Oswaal NTA CUET (UG) Sample Papers English, Economics, Math, Entrepreneurship & General Test (Set of 5 Books)(Entrance Exam Preparation Book 2022)

The Insurance Regulatory and Development Authority Act, 1999

In 2012, Life insurance penetration in India which is the major indicator of growth of insurance in the country was just 3.17% compared to Japan 9.2%, Taiwan 15.0% S. Korea 6.9%. (IRDA Annual Report 2012-13, p121-122) One of the important reasons for low penetration was/is unawareness of the Indian people about need of insurance in their life. It is true that with the establishment of IRDA and with the entry of private sector insurance companies, life insurance market is witnessing introduction of innovative, need based and customer friendly products. However, still majority of the Indian population is

either uninsured or under-insured. Yet, buying a life insurance policy is not a subject of preference on the 'agenda' of most of the Indian people. Those who take out an insurance policy give priority for tax exemption and saving rather than risk cover. This paper is an attempt to study the awareness about need of life insurance among the customers of LIC. This research revealed that the customers are aware about need of life insurance in their life and the Individual Agents of LIC are the major source of information for the policyholders.

2021 'O' Level Introduction to internet of things (IOT) and its Application MODULE-M4-R5 Model Paper

This volume is the newest release in the authoritative series issued by the National Academy of Sciences on dietary reference intakes (DRIs). This series provides recommended intakes, such as Recommended Dietary Allowances (RDAs), for

use in planning nutritionally adequate diets for individuals based on age and gender. In addition, a new reference intake, the Tolerable Upper Intake Level (UL), has also been established to assist an individual in knowing how much is "too much" of a nutrient. Based on the Institute of Medicine's review of the scientific literature regarding dietary micronutrients, recommendations have been formulated regarding vitamins A and K, iron, iodine, chromium, copper, manganese, molybdenum, zinc, and other potentially beneficial trace elements such as boron to determine the roles, if any, they play in health. The book also: Reviews selected components of food that may influence the bioavailability of these compounds. Develops estimates of dietary intake of these compounds that are compatible with good nutrition throughout the life span and that may decrease risk of chronic disease where data indicate they play a role. Determines Tolerable Upper Intake levels for each nutrient reviewed where adequate scientific data are available in specific population subgroups. Identifies

research needed to improve knowledge of the role of these micronutrients in human health. This book will be important to professionals in nutrition research and education.
