

Facts About Baby Chickens For Kids

Chicken Fact or Chicken Poop is a science-rooted, fact-based, and study-reinforced manual designed to help you weed through the facts and fictions about your flock. Chicken keepers have access to more information than ever these days, which makes it harder than ever to determine whether what you're reading is a chicken fact or just plain chicken poop. A seemingly reputable blog may tell you one thing while a magazine could say the complete opposite! A farmer may give some homespun wisdom that another may say is complete phooey. This is where Andy Schneider, The Chicken Whisperer, comes in. Schneider has assembled a team of leading chicken experts to help you sort through common facts and fictions about how to keep your flock happy and healthy. Chicken Fact or Chicken Poop covers topics including nutrition, trauma, parasites, medication, predators, and human health. This go-to reference gives you more of everything you need to know, and didn't know you needed to know, about backyard and urban chickens.

The founder and president of PETA, Ingrid Newkirk, and bestselling author Gene Stone explore the wonders of animal life with “admiration and empathy” (The New York Times Book Review) and offer tools for living more kindly toward them. In the last few decades, a wealth of new information has emerged about who animals are: astounding beings with intelligence, emotions, intricate communications networks, and myriad abilities. In Animalkind, Ingrid Newkirk and Gene Stone present these findings in a concise and awe-inspiring way, detailing a range of surprising discoveries, like that geese fall in love and stay with a partner for life, that fish “sing” underwater, and that elephants use their trunks to send subsonic signals, alerting other herds to danger miles away. Newkirk and Stone pair their tour through the astounding lives of animals with a guide to the exciting new tools that allow humans to avoid using or abusing animals as we once did. Whether it’s medicine, product testing, entertainment, clothing, or food, there are now better options to all the uses animals once served in human life. We can substitute warmer, lighter faux fleece for wool, choose vegan versions of everything from shrimp to marshmallows, reap the benefits of animal-free medical research, and scrap captive orca exhibits and elephant rides for virtual reality and animatronics. Animalkind provides a fascinating look at why our fellow living beings deserve our respect, and lays out the steps everyone can take to put this new understanding into action.

Poultry and Egg Situation

American Agriculturist

Investigation of the National Recovery Administration

The original edition of *Prisoned Chickens, Poisoned Eggs* became a blueprint for people seeking a coherent picture of the U.S. poultry industry, as well as a handbook for animal rights activists seeking to develop effective strategies to expose and relieve the plight of chickens. This new edition tells where things stand in a new century in which avian influenza, food poisoning, global warming, genetic engineering, and the expansion of poultry and egg production and consumption are growing concerns in the mainstream population. Simple text and colorful pictures introduce the life of chickens on a farm.

All the Facts presents a history of the role of information in the United States since 1870, when the nation began a nearly 150-year period of economic prosperity and technological and scientific transformations. James Cortada argues that citizens and their institutions used information extensively as tools to augment their work and private lives and that they used facts to help shape how the nation evolved during these fourteen decades. He argues that information's role has long been a critical component of the work, play, culture, and values of this nation, and no more so than during the twentieth century when its function in society expanded dramatically. While elements of this story have been examined by thousands of scholars---such as the role of radio, newspapers, books, computers, and the Internet, about such institutions as education, big business, expanded roles of governments from town administration to the state house, from agriculture to the services and information industries---All the Facts looks at all of these elements holistically, providing a deeper insight into the way the United States evolved over time. An introduction and 11 chapters describe what this information ecosystem looked like, how it evolved, and how it was used. For another vast layer of information about this subject the reader is directed to the detailed bibliographic essay in the back of this book. It includes a narrative history, case studies in the form of sidebars, and stories illustrating key points. Readers will find, for example, the story of how the US postal system helped create today's information society, along with everything from books and newspapers to TV, computers, and the Internet. The build-up to what many today call the Information Age took a long time to achieve and continues to build momentum. The implications for the world, and not just for the United States, are as profound as any mega-trend one could identify in the history of humankind. All the Facts presents this development thoroughly in an easy-to-digest format that any lover of history, technology, or the history of information and business will enjoy.

