

Example Of A Newspaper

Seminar paper from the year 2008 in the subject English Language and Literature Studies - Linguistics, grade: 1,0, University of Rostock (Institut für Anglistik/Amerikanistik), course: Mass Media Communication: Newspapers and Magazines, 27 entries in the bibliography, language: English, abstract: Nowadays, there is a wide range of different newspapers, and most people see them as an important part of their everyday life. But newspapers as we know them today have only come into existence about three-hundred and fifty years ago. And although the liberty of the press at least in the countries of the European Union is today highly appraised, this has not always been the case. For a long time newspapers were a thorn in the flesh of governments, which thought that printed oppositional opinions threatened them. Therefore the governments tried to control newspapers tightly by enacting consequential laws. For years politics thus determined the development of newspapers. This term paper wants to deal with the influence of the English government on the development of newspapers between 1660 and 1855. This relates to London newspapers, if not stated otherwise. Also, the term newspaper is used for the printed product, the company or the owner, resp., and the journalists, if not stated otherwise. The term is also used for news printed before 1670, even though the term itself only occurred in the English language during that year. After explaining prerequisites that were necessary for the emergence of modern newspapers in the first place, I will shortly look at the formation of newspapers before 1660, before I have a close look at laws established by the English government between 1662 and 1843. Then, I am going to compare selected parameters concerning the development of newspapers in different centuries. In the practical part I will analyse eight issues of 'The Times'. I therefore chose the first January issues of a year, published with a time lag of ten years in each case. In thi"

This edited collection examines time and its relationship to and impact upon media industries, studying how the media industry views time and makes business and economic decisions based on considerations of time. Contributions from an international set of authors analyze time constraints and competition between different media; the quantity and quality of time spent in media consumption, audience and readership time valuation/costing/pricing; and the emergence of new media businesses around individual time management. Specific topics examined in the volume include: * a philosophical look at the concept of time and its application to media markets; * temporal aspects of media distribution for the media industries, and how time affects their activities; * the impact of increasing media industry consolidation and convergence on managerial effectiveness; * approaches to time by CNN and its various cache of news channels, in a managerial context; * the application of niche theory as a framework to examine competition between the Internet and television; * Internet access in the United Kingdom and Europe, examining the cost of time for online access; * the exchange of time and money in the television market for advertising; and * a summary of research and an agenda for future research on the topic of time's role in the media industry and markets. With its origins in the third World Media Economics conference, held in 2000, Time and Media Markets is a distinctive and important collection appropriate for scholars and advanced students in media management and economics.

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

A How-to Book for Teachers

The News as Myth

Managing Television News provides a practical introduction to the television news producer, one of the most significant and influential roles in a newscast. Recognizing the need for formal training in this key role, authors B. William Silcock, Don Heider, and Mary T. Rogus have combined their expertise and experience to shape this essential resource on the responsibilities, demands, and rewards of the news producer position. Their book provides a strategic approach to producing newscasts and serves as an in-depth guide to creating quality, audience-friendly newscasts working within the realistic limitations of most newsrooms. It helps the student and the professional producer sort through the various deadline-driven challenges of creating a 30-minute newscast. Filled with real-world examples and advice from news directors, producers, and anchors currently in the business, and photographs illustrating the varied perspectives in the position, Managing Television News provides critical skill sets to help resolve ethical dilemmas, as well as keen and fresh insights on how to win the ratings without compromising news quality. Career concerns are also addressed. This resource is a pioneering book for the professional television newsroom and the individual reader interested in starting or expanding a producing career. It is an excellent text for the college classroom, as its structure fits neatly into a semester schedule, and it is a must-have resource for both seasoned and novice producers, as well as students in broadcast news.

The Language of the News investigates and critiques the conventions of language used in newspapers and provides students with a clear introduction to critical linguistics as a tool for analysis. Using contemporary examples from UK, USA and Australian newspapers, this book deals with key themes of representation – from gender and national identity to 'race'– and looks at how language is used to construct audiences, to persuade, and even to parody. It examines debates in the newspapers themselves about the nature of language including commentary on political correctness, the sensitive use of language and irony as a journalistic weapon. Featuring chapter openings and summaries, activities, and a wealth of examples from contemporary news coverage (including examples from television and radio), The Language of the News broadens the perceptions of the use of language in the news media and is essential reading for students of media and communication, journalism, and English language and linguistics.

