the programs were organized, financed and implemented and their impact on patrons and libraries. The report helps its readers to answer questions such as: how many tablets do libraries maintain for loan? Which brands do they prefer and which are they planning to purchase in the future? How much have

they spent on their tablet lending programs and plan to spend? Do they load their tablets with apps? If so how do they choose them? How many tablets are lost to theft? Or to negligence or accidents? What is the fine for overdue tablets? What is the length of the lending period? What are the

circulation figures for tablets? What has been the impact on other library resources, such as a pre-existing laptop lending program? Or on use of the library's eBook collection? Which libraries do they view as models and what advice can they offer to peers? What services or training are offered to

library patrons about how to use the tablets? Data in the report is broken out by library type (public library/public college/private college/special library), by size of library staff, and size of stock of tablet loaned and other variables.
