The problem of corruption, however described, dates back thousands of years. Professionals working in areas such as development studies, economics and political studies, were the first to most actively analyse and publish on the topic of corruption and its negative impacts on economies, societies and politics. There was, at that time, minimal literature available on corruption and the law. The literature and discussion on bribery and corruption, as well as on the negative impact of each and what is required to address them, particularly in the legal context, are now considerable. Corruption and anti-corruption are multifaceted and multi-disciplinary. The focus now on the law and compliance, and perhaps commercial incentives, is relatively easy. However, corruption, anti-corruption and the motivations for them are complex. If we continue to discuss, debate, engage, address corruption and anti-corruption in our own disciplinary silos, we are unlikely to significantly progress the fight against corruption. What do terms such as 'culture of integrity', 'demand accountability', 'transparency and accountability' and 'ethical corporate culture' dominating the anti-corruption discourse mean, if anything, in other disciplines? If they are meaningless, what approach would practitioners in those other disciplines suggest be adopted to address corruption. What has their experience been in the field? How can the work of each discipline contribute to the work of whole and, as such, improve our work in and understanding of anti-corruption? This book seeks to answer these questions and to understand the phenomenon more comprehensively. It will be of value to researchers, academics, lawyers, legislators and students in the fields of law, anthropology, sociology, international affairs, and business.

An Introduction to Sociology

Current and relevant to today's students, SOCIOLOGY IN OUR TIMES: THE ESSENTIALS, 10th Edition presents the latest available data and new insights on behaviors, issues, and trends in our nation and world from a sociological perspective. The new edition of this bestselling text emphasizes the theme of social change and the ways in which media-particularly social media-and other forms of technology inevitably bring about new ways of living, interacting with others, or doing certain activities or task. New sections on social change have been added throughout the book, and the theme also appears in the "Sociology Works!" and "Media" features. "Sociology and Social Policy" boxes return to this edition, examining issues such as gun control, prevention of military suicides, and whether employers should be allowed to "spy" on their employees. First-person accounts of individuals' lived experiences draw students into the chapter content by illuminating topics that reflect the text's primary themes of diversity, the application of sociology to everyday life, global comparisons, media, and social change. New timely topics include environmental activism, immigration, bullying and social media, and same-sex marriage. Increasing American fear about terrorism, environmental catastrophes, pandemics, and economic crises has fueled interest in "prepping": confronting disaster by mastering survivalist skills. This trend of self-reliance is not merely evidence of the American belief in the power of the individual; rather, this pragmatic shift away from expecting government aid during a disaster reflects a weakened belief in the bond between government and its citizens during a time of crisis. This ethnographic study explores the rise of the urban preppers' subculture in New York City, shedding light on the distinctive approach of city dwellers in preparing for disaster. With attention to the role of factors such as class, race, gender and one's expectations of government, it shows that how one imagines Doomsday affects how one prepares for it. Drawing on participant observation, the author explores preppers' views on the central question of whether to "bug out" or "hunker down" in the event of disaster, and examines the ways in which the prepper economy increases revenue by targeting concerns over developing skills, building networks, securing equipment and arranging a safe locale. A rich qualitative study, Bracing for the Apocalypse will appeal to scholars of sociology and anthropology with interests in urban studies, ethnography and subcultures.

The Eighth edition of David Newman's Sociology: Exploring the Architecture of Everyday Life once again invites students into the world of sociological thought. The first sociology of religion textbook to begin the task of diversifying and decolonizing the study of religion, Sociology of Religion develops a sociological frame that draws together the personal, political and public, showing how religion – its origins, development and changes – is understood as a social institution, influenced by and influencing wider social structures. Organized along sociological structures and themes, the book works with examples from a variety of religious traditions and regions rather than focusing in depth on a selection, and foregrounds cultural practice-based understandings of religion. It is therefore a book about 'religion', not 'religions', that explores the relationship of religion with gender and sexuality, crime and violence, generations, politics and media, 'race', ethnicity and social class, disease and disability – highlighting the position of religion in social justice and equality. Each chapter of this book is framed around concrete case studies from a variety of Western and non-Western religious traditions. Students will benefit from thinking about the discipline across a range of geographical and religious contexts. The book includes features designed to engage and inspire students: Up-to-date and comprehensive analysis of engaging and accessible material 'Case Examples': short summaries of empirical examples relating to the chapter themes Visually distinct boxes with bullet points, key words and phrases focusing on the context Questions suitable for private or seminar study Suggested class exercises for instructors to use Suggested readings and further readings/online resources at the end of each chapter Following a review and critique of early sociology of religion, the book engages with more contemporary issues, such as dissolving the secular/sacred binary and paying close attention to issues of epistemology, negotiations, marginalities, feminisms, identities, power, nuances, globalization, (post) (multiple) modernity (ies), emotion, structuration, reflexivity, intersectionality and urbanization. This book is essential reading for undergraduate and postgraduate students exploring the sociology of religion, religion and society, religious studies, theology, globalization and human geography.
