At the dawn of the twenty-first century, three ideas dominate the world: peace as the preferred basis for relations between and among different countries, democracy as the optimal way to organize political life, and free markets as the indispensable vehicle for the creation of wealth. While not practiced everywhere, these ideas have--for the first time in history--no serious rivals. And although the terrorist attacks of September 11, 2001, were terrible and traumatic, they did not "change everything," as so many commentators have asserted. Instead, these events served to illuminate even more brightly the world that emerged from the end of the Cold War. In *The Ideas That Conquered the World*, Michael Mandelbaum describes the uneven spread (over the past two centuries) of peace, democracy, and free markets from the wealthy and powerful countries of the world's core, where they originated, to the weaker and poorer countries of its periphery. And he assesses the prospects for these ideas in the years to come, giving particular attention to the United States, which bears the greatest responsibility for protecting and promoting them, and to Russia, China, and the Middle East, in which they are not well established and where their fate will affect the rest of the world. Drawing on history, politics, and economics, this incisive book provides a clear and original guide to the main trends of the twenty-first century, from globalization to terrorism, through the perspective of one of our era's most provocative thinkers.

Although scholars have long been aware of the crucial roles that gender plays in music, and vice versa, the contributors to this volume are among the first to systematically examine the interactions between the two. This book is also the first to explore the diverse, yet often strikingly similar, musics of the areas bordering the Mediterranean from comparative anthropological perspectives. From Spanish flamenco to Algerian rai, Greek rebetika to Turkish pop music, Sephardi and Berber songs to Egyptian belly dancers, the contributors cover an exceedingly wide range of geographic and musical territories. Individual essays examine musical behavior as representation, assertion, and sometimes transgression of gender identities: compare men's and women's roles in specific musical practices and their historical evolution and explore how music and gender relate to such issues as ethnicity, nationality, and religion. Anyone studying the musics or cultures of the Mediterranean, and more generally the relations between gender and the arts, will welcome this book. Contributors: Colinne Bithell, Joaquina Labajo, Jane C. Sugarman, Carol Silverman, Goffredo Plastino, Gail Holist-Warhaft, Edwin Seroussi, Marie Virolle, Terry Brint Joseph, Deborah Kapchan, Karin van Nieuwerkerk, Svanibor Pettan, Martin Stokes, Philip V. Drawing together contributions from some of the leading scholars in the interdisciplinary field of children and childhood studies (CCS), this guided approach to literature searching in CCS provides background information about interdisciplinary study in general, and CCS in particular, as well as an outline of basic research practices. Why do we use APA style One of the overarching goals for academic writing is to ensure that students are good communicators, and that includes writing well and communicating ideas to a reader in a clear, concise, organized, consistent manner. The writing and citation style adopted is that of the APA (American Psychological Association). However, the APA manual can be cumbersome for students to navigate. Therefore, this guidebook is prepared for adult students to use when writing papers for their classes. Endnote Made Easy: Reference Management for the Professional is intended for healthcare professionals (physicians, nurses, managers, etc.) and biomedical researchers engaged in writing scientific manuscripts. It aids readers in gaining an understanding of the effective use of information technology in storing, managing, retrieving, and citing references in scientific writings. It also provides step by step instruction on using Endnote, a popular reference management software.

Nerve Cells and Insect BehaviorHarvard University Press
 In The Lees of Virginia, Paul Nagel chronicles seven generations of Lees, from the family founder Richard to General Robert E. Lee, covering over two hundred years of American history. We meet Thomas Lee, who dreamed of America as a continental empire. His daughter was Hannah Lee Corbin, a non-conformist in lifestyle and religion, while his son, Richard Henry Lee, was a tempestuous figure who wore black silk over a disfigured hand when he made the motion in Congress for independence. Another of Thomas' sons, Arthur Lee, created a political storm by his accusations against Benjamin Franklin. Arthur's cousin was Light-Horse Harry Lee, a controversial cavalry officer in the Revolutionary War, whose wild real estate speculation led to imprisonment for debt and finally self-exile in the Caribbean. One of Harry's sons, Henry Lee, further disgraced the family by seducing his sister-in-law and frittering away Stratford, the Lees' ancestral home. Another son, however, became the family's redeeming figure--Robert E. Lee, a brilliant tactician who is still revered for his lofty character and military success. In these and numerous other portraits, Nagel discloses how, from 1640 to 1870, a family spirit united the Lees, making them a force in Virginian and American affairs. Paul Nagel is a leading chronicler of families prominent in our history. His Descent from Glory, a masterful narrative account of four generations of Adamases, was hailed by The New Yorker as "intelligent, tactful, and spiritually generous," and Pulitzer Prize-winning historian W.A. Swanberg, in the Chicago Music and Gender.
