

Family Of Origin Paper Example

This brilliantly systematic and comprehensive textbook provides an integrated approach to social work theory, methods and skills as the bedrock of all social work practice. Recognizing social work as a diverse activity that is rooted in common foundations, it explains how practice both shapes and is shaped by professional purpose. The text also explores the diverse range of social work practice methods available and aims to equip the reader with a foundation in the history and application of these varied approaches. Offering a step-by-step discussion that will empower readers to critically develop and refine their professional toolkit for purposeful and innovative intervention, this original rationale is an essential resource for any social work student or practitioner looking to build, or consolidate, their understanding of the range of methods and skills available for effective professional practice.

Couple and Family Psychoanalysis is an international journal sponsored by Tavistock Relationships, which aims to promote the theory and practice of working with couple and family relationships from a psychoanalytic perspective. It seeks to provide a forum for disseminating current ideas and research and for developing clinical practice. The annual subscription provides two issues a year. Articles - Personality Disorder: A Diagnosis of Disordered Relating by Stanley Ruzsyczynski - Viewing the Absence of Sex from Couple Relationships Through the "Core Complex" Lens by Amita Sehgal - Infidelity as Manic Defence by Shelley Nathans - Lack of Self-Disclosure and Verbal Communication About Emotions as a Precipitant of Affairs by Shosh Carmel - Children of Oedipus by Penelope Jools - The "Original Couple": Enabling Mothers and Infants to Think About What Destroys as Well as Engenders Love, When There Has Been Intimate Partner Violence by Sarah Jones and Wendy Bunston - Mutual Madness: the erotic transference between Jung and Spielrein by Coline Covington

A small book to help parents recover their clarity and confidence. It focusses on how parents can manage themselves effectively rather than the common focus on understanding and managing the child. A timely book for parenting children of all ages.

How to bring your best to all of life's relationships

Featuring over seventy affirming interventions in the form of homework assignments, handouts, and activities, this comprehensive volume helps novice and experienced counselors support LGBTQ+ community members and their allies. Each chapter includes an objective, indications and contraindications, a case study, suggestions for follow-up, professional resources, and references. The book's social justice perspective encourages counselors to hone their skills in creating change in their communities while helping their clients learn effective coping strategies in the face of stress, bullying, microaggressions, and other life challenges. The volume also contains a large section on training groups of allies and promoting greater cohesion within LGBTQ+ communities.

Counseling and mental health services for LGBTQ+ clients require between-session activities that are clinically focused, evidence-based, and specifically designed for one or more LGBTQ+ sub-populations. This handbook gathers together the best of such LGBTQ+ clinically focused material. As such, the book appeals both to students learning affirmative LGBTQ+ psychotherapy/counseling and to experienced practitioners. The Handbook features homework assignments, handouts, and activities that: -Emphasize working with clients from different backgrounds. -Stress the importance of ethical guidelines and culturally competent care. -Demonstrate how to engage clients in conversations about coming out across the lifespan. -Help clients manage oppression and build resilience through self-care, advocacy, and validation. -Identify the facets of relationships that are unique to LGBTQ+ individuals. -Offer interventions to enhance familial support and work through family dynamics. -Assist clients to more deeply appreciate their genders and sexual identities. -Aid therapists in their work with clients who have substance use and abuse issues. -Address concerns about career choices, employment options, and college pursuits. -Create safety in a range of social and clinical spaces, including college campuses. Offering practical tools used by clinicians worldwide, the volume is particularly useful for courses in clinical and community counseling, social work, and psychology. Those new to working with LGBTQ+ clients will appreciate the book's accessible foundation to guide interventions.

Dynamics of the family can be seen as a complex set of interrelated cogs, like the dials and wheels within a sophisticated timepiece. Families in Motion: Dynamics in Diverse Contexts is a clear, comprehensive, and contextual view of how the dials and wheels of that complex set work together. With a focus on multicultural competence through diverse contexts and examples, this new text explores the complexities of the family regarding roles, functions, and development in a way that is approachable for students. Grounded in theory and using 40 years of academic experience, author Clara Gerhardt guides readers through concepts of family theories and examines the ever-changing movement, communication, and conditions of both the family as a system and each member within the system. Covering approaches from the theoretical to the therapeutic, Families in Motion will support students in extending their cultural competence while understanding families and their members with greater confidence.

