Issues in the Conservation of Photographs is the first publication to chronicle the emergence and systematic development of photograph conservation as a profession. In seventy-two essential texts from the nineteenth century to the present day, this anthology collects key writings that have influenced both the philosophical and the practical aspects of conserving photographic materials. The materials were

carefully selected by the editors along with an advisory board of international experts and include some--particularly the lectures, memos, and letters--that have never been published. Many of the topics--safe environmental parameters, silver image permanence, and proper treatment methods--have been debated since the introduction of photography. By promoting an understanding of these issues, this volume seeks to advance the education of rising conservation professionals, inspire new scholarship,

Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block

the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of