Introduce children to the life cycle of chickens from egg, to hatching, and beyond with Let's Hatch Chicks!. Author Lisa Steele, of Fresh Eggs Daily, shows the entire process in kid friendly terms. Let's Hatch Chicks!

Remarkable Discoveries about Animals and Revolutionary New Ways to Show Them Compassion

Chicken Fact Or Chicken Poop

Baby chickens hatch from eggs. Chicks weigh about as much as a dozen pennies. But did you know that chicks can find their mom by the sound of her clucks? Or that chicks roll in the dust to clean themselves? Read this book to find out! This title also includes a life cycle diagram, a habitat map, fun facts, a glossary, and more!

Gail Damerow shows you how to incubate, hatch, and brood baby chickens, ducklings, goslings, turkey poults, and guinea keets. With advice on everything from selecting a breed and choosing the best incubator to feeding and caring for newborn chicks in a brooder, this comprehensive guide also covers issues like embryo development, panning chicks, and a variety of common birth defects. Whether you want to hatch three eggs or one hundred, you'll find all the information you need to make your poultry-raising operation a success.

Bullies are Bad. KIDS R KOOL!

Raising Chickens For Dummies

Chester the Chick

The Ohio Farmer

This 5-STAR Book by award winning author Daniel David Elles (danieldavidelles.com) is illustrated by a 5th Grader to help kids read and to promote Anti-Bullying! The Adventures of Elvis the Pug (iamelvisthepug.com) is a children's inspirational and educational series for the ages of 7-to-11 (Grades 2-5). Full of twists and surprises, this 100-page story will certainly capture your child's interest as they learn valuable information - animals, geography, history, science, math, etc. - and cherished life lessons. It's all about FAMILY VALUES and to interact with others as they wish to be treated. The series follows the foundation - laid down by Dr. Seuss, Walt Disney, and Sesame Street - where kids can learn more about schools subjects and family values through other kids and characters. That's why these books are illustrated by a 5th Grader and Elvis the Pug is the encouraging character to help kids read and learn. VOLUME II: Bullies are Bad...KIDS R. KOOL! SYNOPSIS: Elvis, a beautiful brown Pug, was recently adopted by a loving family in the small town of St. Clair, Michigan (see Volume I: Lost in Canada). On a school wide field trip, the Jones family pets (Elvis the Pug and Crazy the Cat) accompany the elementary students on their day long field trip to The Jones Family Farm. At this 500 acre farm, nestled alongside the thick woods of St. Clair County, the children are ecstatic to learn all about horses, pigs, deer, chickens, cows, etc. Everyone is excited. But then, after the lunch break, a group of kids gets lost in the enormous woods. Trying to find their way back before the school buses depart, the children - with Elvis and Crazy - are suddenly confronted by a hungry black bear. With Elvis protecting the children, they manage to escape the clutches of the bullying bear. However, as the bear continues to track them, they are threatened by a pack of angry wolves. The children turn to their bullied classmate Herman for help. That's right! The dyslexic and stuttering 5th Grader, who the kids continuously picked on, now comes to their aid to lead them out of the darkening woods. · Can Herman help save the day...just like the bullied Rudolph did for Christmas? · Can he get them back before the busses depart at dark? · Can Elvis the Pug and Crazy the Cat help Herman? LET'S STOP BULLING...NOW! Kids are often bullied because they're perceived to be different. Not only color, race, religion, etc.; but differences, like: ADHD, Anxiety, Asperger, Autism, Depression, Downs, Dyslexia, Stuttering, etc. These profoundly affect so many of our children. But, their classmates don't realize there is no "normal" and bully them anyway. · 160,000 kids, in America, miss school every day because of bullying · 56% of kids witnessed bullying. But, by age 14, they live with it. With this wonderful sequel to Volume I: Lost in Canada; our children will learn the terrible effects of bullying, while being educated in all kinds of core subjects and quickly realize that there is no "normal". They learn, through Elvis, to respect others and to treat everyone equally and fairly! Elvis the Pug makes it all possible in an action-packed and entertaining story.