When Bowen was a student and practitioner of classical psychoanalysis at the Menninger Clinic, he became engrossed in understanding the process of schizophrenia and its relationship to mother-child symbiosis. Between the years 1950 and 1959, at Menninger and later at the National Institute of Mental Health (as first chief of family studies), he worked clinically with over 500 schizophrenic families. This extensive experience was a time of fruition for his thinking as he began to conceptualize human behavior as emerging from within the context of a family system. Later, at Georgetown University Medical School, Bowen worked to extend the application of his

ideas to the neurotic family system. Initially he saw his work as an amplification and modification of Freudian theory, but later viewed it as an evolutionary step toward understanding human beings as functioning within their primary network—their family. One of the most renowned theorist and therapist in the field of family work, this book encompasses the breadth and depth of Bowen's contributions. It presents the evolution of Bowen's Family Theory from his earliest essays on schizophrenic families and their treatment, through the development of his concepts of triangulation, intergenerational conflict and societal regression, and culminating in his brilliant exploration of the differentiation of one's self in one's family of origin.

First published in 1957, and reprinted with a new introduction in 1986, Michael Young and Peter Willmott's book on family and kinship in Bethnal Green in the 1950s is a classic in urban studies. A standard text in planning, housing, family studies and sociology, it predicted the failure in social terms of the great rehousing campaign which was getting under way in the 1950s. The tall flats built to replace the old 'slum' houses were unpopular. Social networks were broken up. The book had an immediate impact when it appeared – extracts were published in the newspapers, the sales were a record for a report of a sociological study, Government ministers quoted it. But the approach it advocated was not accepted until the late 1960s, and by then it was too late. This Routledge Revivals reissue includes the authors' introduction from the 1986 reissue, reviewing the impact of the book and its ideas thirty years on. They argue that if the lessons implicit in the book had been learned in the 1950s, London and other British cities might not have suffered the 'anomie' and violence manifested in the urban riots of the 1980s.

Psychiatric and Mental Health Nursing has established itself as Australia and New Zealand's foremost mental health nursing text and is an essential resource for all undergraduate nursing students. This new edition has been thoroughly revised and updated to reflect current research and changing attitudes about mental health, mental health services and mental health nursing in Australia and New Zealand. Set within a recovery and consumer-focused framework, this text provides vital information for approaching the most familiar disorders mental health nurses and students will see in clinical practice, along with helpful suggestions about what the mental health nurse can say and

do to interact effectively with consumers and their families. Visit evolve.elsevier.com for your additional resources: eBook on Vital Source Resources for Students and Instructors: Student practice questions Test bank Case studies Powerful consumer story videos 3 new chapters:

- Physical health care: addresses the physical health of people with mental health problems and the conditions that have an association with increased risk of mental health problems
- Mental health promotion: engages with the ways in which early intervention can either prevent or alleviate the effects of mental health problems
- Challenging behaviours: presents a range of risk assessments specifically focused upon challenging behaviours

Now addresses emerging issues, such as:

- The transitioning of mental health care to primary care
- The development of peer and service user led services, accreditation and credentialing
- Mental Health Nurse Incentive Program

Cultivate self-awareness, empathy, and clinical competence in the mental health professionals you supervise Providing tested guidance for clinical supervisors of mental health professionals, editors Roy A. Bean, Sean D. Davis, and Maureen P. Davey draw from their own backgrounds in training, private practice, and academe, as well as from an international panel of experts representing various mental health fields to provide activities and best practices that allow therapists to better serve an increasingly diverse set of clients and issues. While clinical skills are easily observed, the more subtle areas of self-awareness, or exploring unexamined judgments are more difficult to spot and to provide supervision and guidance for. The numerous experiential activities included will help supervisors and the mental health professional they supervise develop their skills and techniques around: Intuition Empathy Self-awareness Mindfulness Multicultural awareness Perspective taking The book covers both clinical as well as diversity-focused competence and awareness, and suggests various forms of activities, including research exercises, reflection, journaling, and more. Each activity includes measurement metrics as well as additional resources that help clinicians identify the best activity for a given situation. Appropriate for clinicians at every level and from a multitude of backgrounds, these tried and tested best practices can be used in clinical supervision, as a class assignment, or to facilitate professional growth.

