Planning algorithms are impacting technical disciplines and industries around the world, including robotics, computer-aided design, manufacturing, computer graphics, aerospace applications, drug design, and protein folding. This coherent and comprehensive book unifies material from several sources, including robotics, control theory, artificial intelligence, and algorithms. The treatment is centered on robot motion planning, but integrates material on planning in discrete spaces. A major part of the book is devoted to planning under uncertainty, including decision theory, Markov decision processes, and information spaces, which are the 'configuration spaces' of all sensor-based planning problems. The last part of the book delves into planning under differential constraints that arise when automating the motions of virtually any mechanical system. This text and reference is intended for students, engineers, and researchers in robotics, artificial intelligence, and control theory as well as computer graphics, algorithms, and computational biology.

"A masterpiece....Fowles is the only writer in English who has the power, range, knowledge, and wisdom of a Tolstoy or James" (John Gardner, Saturday Review). Daniel Martin's eponymous protagonist returns to England after a sojourn in Hollywood -- and sets out to rectify the sins and omissions of his past.

Fully revised new edition presenting undergraduates with latest information in obstetrics. Presented in bullet format with self assessment exercises concluding each chapter. Previous edition published in 2007.

India's Family Planning Programme Policies, practices and challenges Routledge

This volume fills a major gap in the evidence base on adolescents and youth in India by bringing together research, policy critiques and programme analyses in an intersectoral and multidisciplinary way. With about 373 million persons between the ages of 10 and 24 years, India has the largest number of young people of any country in the world. While this large cohort presents an excellent opportunity to reap a rich demographic dividend, their potential can be realised only with intelligent investments, which create well nourished, healthy, appropriately educated and skilled youth. This volume is based on desk reviews and is complemented by discussions with experts in 4 key thematic areas: nutrition, sexual and reproductive health, mental health and livelihoods, overall focusing on the health and wellbeing of the young in India. Each chapter provides a comprehensive picture of the current situation in a focal theme and identifies significant gaps in information/data and programmes. In addition, it explores the scenario of building capacity for undertaking research on, and with adolescents, through a qualitative needs assessment. This timely volume provides a thorough overview of related research, policy and programmes for a wide group of social and behavioural scientists and public health experts interested in India's young people.

Innovations in Family Planning

Culture, Gender and Entrepreneurial Innovation (UM Press)

The Corporate Lobbyist

The book examines three issues in entrepreneurship that are often overlooked yet powerful when taken together. The first is the way people learn gender roles and how this in turn affects their entrepreneurial behavior. The second are differences between two major population groups in Malaysia, the Malays and the Chinese, specifically in terms of their respective levels of societal masculinity. The third is entrepreneurial innovation. By combining these topics and examining how they apply to a sample of Malaysian women entrepreneurs, the author produces genuinely new, insightful and occasionally counter-intuitive findings such as Malay women entrepreneurs' lower level of uncertainty avoidance compared to Chinese women entrepreneurs. Another intriguing discovery is her radical overhaul of the construct of ego orientation, which gives a new angle on the old idea of entrepreneurs as people who are different from the rest of us. In all, the study poses some challenges to long-standing but infrequently tested ideas about the nature of entrepreneurs and their behavior.

Smart Computational Intelligence in Biomedical and Health Informatics presents state-of-the-art innovations; research, design, and implementation of methodological and algorithmic solutions to data processing problems, including analysis of evolving trends in health informatics and computer-aided diagnosis. This book describes practical, applications-led research regarding the use of methods and devices in clinical diagnosis, disease prevention, and patient monitoring and management. It also covers simulation and modeling, measurement and control, analysis, information extraction and monitoring of physiological data in clinical medicine and the biological sciences. FEATURES Covers evolutionary approaches to solve optimization problems in biomedical engineering Discusses IoT, Cloud computing, and data analytics in healthcare informatics Provides computational intelligence-based solution for diagnosis of diseases Reviews modelling and simulations in designing of biomedical equipment Promotes machine learning-based

approaches to improvements in biomedical engineering problems This book is for researchers, graduate students in healthcare, biomedical engineers, and those interested in health informatics, computational intelligence, and machine learning.

The Population Myth reveals how the right-wing spin to population data has given rise to myths about the 'Muslim rate of growth', often used to stoke majoritarian fears of a demographic skew. The author, S.Y. Quraishi, uses facts to demolish these, and demonstrates how a planned population is in the interest of all communities. The book delves into the Quran and the Hadith to show how Islam might have been one of the first religions in the world to actually advocate smaller families, which is why several Islamic nations today have population policies in place. This busts the other myth - that Muslims shun family planning on religious grounds. Based on impeccable research, this is an important book from a credible voice about the politicization of demographics in India today.

