The Delivery of Human Rights reflects on two overlapping issues in international human rights law: how can existing norms be better implemented and effected, and how can other branches of international law or other international actors be used so as to provide an improved delivery of those norms. Rather than simply looking at the content of the rights, this book will also explore how the framers' intention that individuals benefit from the norms can be achieved. The book is written and published in honour of Professor Sir Nigel Rodley KBE. It celebrates his career as an academic and practitioner in the area of human rights. Professor Rodley acted as the UN Special Rapporteur on Torture from 1993 to 2001 and is currently a member of the UN Human Rights Committee. He is also a member of the International Commission of Jurists. Since 2001 he has been a Member of the UN Human Rights Committee, established under the International Covenant on Civil and Political Rights. In 1998 he was knighted in the Queen's New Year's Honours list for services to Human Rights and International Law and in 2000 he received an honorary LL.D. from Dalhousie University. He is Professor and Chair of the Human Rights Centre, University of Essex, having taught there since 1990. The contributors to this volume are notable experts in the area of human rights law and include Paul Hunt, Malcolm Evans, Michael O'Flaherty and David Weissbrodt. The book addresses such topics as the Role of Special Rapporteurs, how can the absolute prohibition of torture be properly implemented, Responsibility to Protect, non-state actors, including businesses, and human rights.

OSCEs for Intensive Care Medicine is a comprehensive revision resource for doctors preparing to take the Fellowship of the Faculty of Intensive Care Medicine (FFCIM) and the European Diploma in Intensive Care Medicine (EDIC). Written by a team of practicing intensive care consultants with extensive experience running a successful FFCIM course, this book features over 100 practice questions organised into eight mock OSCE exams and is mapped to both the FFCIM and CoBaTrICE curricula. Reflecting the real exams, they are divided into stations on professionalism, data, resuscitation, and equipment, each of which are accompanied by further reading to ensure high-quality self-assessment. With hints and tips throughout to help candidates avoid common mistakes and misconceptions, this book is essential reading for any doctor preparing for the FFCIM or EDIC OSCE exams.

Islamic Finance has experienced rapid growth in recent years, showing significant innovation and sophistication, and producing a broad range of investment products which are not limited to the complete replication of conventional fixed-income instruments, derivatives and fund structures. Islamic Finance represents an elemental departure from traditional interest-based and speculative practices, relying instead on real economic transactions, such as trade, investment based on profit sharing, and other solidary ways of doing business, and aims to incorporate Islamic principles, such as social justice, ecology and kindness, to create investment products and financial markets which are both ethical and sustainable. Products created according to Islamic principles have shown a low correlation to other market segments and are relatively independent even from market turbulences like the subprime crisis. Therefore, they have become increasingly popular with secular Muslims and non-Muslim investors, as highly useful alternative investments for the diversification of portfolios. In Islamic Capital Markets: Products and Strategies, international experts on Islamic Finance and Sharia'a Law focus on the most imminent issues surrounding the evolution of Islamic capital markets and the development of Sharia'a-compliant products. The book is separated into four parts, covering: General concepts and legal issues, including Rahn concepts in Saudi Arabia, the Sharia'a process in product development and the integration of social responsibility in financial communities; Global Islamic capital market trends, such as the evolution of Takaful products and the past, present and future of Islamic derivatives; National and regional experiences, from the world's largest Islamic financial market, Malaysia, to Islamic finance in other countries, including Germany, France and the US; Learning from Islamic finance after the global financial crisis; analysis of the risks and strengths of Islamic capital markets compared to the conventional system, financial engineering from an Islamic perspective, Sharia'a-compliant equity investments and Islamic microfinance. Islamic Capital Markets: Products and Strategies is the complete investors' guide to Islamic finance.

Taking the lessons learned from his years studying the rise and fall of the modern music industry, Spotify's Chief Economist has crafted "a compelling and generous read" (Scott Galloway) that provides the tools to recognize and adapt to disruption in any industry. As the chief economist at Spotify, Will Page has had the best seat in the

house for witnessing—and harnessing—the power of disruptive change. Music has often been the canary in the coal mine for major technological and societal shifts, and if there's one thing Page learned from the digital revolution, it's that businesses must be ready to pivot. Drawing practical lessons from a variety of fresh case studies covering Radiohead, Starbucks, and even Groucho Marx, Page examines the eight principles that disruption has thrown into sharp relief as keys to survival in any sector. Businesses need to be ready and willing to change and, if necessary, be prepared to rebuild entire organizations and business models to do so. Pivoting through disruption has everything to do with being able to see the revolutionary changes around the corner, recognizing your strengths, and having the confidence to let go of the old vine of doing business and grab onto the new. A rare book of economics offering actionable takeaways in easy-to-understand language, Tarzan Economics is the must-read book for anyone staring at their own Napster moment and wishing they knew how to fail-safe their business.

The widespread adoption of smartphones, ridesharing and carsharing have disrupted the transport sector. In cities around the world, new mobility services are both welcomed and challenged by regulators and incumbent operators. Mobility as a Service (MaaS), an ecosystem designed to deliver collaborative and connected mobility services in a society increasingly embracing a sharing culture, is at the center of this disruption. Understanding Mobility as a Service (MaaS): Past, Present and Future examines such topics as: How likely MaaS will be implemented in one digital platform app Whether MaaS will look the same in all countries The role multi-modal contract brokers play Mobility regulations and pricing models MaaS trials, their impacts and consequences Written by the leading thinkers in the field for researchers, practitioners, and policy makers, Understanding Mobility as a Service (MaaS): Past, Present and Future serves as a single source on all the current and evolving developments, debates, and challenges.