BONUS: This edition contains an excerpt from Dr. Susan Forward's *Men Who Hate Women and the Women Who Love Them*. When you were a child... Did your parents tell you were bad or worthless? Did your parents use physical pain to discipline you? Did you have to take care of your parents because of their problems? Were you frightened of your parents? Did your parents do anything to you that had to be kept secret? Now that you are an adult... Do your parents still treat you as if you were a child? Do you have intense emotional or physical reactions after spending time with your parents? Do your parents control you with threats or guilt? Do they manipulate you with money? Do you feel that no matter what you do, it's never good enough for your parents? In this remarkable self-help guide, Dr. Susan Forward drawn on case histories and the real-life voices of adult children of toxic parents to help you free yourself from the frustrating patterns of your relationship with your parents -- and discover an exciting new world of self-confidence, inner strength, and emotional independence. Demographic changes, immigration, economic upheavals, and changing societal mores are creating new and altered structures, processes, and relationships in American families today. As families undergo rapid change, family science is at the brink of a new and exciting

integration across methods, disciplines, and epistemological perspectives. The purpose of The Science of Research on Families: A Workshop, held in Washington, DC, on July 13-14, 2010, was to examine the broad array of methodologies used to understand the impact of families on children's health and development. It sought to explore individual disciplinary contributions and the ways in which different methodologies and disciplinary perspectives could be combined in the study of families. Toward an Integrated Science of Research on Families documents the information presented in the workshop presentations and discussions. The report explores the idea of family research as being both basic and applied, offering opportunities for learning as well as intervention. It discusses research as being most useful when organized around particular problems, such as obesity or injury prevention. Toward an Integrated Science of Research on Families offers a problem-oriented approach that can guide a broad-based research program that extends across funders, institutions, and scientific disciplines.

Bowen Theory's Secrets: Revealing the Hidden Life of Families

The first love in our lives is our mother. Recognizing her face, her voice, the meaning of her moods, and her facial expressions is crucial to survival. Dr. Christine Ann Lawson vividly describes how mothers who suffer from borderline personality disorder produce children who may flounder in life even as adults, futilely struggling to reach the safety of a parental harbor, unable to recognize that their borderline parent lacks a pier, or even a discernible shore. Four character profiles describe different symptom clusters that include the waif mother, the hermit mother, the queen mother, and the witch. Children of borderlines are at risk for developing this complex and devastating personality disorder themselves. Dr. Lawson's recommendations for prevention include empathic understanding of the borderline mother and early intervention with her children to ground them in reality and counteract the often dangerous effects of living with a "make-believe" mother. Some readers may recognize their mothers as well as themselves in this book. They will also find specific suggestions for creating healthier relationships. Addressing the adult children of borderlines and the therapists who work with them, Dr. Lawson shows how to care for the waif without rescuing her, to attend to the hermit without feeding her fear, to love the queen without