The news. We commonly accept it as fact, but there are many times when journalists are compelled to cross and recross the fine line between true fiction and false truth to get the "real" story. Koch argues that "the myth of the news is supposed objectivity" and that the very forms which presumably guarantee veracity ultimately lead to incomplete and misleading "false truths." Through an innovative and original methodology and analysis of stories from a variety of North American newspapers, this book shows that the narrative form used by journalists creates a consistent and structural bias in contemporary news. Having shown that contemporary journalistic forms--from the pyramid form to the sacrosanct five W's--effect the context in which "facts" are presented, Koch uses computer database technologies to discover ways in which these forms can be changed and improved.

In an innovative departure from the much-studied field of 'crime in the media', this lively book focuses its attention on the forces of law and order; how they visualize and represent danger and criminality and how they represent themselves as authorities. After two chapters covering basic terms and tools in the study of culture and representation, the book covers such topics as the history of justice - system methods for visualizing criminality, from fingerprinting to DNA; the emergence of a 'forensic gaze' that begins with Edgar Allan Poe and Sherlock Holmes and culminates in the American television show Crime Scene Investigation and the rise of ways of seeing urban space that constantly divide the city into 'good' and 'bad' areas. The final chapter uses some recent conflicts regarding the legal admissibility of 'gruesome pictures' to reflect on the importance of the visual in our everyday experiences, both of safety and of danger. Shortlisted for the Hart SLSA Book Prize 2007

This practical introduction to journalism covers all the key elements and distinctive features that constitute good newspaper journalism and provides students with a rich resource of real life examples, case studies and exercises.

As cash-strapped metropolitan newspapers struggle to maintain their traditional influence and quality reporting, large national and international outlets have pivoted to serving readers who can and will choose to pay for news, skewing coverage toward a wealthy, white, and liberal audience. Amid rampant inequality and distrust, media outlets have become more out of touch with the democracy they purport to serve. How did journalism end up in such a predicament, and what are the prospects for achieving a more equitable future? In News for the Rich, White, and Blue, Nikki Usher recasts the challenges facing journalism in terms of place, power, and inequality. Drawing on more than a decade of field research, she illuminates how journalists decide what becomes news and how news organizations strategize about the future. Usher shows how newsrooms remain places of power, largely white institutions growing more elite as journalists confront a shrinking job market. She details how Google, Facebook, and the digital-advertising ecosystem have wreaked havoc on the economic model for quality journalism, leaving local news to suffer. Usher also highlights how the handful of likely survivors--well-funded media outlets such as the New York Times--increasingly appeal to a global, "placeless" reader. News for the Rich, White, and Blue concludes with a series of provocative recommendations to reimagine journalism to ensure its resiliency and its ability to speak to a diverse set of issues and readers.

The nearly two hundred activities in this teaching guide for language arts in the junior high and middle school are arranged in five sections: studying language, communicating orally, reading and reading literature, writing, and listening and viewing. Each section opens with a list of activities, a brief introductory statement, and suggested reading. Sections are subdivided to help teachers locate activities related to particular curriculum units or areas of special interest. All activities were adapted to fit a unified format: purpose, preparation, and presentation. Approximately half of the activities contain material that should be distributed to students and these material sheets are printed separately for ease of reproduction and are presented in a special section. The appendix contains articles on parental involvement in the language arts program and on a two-year program in junior high school writing. (MKM)

Zhao's authoritative and insightful analysis of key factors that greatly impact Japan's policymaking will be of significant appeal in view of the intense contemporary interest in Japan's relationships with other countries. Four cases involving Japan's relations with China demonstrate the author's conclusions that a complexity of societal, cultural, and institutional elements interact to fashion policy. The principles and mechanisms examined apply over the spectrum of Japan's policymaking within a framework of informal pluralism. Zhao describes kuromaku, tsukiai, and nemawashi, which represent actors and organizations, social connections, and behind the scenes preparations.

Fact and Context in Journalism
