Essentials of Psychiatric Nursing

Essentials of Psychiatric Mental Health Nursing

Essentials of Psychiatric Mental Health Nursing Access Code

This seventh edition includes new chapters and maintains popular features from previous editions such as self awareness prompts while adding research boxes and student worksheets at the end of each chapter.

Essentials of Psychiatric and Mental Health Nursing

This ground-breaking textbook gathers contributions from service users, expert practitioners and leading academics to help students develop the core knowledge and skills they need to qualify as mental health nurses. Focusing in particular on helping students apply person-centred, compassionate and recovery-focused care, service-user voices and practical case studies are integrated throughout the book. Students are also given a rounded understanding of the key debates they will face in practice through the exploration of both bio-medical and psycho-social approaches. Key features include: Voices and case studies from real practising nurses and students help students apply knowledge to practice. Critical thinking activities, debates, and ' What ' s the Evidence ' summaries help students develop higher level critical thinking and evidence based practice skills. Further reading and free SAGE journal articles facilitate independent learning. Online MCQs and Flashcards make revision simple and fun. The free interactive ebook gives students the freedom to learn anywhere! Online Lecturer resources: free MCQs, video debates, SAGE journal articles and more, which can be used for flipped classroom activities or lectures to make teaching more interactive.

Essentials of Psychiatric Assessment

Concepts of Care

Package of Essentials of Psychiatric Mental Health Nursing, 4th Edition, 2nd Edition

-- Uses the stress-adaptation model as its conceptual framework -- The latest classification of psychiatric disorders in DSM IV -- Access to 50 psychotropic drugs with client teaching guidelines on our website -- Each chapter based on DSM IV diagnoses includes tables with abstracts describing recent research studies pertaining to specific psychiatric diagnoses -- Within the DSM IV section, each chapter features a table with guidelines for client/family education appropriate to the specific diagnosis -- Four new chapters: Cognitive Therapy, Complementary Therapies, Psychiatric Home Health Care, and Forensic Nursing -- Includes critical pathways for working in case management situations -- Chapters include objectives, glossary, case studies using critical thinking, NCLEX-style chapter review questions, summaries, and care plans with documentation standards in the form of critical pathways -- The only source to thoroughly cover assertiveness training, self-esteem, and anger/aggression management -- Key elements include historic and epidemiologic factors; background assessment data, with predisposing factors/symptomatology for each disorder; common nursing diagnoses with standardized guidelines for intervention in care; and outcome criteria, guidelines for reassessment, evaluation of care, and specific medication/treatment modalities -- Special topics include the aging individual, the individual with HIV/AIDS, victims of violence, and ethical and legal issues in psychiatric/mental health nursing -- Includes information on the Mental Status exam, Beck depression scale, and Holmes & Rahe scale defense mechanisms criteria

This newly published second edition is the definitive book covering the essentials of psychiatric-mental health (PMH) nursing applicable at all practice levels and settings. It articulates what is expected of all psychiatric-mental health nurses, specifying the who, what, where, when, why and how of their practice.

It presents the underlying assumptions and characteristics, addresses matters of environments and settings as well as education and training requirements, and covers key issues and trends and the ethical and conceptual bases of the specialty. Moreover, it specifies the competencies for nursing practice and professional performance of all PMH registered nurses. While this foundational volume is primarily for those directly involved with psychiatric-mental health nursing practice, education and research, other nursing and allied health care providers, researchers and scholars will find value in this content.

Concepts of Care in Evidence-based Practice

Psychiatric Mental Health Nursing: An Interpersonal Approach

Psychiatric and Mental Health Essentials in Primary Care

A Communication Approach to Evidence-Based Care, 4e

This two volume set deals with the broadening scope of, " Psychiatric Nursing Practice" and the importance of combination of "Mental Health Nursing" and "Psychiatric Nursing" as a major and broader discipline. Designed to present the contents of varied dimensions comprehensively promoting a sensitive and holistic outlook on Nursing Practice. The main focus of volume 1 is on General Psychiatry, which is essential for psychiatric clinical practice. It consists of ten chapters, which cover basic and introductory concepts of Psychiatry and Mental Health, which help the professionals understand the subject in an easy manner. The second volume focuses on psychiatric disorders in wide ranging manner, like the Definitions, Incidence, Prevalence, Risk Factors, Aetiological Factors, Clinical Manifestations, Diagnostic Features, Management (Medical, Nursing), etc. in respective chapters.

Here ' s the most complete and easy-to-use resource on how to develop practical, individualized plans of care for psychiatric and mental health patients. It ' s the perfect quick reference now for clinical rotations.and later for practicing nurses. This Pocket Guide is really two books in one! The first half provides the diagnostic information needed to create a care plan; the second half covers the safe prescription and administration of psychotropic medications. And, the concepts can be applied in a variety of healthcare settings from in-patient hospitalization through the outpatient clinic.to home health and private practice.

This focused approach to psychiatric mental health provides you with an uncomplicated way to understand the often-intimidating subject of psychiatric nursing. Inside you'll find two themes of psychiatric mental health nursing: the How of Communication and the Why of Evidence. You will also find easy-to-understand explanations of the research that applies to psychiatric nursing issues and how to incorporate this evidence into everyday care.

