relations theorists and strategic studies analysts paid little attention to ethnic and other forms of communal conflict. Disregard for the importance of ethnic and nationality issues in world affairs, always misguided so far as the developing world was concerned, has been overtaken, in stunning fashion, by recent events from Abkhazia to Zaire. The essays in this volume advance our understanding of the causes of ethnic and communal conflict, the regional and international implications of such conflicts, and what the international community can do to minimize the potential for instability and

"The study of ethnic conflict saw its heyday in the aftermath of the Cold War with a proliferation of theories about its causes and management. But its origins as a subject of academic inquiry are much earlier, with some of the earliest works of significance emerging as far back as the end of the First World War. become increasingly significant in Nepal, reshaping debates on the definition of the nation, nationalism and the structure of the state. This book analyzes the rapid rise in ethnic and nationalist mobilization and conflict since 1990, the dynamics and trajectories of these movements, and their consequences for Nepal. From an interdisciplinary perspective, the book looks at the roots of mobilization and conflicts, the reasons for the increase in mobilization and violent activities, and the political and social effects of the movements. It provides a historical context for these movements and investigates how identities intersect with forms of political and economic

By examining these diverse movements within the same time period and within a unitary state, the book illuminates which factors are more salient for the mobilization of identity groups. Bringing together empirical contributions on key issues in identity production in a comparative perspective, the book presents an interesting contribution to South Asian studies as well as studies of nationalism and identity more broadly.

Ethno-national conflict is one of the central issues of modern politics. Despite the emergence of approaches to managing it, from nation-building to territorial autonomy, in recent years, the application of these approaches has been uneven. Old conflicts persist and new ones continually emerge. The authors of this book contend that what is needed to drive forward the theory and practice of ethno-national conflict management is a more nuanced understanding of ethnicity and nationalism. The

book addresses this issue by linking theories of ethnicity and nationalism to theories of conflict management. Its contributors share a common goal of demonstrating that a nuanced understanding of ethnicity and nationalism can beneficially inform conflict management in theory and practice. To do so, they analyse both hot and cold conflict zones, as well as cases that have been important in the development of the most widely-used conflict management models. The book is aimed at those interested in the theory and practice of ethno-national conflict management as well as the study of ethnicity and nationalism. It is well-suited for

Bringing together international experts on ethnicity and nationalism, this book argues that competing moral economies play an important role in ethnic and nationalist conflict. Its authors investigate how the beliefs and practices that normatively regulate and legitimize the distribution of wealth, power, and status in a society — moral economies — are being challenged in identity-based communities in ways that precipitate or exacerbate conflicts. The combination of theoretical chapters and case studies ranging from Africa and Asia to North America provides compelling evidence for the value of moral economy analysis in understanding problems associated with ethnic and nationalist mobilization and

Fully updated for the second edition, the book includes a new section which offers detailed analyses of contemporary cases of conflict such as in Ukraine, Kosovo, the African Great Lakes region and in the Kurdish areas across the Middle East, thus providing accessible examples that bridge the gap between theory and practice. The contributors offer a 360-degree perspective on ethnic conflict: from the theoretical foundations of nationalism and ethnicity to the causes and consequences of ethnic conflict, and to the various strategies adopted in response to it. Without privileging any specific explanation of why ethnic conflict happens at a particular place and time or why

attempts at preventing or settling it might fail or succeed, The Routledge Handbook of Ethnic Conflict enables readers to gain a better insight into such defining moments in post-Cold War international history as the disintegration of the Soviet Union and Yugoslavia, and their respective consequences, the genocide in Rwanda, and the relative success of conflict settlement efforts in Northern Ireland. By contributing to understanding the varied and multiple causes of ethnic conflicts and to learning from the successes and failures of their prevention and settlement, the Handbook makes a powerful case that ethnic conflicts are neither unavoidable nor unresolvable, but rather that they require careful analysis and thoughtful and measured responses.

treatment of non-dominant ethnic groups after the failure of the military operation in East Pakistan and the independence of Bangladesh, this book looks at the ethnic movements that were subject to a military operation after 1971: the Baloch in the 1970s, the Sindhis in the 1980s and Mohajirs in the 1990s. The book critically evaluates the literature on ethnicity and nationalism by taking nationalist ideology and the political divisions which it generates within ethnic groups as essential in estimating ethnic movements. It goes on to challenge the modernist argument that nationalism is only relevant to modern-industrialised socio-economic settings. The available evidence from Pakistan makes clear that ethnic movements emanate from three distinct socio-economic realms: tribal (Baloch), rural (Sindh) and urban (Mohajir), and the book

Understanding Ethnic Conflict provides all the key concepts needed to understand conflict among ethnic groups. Including approaches from both comparative politics and international relations, this text offers a model of ethnic conflict's internationalization by showing how domestic and international actors influence a country's ethnic and sectarian divisions. Illustrating this model in five original case studies, the unique combination of theory and application in Understanding Ethnic Conflict facilitates more critical analysis of contemporary ethnic conflicts and the world's response to them.

As ethnic groups clash, the international community faces the challenge of understanding the multiple causes of violence and formulating solutions that will bring about peace. Allowing for greater insight, Jesse and Williams bridge two sub-fields of political science in *Ethnic Conflict*—international relations and comparative politics. They systematically apply a “levels of analysis” framework, looking at the individual, domestic, and international contexts to better explore and understand its complexity. Five case study chapters apply the book’s framework to disputes around the world and include coverage of Bosnia, the Israeli-Palestinian conflict, Northern Ireland, Sri Lanka, and Sudan. Never losing sight of their analytical framework, the authors provide richly detailed case studies that help students understand both the unique and shared

globalization and the relentless rise of English as the current world language. Stephen May's broad position, however, remains largely unchanged. He argues that the causes of many of the language-based conflicts in the world today still lie with the nation-state and its preoccupation with establishing a 'common' language and culture via mass education. The solution, he suggests, is to rethink nation-states in more culturally and linguistically plural ways while avoiding, at the same time, essentializing the language-identity link. This new edition, like the first, adopts a wide interdisciplinary framework, drawing on sociolinguistics, applied linguistics, sociology, political theory, education and law"--
