. Railways in Europe have separated activities of infrastructure from

File Type PDF

those of operation. In other parts of the world, however, railways remain unified. The book addresses both situation. Railways present great differences in their technologies. Something may be valid for one such technology, but not for another. To overcome

File Type PDF
Enpc 4th Edition

this problem, regulations of the International Union of Railways (UIC) as well as European Standardization (CEN) have been used to the greatest extent possible. Whenever a specific technology or method is presented, the limits of its application are clearly emphasized.

As an interdisciplinary area of research, translation studies attracts students and scholars with a wide range of backgrounds, who then need to face the challenge of accounting for a complex object of enquiry that does not adapt itself well to traditional methods in other fields of

File Type PDF

investigation. This book addresses the needs of such scholars – whether they are students doing research at postgraduate level or more experienced researchers who want to familiarize themselves with methods outside their current field of expertise. The book

investigation by

Understanding core

principles of reliability, validity and ethics is essential for any researcher no matter what methodology they adopt, and a whole chapter is therefore devoted to these issues.

Research Methodologies in Translation Studies is divided into four different chapters,

File Type PDF

Enpc 4th Edition

according to whether the research focuses on the translation product, the process of translation, the participants involved or the context in which translation takes place. An introductory chapter discusses issues of reliability, credibility, validity and ethics. The impact of our research

File Type PDF

Enpc 4th Edition

depends not only on its quality but also on successful

dissemination, and the final chapter therefore deals with what is also generally the final stage of the research process: producing a research report.

In this edited book various novel approaches to problems of modern

stakeholders involved and by the necessary multidisciplinary knowledge. This book presents the results of this project, providing new insights into both technical and management issues. The main objectives of its technical chapters are pollution source control modelling, risk and impact

assessment, and evaluation and comparison of best management practices. It also covers management aspects, such as the analysis of the decision-making processes in stormwater source control, at a European scale, and stormwater management strategies in general. The

combination of scientific-technical and socio-managerial knowledge, with the strong cooperation of numerous end-users, reflects the innovative character of this book which includes actual applications of the ADSS prototype in significant case studies.

Children represent a special challenge for emergency care providers, because they have unique medical needs in comparison to adults. For decades, policy makers and providers have

and combining forms used to build medical terms.

Updated with the latest medical terms and illustrations, these flash cards include word-building examples and Spanish translations. And you can now study

flash cards and take quizzes on your smartphone! Full-color illustrations help you remember terms and their word parts. Word-building examples show how word parts are used to create medical terms - including the most commonly

diagnosed diseases and disorders, as well as treatments and procedures.

Indexing by body system makes it easy to organize and study terms. Spanish translations of word parts and terminology are included.

File Type PDF

Enpc 4th Edition

corpus architecture is developed for empirical studies of translations, and beyond those for the study of texts which are inter-lingually comparable, particularly texts of similar registers. The compiled corpus, CroCo, is a resource

for research and is,
with some copyright

accessible to other
research projects.

Most of the research
was undertaken as
part of a DFG-
Project into
linguistic properties
of translations.

Fundamentally, this

File Type PDF

Enpc 4th Edition

research project was a corpus-based investigation into the language pair English-German. The long-term goal is a contribution to the study of translation as a contact variety, and beyond this to language

comparison and
language contact
more generally with
the language pair

languages. This goal
implies a thorough
interest in possible
specific properties of
translations, and
beyond this in an

empirical translation theory. The methodology developed is not restricted to the traditional exclusively system-based comparison of earlier days, where real-text excerpts or constructed examples are used as

File Type PDF

Enpc 4th Edition

mere illustrations of assumptions and claims, but instead implements an empirical research strategy involving structured data (the sub-corpora and their relationships to each other, annotated and aligned on various

representation), the
formation of
hypotheses and their
operationalizations,
statistics on the data,

system-based comparisons and other independent sources of explanation for the phenomena observed. Further applications of the resource developed in computational linguistics are outlined and

evaluated.

A provocative perspective on the fragile fundamentals, and forces for resilience, in the Chinese economy, and a forecast for the future on alternate scenarios of collapse and ascendance.

A new look at weak-convergence methods in metric spaces-from a master of probability theory In this new edition, Patrick Billingsley updates his classic work Convergence of Probability Measures to reflect developments of the past thirty years.

File Type PDF