Responding to the Challenge of DSM-5

Grounded in author Allen Frances's extensive clinical experience, this comprehensive yet concise guide helps the busy clinician find the right psychiatric diagnosis and avoid the many pitfalls that lead to errors. Covering every disorder routinely encountered in clinical practice, Frances provides the appropriate ICD-9-CM code for each one (the same code utilized in the DSM), a useful screening question, a colorful descriptive prototype, lucid diagnostic tips, and a discussion of other disorders that must be ruled out. The book closes with an index of the most common presenting symptoms, listing possible diagnoses that must be considered for each. Frances was instrumental in the development of past editions of the DSM and provides helpful cautions on questionable aspects of DSM-5.

"Psychiatric Mental Health Nursing emphasizes interpersonal relations as the foundation for nursing practice and the cornerstone for relationship-based care. Starting out with an important historical overview of the profession, the student is introduced to the rich history of psychiatric mental health nursing. This text then guides the nursing student through the essential phases of self-discovery while integrating interpersonal nursing theory concepts into practice with various populations"--

Master Need-to-Know Psychiatric Nursing Information with Ease Gain the basic knowledge and patient interaction skills you need to confidently prepare for psychiatric nursing practice with this concise, engaging text. Essentials of Psychiatric Nursing is easy to understand and rich with clinical examples and explanations that clarify challenging concepts and help you build the unique therapeutic communication capabilities necessary to excel in the care of patients with common mental health disorders. New! Unfolding Patient Stories, written by the National League for Nursing, immerse you in commonly encountered clinical scenarios and equip you for successful patient interactions. Concept Mastery Alerts drawn from the Lippincott®PrepU adaptive learning system clarify the most challenging mental health nursing concepts. NCLEX Notes keep you focused on important application areas for success on the NCLEX®. Case Studies interwoven in the mental health disorder chapters help you apply theory to nursing care for specific disorders, supported by online videos that reveal symptoms and procedures in greater detail. Emergency Care Alerts help you recognize situations that may require immediate or specialized care. Nursing Management of Selected Disorders sections familiarize you with the most common major psychiatric disorders. Research for Best Practice boxes reinforce the latest evidence and implications from relevant studies to guide and validate interventions. Therapeutic Dialogue features compare and contrast therapeutic and nontherapeutic conversations to help you hone your patient communication skills. Psychoeducation Checklists help you develop effective patient and family teaching plans. Clinical Vignette features and accompanying questions challenge you to identify solutions to commonly encountered patient scenarios. Drug Profile boxes reinforce your understanding of commonly prescribed medications for patients with mental health problems. Key Diagnostic Characteristics summaries provide fast access to diagnostic criteria, target symptoms, and associated findings for select disorders as described in the DSM-5 by the American Psychiatric Association. Available on the book's companion website, Nursing Care Plans based on case scenarios guide you through the diagnostic stages and plan of care for patients with a particular diagnosis.

A Communication Approach to Evidence-Based Care

Rev. ed. of: Foundations of psychiatric mental health nursing / [edited by] Elizabeth M. Varcarolis, Margaret Jordan Halter. 6th ed. c2010.

Psychiatric-Mental Health Nursing (PMH-BC™) Certification Review is designed to help you prepare for the American Nurses Credentialing Center (ANCC) board certification exam. This comprehensive study aid begins with an overview of the exam, scope and standards of practice, and fundamental theories. It examines topics such as therapeutic treatment and management, patient education, cultural competence, communication, health promotion, and crisis management. A wide range of psychiatric disorders, as organized in the DSM-5, are systematically reviewed in a templated approach that takes the reader through the nursing process step by step. Each chapter covers everything you need to know to pass the exam and includes end-of-chapter questions to check your knowledge. The review concludes with a full-length practice test to get you ready for exam day. With over 300 practice questions and detailed review content and answer rationales, this study aid empowers you with the tools and materials to study your way and the confidence to pass the first time, guaranteed! Know that you're ready. Know that you'll pass with Springer Publishing Exam Prep. Key Features Reflects the latest ANCC exam blueprint Provides a comprehensive yet concise review of essential knowledge for the exam Includes test-taking strategies and tips, scope of practice, and fundamental theories Covers the most commonly encountered psychiatric disorders, as organized in the DSM-5 Includes end-of-chapter Q&A and a full practice test with detailed rationales Boosts your confidence with a 100% pass guarantee PMH-BC™ is a registered service mark of American Nurses Credentialing Center (ANCC). ANCC does not sponsor or endorse this resource, nor does it have a proprietary relationship with Springer Publishing.

This trusted practitioner resource and text helps the busy clinician find the right psychiatric diagnosis and avoid the many pitfalls that lead to errors. Covering every disorder routinely encountered in clinical practice, Allen Frances provides the ICD-9-CM codes and (where feasible) ICD-10-CM codes required for billing, a useful screening question, a descriptive prototype, diagnostic tips, and other disorders that must be ruled out. Frances was instrumental in the development of past editions of DSM and provides helpful cautions on questionable aspects of DSM-5. An index of common presenting symptoms lists possible diagnoses that must be considered for each. The Appendix (which can also be accessed at the companion website) features a Crosswalk to ICD-10-CM codes.

