Fourth Edition is a must read for fire fighters, prospective fire fighters, and fire science students. This edition continues the Brannigan tradition of using plain language to describe technical information about different building types and their unique hazards. This text ensures that critical fire fighting information is easy-to-understand and gives valuable experience to fire fighters before stepping onto the fireground. The first edition of Building Construction for the Fire Service was published in 1971. Frank Brannigan was compelled to write the most comprehensive building construction text for the fire service so that he could save fire fighters ' lives. His passion for detail and extensive practical experience helped him to develop the most popular text on the market. His motto of: " Know your buildings, "

**Most fire departments give a written examination as the first part of the testing process. Since there are usually an enormous number of candidates who apply for the position, difficult written examinations are an effective way to narrow the field. There is no excuse for a firefighter candidate to fail a written exam. Those who are committed to their goal will plan and prepare for the written exam to improve their chances of success. While there are other self-help books devoted to helping aspiring firefighters, they only provide questions and answers. These books are useless if you do not understand how to work out the problems. Each section begins with an overview of how to solve the problem. The reasoning behind the correct answer is presented in clear, easy-to-understand language. The reader will become proficient in: mathematics (word problems, geometry, addition, subtraction, multiplication); mechanical aptitude (gears, levers, pulleys, incline planes, screws); language (reading, spelling, grammar, vocabulary); perceptual ability; spatial relations; matching parts and figures; map reading. Illustrations are used throughout the book to teach basic principles and present problems to solve.**
