How is it that corporations are able to behave irresponsibly, criminally, and undemocratically? *Wealth by Stealth* is a scathing introduction to the operations of the modern corporation, written by a corporate lawyer. Many writers point to the growth of undemocratic corporate power. Glasbeek takes these observations further and outlines clearly how corporations become so powerful. He also shows how they are able to act without regard to the behaviour and laws governing citizens and other groups. Glasbeek is known by generations of students for his brilliant, funny lectures at Osgoode Hall Law School. With *Wealth by Stealth* his informative critique of corporate behaviour becomes available and accessible to all. How is it "The corporation makes them do it"?

Jess used to be a man. Then he found himself in a female body. It wasn't funny. Why would anyone even think it was? \* There's a scene in Tootsie (1982) that is surely one of the most unacclaimed scenes of all time: Dustin Hoffman's character, Michael, as 'Dorothy', makes a suggestion on the set, and the director dismisses it out of hand. As I remember it, Hoffman's face-conveying surprise, confusion, indignation-shows perfectly Michael's reaction to the absence of (and, just maybe, awareness of) male privilege/advantage. The entire movie should've been about that. Just that. It wasn't. And so I wrote Jess. \* "[Jess'] perspective on being a girl and woman while having memories of being a man offers an understanding I'd never thought of. Really interesting book." poolays,

concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the Handbook of Reflection and Reflective Inquiry presents reflective thought in its most vital aspects, not as a fanciful or nostalgic exercise, but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight, teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention (Thoreau's "wide-awakeness"), an act of consciousness, and a process by which people can understand themselves, their work (particularly in the form of life projects), and others. What if one day, all of the women suddenly disappeared, leaving the men to take their places, fill their roles, do what they did. What would happen? How would the men react? Here and now, women's subordination is so systemic it's unremarkable (to all but serious feminists). Action research is a term used to describe a family of related approaches that integrate theory and action with a goal of addressing important organizational, community, and social issues together with those who experience them. It focuses on the creation of areas for collaborative learning and the design, enactment and evaluation of liberating actions through combining action and research, reflection and action in an ongoing cycle of cogenerative knowledge. While the roots of these methodologies go back to the 1940s, there has been a dramatic increase in research output and

The book deals with the complicated relationships between national security and human rights, and between public health and human rights. Its premise is the fact that national security and public health are both included in human rights instruments as 'exceptions' to the human rights therein sanctioned, yet they can arguably be considered as human rights themselves and be equally valuable. The book therefore asks to what extent the protection of the individual could – or should – be overridden to enable the protection of the national security or public health of the general public. Both

practice and case law have shown that human rights risk being set aside when they clash with the protection of national security or public health. Through theoretical analysis and practical examples, the book addresses the conflicts that arise when the concepts of national security and public health are used – and abused – and other rights, including freedom of speech, procedural freedoms, individual health, are violated as a consequence. It provides many interesting findings on the values that states are ready to protect – and forego – to ensure their safety, which can contribute to the ongoing debate on the protection of human rights. This book was originally published as a special issue of The International Journal of Human Rights.

Human beings come equipped with a tendency to generally not want to leave thinking to others. With the endeavor to professionally, reflectively, and gracefully support each individual on the basis of this tendency, the paradigm of a curious, self-determined, and inquiring human is developed in this volume, which might point the way towards a promising future. In view of such a perspective, the authors regard the pedagogical construct of self-determined Inquiry Learning as just such a promising concept. The Theory of Inquiry Learning Arrangements (TILA) concretizes this approach according to the principles of critical multiplism. The effectivity of TILA is scrutinized via the personalized concepts AuRELIA (Authentic