becoming her subject, and to live with the witch without becoming her victim. A Jason Aronson Book
A much-needed update to one of the most significant family therapy theories of the past century. Murray Bowen (1931–1990) was the first to study the family in a live-in setting and describe specific details about how families function as systems. Despite Bowen theory being based on research begun more than seventy years ago, the value of viewing human beings as profoundly emotionally-driven creatures and human families functioning as emotional units is more relevant than ever. This book, written by one of his closet collaborators, updates his still-radical theory with the latest approaches to understanding emotional development. Reduced to its most fundamental level, Bowen theory explains how people begin a relationship very close emotionally but become more distant over time. The ideas also help explain why good people do bad things, and bad people do good things, and how family life strengthens some members while weakening others. Gaining knowledge about previously unseen specifics of family interactions reveals a hidden life of families. The hidden life explains how the best of intentions can fail to produce the desired result, thus providing a blueprint for change. Part I of the book explains the core ideas in the theory. Part II describes the process of differentiation of self, which is the most important application of Bowen theory. People sometimes think of theories as "ivory tower" productions: interesting, but not necessarily practical. Differentiation of self is anything but; it has a well-tested real-world application. Part II includes four long case presentations of families in the public eye. They help illustrate how Bowen theory can help explain how families—three of which appear fairly normal and one which does not—unwittingly produce an offspring that chronically manifests some time of severely aberrant behavior. Finally, the book proposes a new "unidisease" concept—the idea that a wide range of diseases have a number of physiological processes in common. In an Epilogue, Kerr applies Bowen theory to his family to illustrate how changes in a family relationship system over time can better explain the clinical course of a chronic illness than the diagnosis itself. With close to four thousand hours of therapy conducted with about thirty-five hundred families over decades, Michael Kerr is an expert guide to the ins and outs of this most influential way of approaching clinical work with families.

Social Work Practice

Introduction to Family Counseling: A Case Study Approach presents basic knowledge about family counseling and applies various theoretical models to a case example looking at one nuclear family, along with its extended family members, that readers follow throughout the text. Judy Esposito and Abbi

Hattem's multi-generational family is constructed from their experiences as professors and family therapists to exemplify the concepts and theories of family counseling. Beyond the theories of family counseling, students learn about the family life cycle and various tools for assessing families as well as the history of family counseling. Ethical issues relevant to family counseling are also included along with transcripts from hypothetical family counseling sessions throughout the book. In addition, the book focuses on working with diverse families and takes special care to emphasize multicultural issues.

Growing Yourself Up

Family-Of-Origin Therapy

Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and

practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

II mental health professionals will want to read this exciting book to better understand the reciprocal impact of their professional and family lives. Psychotherapists who frequently work with family clients may find difficulty in making the transition from work to their own family life and back again. Contributors examine the transpositions of personal family life and objective task-oriented work life that occur, with suggestions of how to recognize and cope with the changes. Experts also explore the extraordinary challenges psychotherapists face when treating fellow therapists with family-related problems, or when they themselves need those services. How do people of different ages experience and engage with politics in their everyday lives, and how do these experiences and engagements change over their life course and across different generations? Age, life course and generation have become increasingly important experiences for understanding political participation and political outcomes, and current policies of austerity across the world are affecting people of all ages. This book contributes towards an interdisciplinary understanding of the temporalities of everyday political encounters. At a time when social science is struggling to understand the rapid and unexpected changes to contemporary political landscapes, the contributors to this book present examples of activism and politics across everyday experiences of homes, communities, online platforms, local environment, playgrounds and educational spaces. The research takes ethnographic, biographical and action research approaches, and the studies described feature interlocutors as young as four and as old as ninety-two who reside in European, North and South America, and South Asia. This is an eclectic text that brings together a number of themes and ideas not typically associated with political activism, and is intended for students and academic researchers across the humanities, social and political sciences interested in the temporalities of everyday political participation. This book was originally published as a special issue of Contemporary Social Science.

The book focuses on Social Work with refugees in African, Middle East and European countries. Published as a follow-up to the 'International Social Work Week' in Würzburg/Germany with professionals and experts from all over the globe, this book intends to share insights into country-specific developments, challenges and potentials of Social Work in forced migration contexts. The objectives are to map Social Work in this field of

action across several countries, to bring into sharper focus an International Social Work in forced migration contexts as well as to contribute in connecting Social Work scholars and experts around the globe.

Working Paper Series

The Use of Self in Therapy

Family and home are one word--jia--in the Chinese language. Family can be separated and home may be relocated, but jia remains intact. It signifies a system of mutual obligation, lasting responsibility, and cultural values. This strong yet flexible sense of kinship has enabled many Chinese immigrant families to endure long physical separation and accommodate continuities and discontinuities in the process of social mobility. Based on an analysis of over three thousand family letters and other primary sources, including recently released immigration files from the National Archives and Records Administration, Haiming Liu presents a remarkable transnational history of a Chinese family from the late nineteenth century to the 1970s. For three generations, the family lived between the two worlds. While the immigrant generation worked hard in an herbalist business and asparagus farming, the younger generation crossed back and forth between China and America, pursuing proper education, good careers, and a meaningful life during a difficult period of time for Chinese Americans. When social instability in China and hostile racial environment in America prevented the family from being rooted in either side of the Pacific, transnational family life became a focal point of their social existence. This well-documented and illustrated family history makes it clear that, for many Chinese immigrant families, migration does not mean a break from the past but the beginning of a new life that incorporates and transcends dual national boundaries. It convincingly shows how transnationalism has become a way of life for Chinese American families.