Essentials of Psychiatry and Mental Health Nursing, First Edition

A psychiatric assessment is a structured clinical conversation, complemented by observation and mental state examination, and supplemented by a physical examination and the interview of family members when appropriate. After the initial interview, the clinician should be able to establish whether the individual has a mental health problem or not, the nature of the problem, and a plan for the most suitable treatment. Essentials of Psychiatric Assessment provides the resident or beginning psychiatrist with a complete road map to a thorough clinical evaluation.

-- Geared toward nursing programs that devote less than six weeks to psychiatric/mental health nursing -- Uses the stress-adaptation model as its conceptual framework -- Each disorder includes: historic and epidemiologic factors, background assessment data, predisposing factors/symptomatology, common nursing diagnoses with standardized guidelines for intervention in care, outcome criteria, reassessment, evaluation, and medications/treatment modalities -- Assessment based on criteria from DSM IV -- Chapters include objectives, glossary, case studies with critical thinking exercises, NCLEX-style chapter review questions, care plans and critical pathways, and approved NANDA diagnoses -- Special topics include crisis intervention, psychobiology, psychopharmacology, sociocultural concepts, therapeutic groups, family as a group, and the suicidal client -- Contains selected case studies or Build Your Critical Thinking Skills boxes with three questions per case -- Includes standardized care plans with scientific rationales for every nursing intervention -- Appendix includes critical pathways and a list of common psychiatric behaviors and associated NANDA nursing diagnoses

Psychiatric and Mental Health Essentials in Primary Care addresses key mental health concepts and strategies for time-pressured practitioners in various healthcare settings serving diverse populations. It offers theoretically sound and succinct guidelines for compassionate, efficient, and effective service to people in emotional and physical pain and distress, capturing the essentials of mental health care delivered by primary care providers. The text provides a theoretical overview, discussing mental health assessment, crisis care basics, alternative therapies, and vulnerable groups such as children, adolescents and older people. It includes chapters that focus on the following topics in Primary Care Practice: Suicide and Violence Anxiety Mood disorders Schizophrenia Substance Abuse Chronic illness and mental health. This invaluable text is designed for primary care providers in either graduate student or practice roles across a range of primary care practice, including nurse practitioners and physician assistants.

Essentials of Psychiatric Diagnosis

Psychiatric Mental Health

Gain the essential knowledge and skills you need to succeed as a psychiatric nurse! Varcarolis' Essentials of Psychiatric-Mental Health Nursing: A Communication Approach to Evidence Based Care, 5th Edition provides a concise, easy-to-understand guide to today's leading psychiatric theories and therapeutic modalities.

Emphasizing evidence-based care, the book balances coverage of scientifically based treatment approaches with insights into effective communication skills, so you will be prepared to offer the best possible care when you enter practice. Written by nursing expert Chyllia D. Fosbre, this edition adds new Next

Generation NCLEX® (NGN) examination-style case studies to help you develop critical thinking skills and prepare for the NGN exam. Applying Critical Judgment questions introduce clinical situations in psychiatric nursing and encourage critical thinking. Neurobiology of the Brain feature includes illustrations

depicting how a disorder affects brain function and how drugs help to mitigate the symptoms. Applying Evidence-Based Practice boxes in the clinical chapters pose a question, walk you through the process of gathering evidence-based data from a variety of sources, and present a plan of care based on the evidence.

Vignettes describe real-world psychiatric patients and their disorders. Assessment Guidelines boxes summarize the steps of patient assessment for various disorders. Applying the Art boxes offer clinical scenarios demonstrating the interaction between a nurse and a patient, the nurse's perception of the interaction,

and the mental health nursing concepts in play. Potential Nursing Diagnoses tables list possible nursing diagnoses for a particular disorder, based on ICNP terminology, along with the associated signs and symptoms. Nursing Interventions tables list interventions for a given disorder or clinical situation, along with

rationales for each intervention. DSM-5 Criteria boxes identify the diagnostic criteria for most major disorders. Integrative Care boxes highlight the different types of therapy may be used to enhance treatment. Giddens Concept boxes at the beginning of each chapter tie concepts to the topics to be discussed. NEW!

Next Generation NCLEX® (NGN) examination-style case studies are included in the clinical disorders chapters to promote critical thinking and help to prepare you for the NGN exam.

This full-color book uses a concise format to provide a source of fundamental psychiatric/mental health nursing information for students working in psychiatric/mental health facilities. Nursing process is the framework within which delivery of nursing care is described for individuals diagnosed with disorders from the DSM-IV-TR 2000. A CD including learning activities, case studies with critical thinking questions, assessment tools, nearly 60 psychotropic med drug monographs, chapter review questions, care plans and critical pathways and client education teaching guides is included. The book also contains 21 sample Client Teaching Guides containing information related to psychotropic meds and psychiatric illnesses that can be reproduced for clients.
