

## Essentials Of Sociology 10th Edition Ch 4

With a combination of up-to-the minute examples, cutting-edge research, and the latest available data, Essentials of Sociology gets students thinking sociologically about what they're seeing in the news and on their screens. Highlighting the macro social forces at work in our everyday lives, the authors move students beyond their individual experiences and cultivate their sociological imaginations. Innovative pedagogy promotes active reading and helps students master core sociological concepts. This strong in-text pedagogical program is now supported by InQuizitive, Norton's new formative, adaptive learning tool.

This brief and economical reader, edited by Jim Henslin, is specifically designed to be used as a companion to his Sociology: A Down-to-Earth Approach texts.

The book that made "McDonaldization" part of the lexicon of contemporary sociological theory, read by hundreds of thousands of students, is now in its Tenth Edition! George Ritzer's seminal work of critical sociology, *The McDonaldization of Society*, continues to stand as one of the pillars of modern sociological thought. Building on the argument that the fast food restaurant has become the model for the rationalization process today, this book links theory to contemporary life in a globalized world. Ritzer opens our eyes to many current issues and shows how McDonaldization's principles—efficiency, calculability, predictability, and control—have been applied to other sectors of American society and throughout the world. This new edition continues to shift its focus to how we experience McDonaldization online, the new locus of production and consumption in the digital age.

'Simultaneous invention' has become commonplace in the natural sciences, but is still virtually unknown within the sphere of social science. The convergence of two highly compatible versions of Critical Realism from two independent sources is a striking exception. Pierpaolo Donati's *Relational Sociology* develops 'upwards' from sociology into a Realist meta-theory, unlike Roy Baskhar's philosophy of science that works 'downwards' and 'underlabours' for the social sciences. This book systematically introduces Donati's *Relational Sociology* to an English readership for the first time since he began to advance his approach thirty years ago. In this eagerly awaited book, Pierpaolo Donati shifts the focus of sociological theory onto the relational order at all levels. He argues that society is constituted by the relations people create with one another, their emergent properties and powers, and internal and external causal effects. *Relational Sociology* provides a distinctive variant upon the Realist theoretical conspectus, especially because of its ability to account for social integration. It will stimulate debate amongst realists themselves and, of course, with the adversaries of realism. It is a valuable new resource for students of social theory and practising social theorists.

East Asia is normally identified as a group of countries lying along the western edge of the Pacific Ocean, but in recent years scholars have begun thinking about a new East Asia that is a community rather than a set of sovereign states. This regional community is a theoretical notion variously defined on the basis of economic or political relations, philosophical orientations, language or other criteria, with each standard producing a different set of boundaries. This book looks at the new East Asia from a Northeast Asian perspective, considering it both as a theoretical construct and a practical reality. The authors are Asian Studies specialists, mainly from Japan but with contributions from Korea and the United States, and they consider the trade and economic interaction, diplomacy, and security arrangements of East Asia. Prepared as part of a five-year research program conducted by Waseda University's 21st Century Center of Excellence for the Creation of Contemporary Asian Studies, the essays are published here in English for the first time.