Examines three decades of data on the relationship between women's labor market activity and the income mobility of families that lose a spouse through death, divorce, or separation. Wives' labor market activity acts as partial insurance for women and their families against the negative economic consequences of marital dissolution. However, while women who lose their husbands increase their earnings significantly, the number of upwardly mobile families is quite small, and a majority of families actually move down. In addition, they do less well in successive decades. These findings imply that U.S. social and economic policies currently leave considerable gaps in insurance for families in the event of marital dissolution. Tables and graphs.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues,

sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

AN INSIGHTFUL, EFFECTIVE, AND CONTEMPORARY APPROACH TO ADDICTION TREATMENT FOR THOSE WHO ARE IMPACTED BY THE JUSTICE SYSTEM In the newly revised second edition of *Helping Men Recover: A Program for Treating Addiction, Special Edition for Use in the Justice System*, a team of experts delivers a practical and straightforward framework to assist men struggling with substance use disorders. Targeting the four areas most consistently identified by men as triggering relapse—the self, sexuality, spirituality, and relationships—this therapeutic program has twenty-one sessions and explores topics like self-awareness and identity, the impact of family, abuse and trauma, communication, male socialization, and many more. Readers will also find: Three additional sessions with new exercises Comprehensive strategies for the creation of safe spaces in which men will feel comfortable expressing themselves, reflecting, and learning Information about how men experience and recover from addictions and trauma Ways to develop and learn teach the skills men need to maintain and sustain recovery from substance use disorders and live the life they want to live An indispensable collection of exercises and other resources for men in the criminal justice system who are struggling with substance misuse. *Helping Men Recover* belongs on the bookshelves of social workers, clinicians, and other correctional system professionals.

Overcoming Their Hurtful Legacy and Reclaiming Your Life

Based on the principles in the bestselling *Torn Asunder*—a book that has helped thousands of people survive infidelity—this revised and expanded workbook offers five crucial services for hurting couples: Stabilizes the marriage in the initial crisis Provides structure for the emotionally volatile environment Brings closure to the "old" marriage—the marriage prior to the affair Establishes skills necessary for the "new" marriage pattern Answers the questions: How could you do this to me? Why did you do it? The *Torn Asunder* workbook is built around daily twenty-minute homework exercises, initiated by each spouse on alternating days for ten to fifteen weeks. Working with your spouse might be the last thing you want to do right now, but it's essential to your long-term recovery, whether or not your marriage survives. Healing won't be easy. But the *Torn Asunder* workbook provides hope, encouragement, and practical advice for the journey. Take the first step today.

First published in 1993. Routledge is an imprint of Taylor & Francis, an informa company.

"The Use of Self in Therapy, Third Edition challenges the well-known concepts of transference and countertransference by positing that the presence of the therapist introduces a potential healing element that is usually not sufficiently appreciated, understood, or utilized. For psychologists, social workers, counselors, and students, this new edition features updated chapters and new chapters that discuss the use of multiculturalism in practice and the differential use of self by therapists following personal trauma. In the years since the previous edition, the rapid development of the Internet has brought with it changes that impact on therapy and the self of the therapist"--

To be human is to be in relationships. We can't survive without them but it's in relationships that we can so easily get unravelled. Some relationships just seem to do us in. Either we feel like we lose ourselves or feel burnt out from futile efforts to make things right for another. In our relationships we can experience the very best of ourselves and the very worst. The message of Growing Yourself Up is that you can't separate understanding the individual from understanding relationships. All of life's relationships are integral to increasing self-awareness and maturity. And it's not necessarily the comfortable relationships that promote personal growth. In this 2nd edition of the bestselling book, Jenny examines how to help others without fostering dependency, and how to determine what kind of help you or others want from therapists. This is in response to the many lay and professional people who have found this book valuable personally and want to know how to help others grow. Drawing from Bowen family systems theory, the book takes you on a journey through each stage of life to see predictable patterns of relationships and to show how to use this knowledge to make purposeful adjustments in yourself; as well as lending a mature helping hand to others. The result is a sturdier self, sturdier relationships and a refreshing new way to view life's challenges and opportunities.