A CANDLE IN THE WIND focuses on the prominence of the new women working for the Corporate India of 2013. Breaking traditions they have learnt the ropes of pushing through tenders/contracts in a nation cursed for its political corruption and bureaucratic red-tape. Contrary to stereotypes, some who have even surprised the West's perception of women in business, have stormed the male bastion in reading minds with sharp acumen and winning over covert deals for their customers with alacrity and temerity, quite often, at risk to themselves and their family. The 40-year old corporate lobbyist, US/UK educated, wife to a cardiologist and mother of two teen-aged children, based in New Delhi, JSK as she is popularly known, an adept at multi-tasking, balances her official work with that of her family obligations, amidst the venal business climate of a country turning the corner to become a world leader. JSK is seen to be always on the move from East to West, in the corridors of power, putting her feminine wiles to best use. Her life has been like the candle in the open space flickering bright to provide light to many, while always at peril to the fluctuating moods of the wind.

Pratiyogita Darpan (monthly magazine) is India's largest read General Knowledge and Current Affairs Magazine. Pratiyogita Darpan (English monthly magazine) is known for quality content on General Knowledge and Current Affairs. Topics ranging from national and international news/ issues, personality development, interviews of examination toppers, articles/ write-up on topics like career, economy, history, public administration, geography, polity, social, environment, scientific, legal etc, solved papers of various examinations, Essay and debate contest, Quiz and knowledge testing features are covered every month in this magazine.

This book closely examines the changes, challenges and shifts in India's family planning programme since its inception in 1952. It discusses the dynamics of population growth, the demographic dividend, family planning and its impact on maternal and child health, and the pressures from various quarters to remove method-specific contraceptive targets from the programme. The volume highlights the shortcomings in the delivery of services by the public sector and the critical role of non-government organisations in research, promotion and advocacy. Rich in empirical data, this book will be an indispensable

resource for scholars, policymakers, organisations and NGOs concerned with population and demographic studies. It will also interest those in sociology, public policy and public health.

The presented book BPSC Bihar Public Service Commission General Studies Preliminary Examination is very much useful for the competitive examinations of the aspirant who are preparing for upcoming BPSC examinations. The book carries ample amount question papers arranged in a reverse chronological manner. In this book all the study matters are provided as per the latest syllabus of BPSC. The book is divided in 12 parts. All solutions are written in easy to understand language with the aim of providing conceptual clarity.

A compendium of successful case studies of FAMILY PLANNING implementation in India This is the first book on innovations in family planning service delivery in the country which is of particular contemporary relevance, both nationally and globally. It features innovative case studies of family planning from India which have demonstrated impact and are sustainable and scalable. These cases contribute to the approaches of problem solving, enhancing quality family planning care at the grass-roots level and influence future directions of the programme. The book facilitates advocacy, strengthening programme design and enhancing competency as well as orienting the healthcare system to support these efforts. This is an important book for programme planners, policy makers and researchers.

In 2002 the International Labour Organization issued a report titled 'Decent work and the informal economy' in which it stressed the need to ensure appropriate employment and income, rights at work, and effective social protection in informal economic activities. Such a call by the ILO is urgent in the context of countries such as India, where the majority of workers are engaged in informal economic activities, and where expansion of informal economic activities is coupled with deteriorating working conditions and living standards. This book explores the informal economic activity of India as a case study to examine typical requirements in the work-lives of informal workers, and to develop a means to institutionalise the promotion of these requirements through labour law. Drawing upon Amartya Sen's theoretical outlook, the book considers whether a capability approach to human development may be able to promote recognition and work-life conditions of a specific category of informal workers in India by integrating specific informal workers within a social dialogue framework along with a range of other social partners including state and non-state institutions. While examining the viability of a human development based labour law in an Indian context, the book also indicates how the proposals put forth in the book may be relevant for informal workers in other developing countries. This research monograph will be of great interest to scholars of labour law, informal work and workers, law and development, social justice, and labour studies.

India is the top provider of surrogacy services in the world, with a multi-million dollar surrogacy industry that continues to grow exponentially, as increasing numbers of couples from developed nations look for wombs in which to grow their babies. Some scholars have exulted transnational surrogacy for the possibilities it opens for infertile couples, while others have offered bioethical cautionary tales, rebuked exploitative intended parents, or lamented the exploitation of surrogate mothers—but very little is known about the experience of and transaction between surrogate mothers and intended parents outside the lens of the many agencies that control surrogacy in India. Drawing from rich interviews with surrogate mothers and egg donors in Bangalore, as well as twenty straight and gay couples in the U.S. and Australia, Discounted Life focuses on the processes of social and market exchange in transnational surrogacy. Sharmila Rudrappa interrogates the creation and maintenance of reproductive labor markets, the function of agencies and surrogacy brokers, and how women become surrogate mothers. Is surrogacy solely a labor contract for which the surrogate mother receives wages, or do its meanings and import exceed the confines of the market? Rudrappa argues that this reproductive industry is organized to control and disempower women workers and yet her interviews reveal that, by and large, the surrogate mothers in Bangalore found the experience life affirming. Rudrappa explores this tension, and the lived realities of many surrogate mothers whose deepening bodily commodification is paradoxically experienced as a revitalizing life development. A detailed and moving study, Discounted Life delineates how local labor markets intertwine with global reproduction industries, how Bangalore's surrogate mothers make sense of their participation in

reproductive assembly lines, and the remarkable ways in which they negotiate positions of power for themselves in progressively untenable socio-economic conditions.
