the center of contemporary intellectual debate. In this excellent collection, Robert Hullot-Kentor, widely regarded as the most distinguished American translator and commentator on Adorno, gathers together sixteen essays he has written about the philosopher over the past twenty years. The opening essay, "Origin Is the Goal," pursues Adorno's thesis of the dialectic of enlightenment to better understand the urgent social and political situation of the United States. "Back to Adorno" examines Adorno's idea that sacrifice is the primordial form of human domination; "Second Salvage" reconstructs Adorno's unfinished

study of the transformation of music in radio transmission; and "What Is Mechanical Reproduction" revisits Adorno's criticism of Walter Benjamin. Further essays cover a broad range of topics: Adorno's affinities with Wallace Stevens and Nabokov, his complex relationship with Kierkegaard and psychoanalysis, and his critical study of popular music. Many of these essays have been revised, with new material added that emphasizes the relevance of Adorno's thought to the United States today. Things Beyond Resemblance is a timely and richly analytical collection crucial to the study of critical theory, aesthetics, continental philosophy, and Adorno.

How capitalism first promoted fossil fuels with the rise of steam power The more we know about the catastrophic implications of climate change, the more fossil fuels we burn. How did we end up in this mess? In this masterful new history, Andreas Malm claims it all began in Britain with the rise of steam power. But why did manufacturers turn from traditional sources of power, notably water mills, to an engine fired by coal? Contrary to established views, steam offered neither cheaper nor more abundant energy—but rather superior control of subordinate labour. Animated by fossil