Encyclopedia of Mental Health, Second Edition, tackles the subject of mental health, arguably one of the biggest issues facing modern society. The book presents a comprehensive overview of the many genetic, neurological, social, and psychological factors that affect mental health, also describing the impact of mental health on the individual and society, and illustrating the factors that aid positive mental health. The book contains 245 peer-reviewed articles written by more than 250 expert authors and provides essential material on assessment, theories of personality, specific disorders, therapies, forensic issues, ethics, and cross-cultural and sociological aspects. Both professionals and libraries will find this timely work indispensable. Provides fully

up-to-date descriptions of the neurological, social, genetic, and psychological factors that affect the individual and society
Contains more than 240 articles written by domain experts in the field
Written in an accessible style using terms that an educated layperson can understand
Of interest to public as well as research libraries with coverage of many important topics, including marital health, divorce, couples therapy, fathers, child custody, day care and day care providers, extended families, and family therapy

Integrative, research-based, multisystemic: these words reflect not only the state of family therapy, but the nature of this comprehensive handbook as well. The contributors, all well-recognized names who have contributed extensively to the field, accept and embrace the tensions that emerge when integrating theoretical perspectives and science in clinical settings to document the current evolution of couples and family therapy, practice, and research. Each individual chapter contribution is organized around a central theme: that the integration of theory, clinical wisdom, and practical and meaningful research produce the best understanding of couple and family relationships, and the best treatment options. The handbook contains five parts: • Part I describes the history of the field and its current core theoretical constructs • Part II analyzes the theories that form the foundation of couple and family therapy, chosen because they best represent the broad range of schools of practice in the field • Part III provides the best examples of approaches that illustrate how clinical models can be theoretically integrative, evidence-based, and clinically responsive • Part IV summarizes evidence and provides useful findings relevant for research and practice • Part V looks at the application of couple and family interventions that are based on emerging clinical needs, such as divorce and working in medical settings. Handbook of Family Therapy illuminates the threads that are common to family therapies and gives voice to the range of perspectives that are possible. Practitioners, researchers, and students need to have this handbook on their shelves, both to help look back on our past and to usher in the next evolution in family therapy. Based on the public television series of the same name, Bradshaw On: The Family is John Bradshaw's seminal work on the dynamics of families that has sold more than a million copies since its original publication in 1988. Within its pages, you will discover the cause of emotionally impaired families. You will learn how unhealthy rules of behavior are passed down from parents to children, and the destructive effect this process has on our society. Using the latest family research and recovery material in this new edition, Bradshaw also explores the individual in both a family and societal setting. He shows you ways to escape the tyranny of family-reinforced behavior traps--from addiction and co-dependency to loss of will and denial--and demonstrates how to make conscious choices that will transform your life and the lives of your loved ones. He helps you heal yourself and then, using what you have learned helps you heal your family. Finally, Bradshaw extends this idea to our society: by returning yourself and your family to emotional health, you can heal the world in which you live. He helps you reenvision societal conflicts from the perspective of a global family, and shares with you the power of deep democracy: how the choices you make every day can affect--and improve--your world.

This book looks at the roots of a global visual news culture: the trade in illustrations of the news between European illustrated

newspapers in the mid-nineteenth century. In the age of nationalism, we might suspect these publications to be filled with nationally produced content, supporting a national imagined community. However, the large-scale transnational trade in illustrations, which this book uncovers, points out that nineteenth-century news consumers already looked at the same world. By exchanging images, European illustrated newspapers provided them with a shared, transnational, experience.
