The Tang dynasty, lasting from 618 to 907, was the high point of medieval Chinese history, for its unprecedented achievements in governmental organization, economic and territorial expansion, literature, the arts, and religion. Many Tang practices continued, with various developments, to influence Chinese society for the next thousand years. For these and other reasons the Tang is a key focus of Western sinologists. This volume presents English-language reprints of fifty-seven critical studies of the Tang, in the three general categories of political history, literature and art history, and religion. The articles and book chapters included here are important scholarly benchmarks that will serve as the starting-point for anyone interested in the study of medieval China. It's clear that FICO is one of the most important areas in SAP--and finding answers can be difficult. This guide is helpful in assessing FICO skills and evaluating candidates for a job.

Published in 1968: While giving a lucid account of the functions and difficulties of the office of Principal Secretary, the author shows clearly how the retention of this position was a characteristic example of the English habit of clinging to old forms in political matters long after these forms have ceased to bear any relationship to reality. Originally a clerk in the King's private household and writer of his letters, by the end of the seventeenth century the position had become a political office, second only in importance to that of Lord High Treasurer.

It is commonly assumed that the Counter-Reformation touched Spain only lightly, affecting the religious institutions but not the ordinary Spaniards. Henry Kamen now challenges this view by providing an intimate look at what life was like in one small but distinctive rural Spanish community from the mid-sixteenth to mid-seventeenth centuries. By examining the Catalan village of Mediona as a microcosm of Spanish society, Kamen shows that in fact the Counter Reformation led to powerful changes in the daily lives, beliefs, and customs of the common people of Catalonia and Spain. Kamen portrays the popular culture of Mediona, studying the shifting habits revealed by its administrative reforms during the Counter Reformation; the place of religious belief within the community; the attempts to change popular festivities and celebrations; the far-reaching innovations in marriage and sexuality; the role of the Inquisition and of the Jesuits; the problem of witchcraft, and the impact of books from the expanding presses of France, Italy, and the Netherlands on local language and ideas. Kamen concludes that the Counter Reformation was in some instances liberating rather than repressive in Mediona and the broader Mediterranean society of which it was part. By contemplating popular religion and culture as it was practiced by ordinary citizens, he offers new insights into an epoch normally studied only in the light of great political events, and he presents a wholly original vision of culture and society in Spain's Golden Age.

The Folly of the Cross is the fourth book in Richard Viladesau's series examining the aesthetics and theology of the cross through Christian history. Previous volumes have brought the story up through the Baroque era. This new book examines the reception of the message of the cross from the European Enlightenment to the turn of the twentieth century. The opening chapters set the stage in the transition from the Baroque to the Classical eras, describing the changing intellectual and cultural paradigms of the time. Viladesau examines

the theology of the cross in the eighteenth and nineteenth centuries, and the aesthetic mediation of the cross in music and the visual arts. He shows how in the post-Enlightenment era the aesthetic treatment of the cross widely replaced the dogmatic treatment, and how this thought was translated into popular spirituality, piety, and devotion. The Folly of the Cross shows how classical theology responded to the critiques of modern science, history, Biblical scholarship, and philosophy, and how both classical and modern theology served as the occasions for new forms of representation of Christ's passion in the arts and music.

The studies in this volume mark a new phase in the development of scholarship on Sufi traditions of Central Asia, expanding and deepening the source base, reconceptualizing basic frameworks for understanding Sufi history, and challenging received assumptions and narratives.

Over the past twenty-five years - since the very large collection of Newton's papers became available and began to be seriously examined - the beginnings of a new picture of Newton has emerged. Practical Guide to SAP CO-PC (Product Cost Controlling)

The Teaching of Jesus

The Religious Polemics of the Muslims of Late Medieval Christian Iberia examines the corpus of polemical literature against the Christians and the Jews of the protected Muslims (Mudejars) preserved in Arabic and in Aljamiado (Spanish in Arabic characters).

Because of its complex integration, Product Cost Controlling (CO-PC) is often regarded as the most challenging module in SAP ERP. In this book, you will learn the most important concepts, business processes, and configuration settings. By concentrating only on the essentials, this book will quickly enable you to use it as a supplementary reference guide for implementing or supporting SAP CO-PC. Screenshots of transactions and configuration are included to illustrate written content. This book also dives into CO-PC integration details with other modules and tips on how to properly configure and implement a highly integrated sub-module. This complete and simplified guide to configuration and business processes for SAP Product Costing covers: * Introduction to Value Flows in SAP Controlling * Step-by-Step Examples * Configuration for Product Costing * Detailed Month End Closing Processes

Greek women routinely wore the veil. That is the unexpected finding of this meticulous study, one with interesting implications for the origins of Western civilisation. The Greeks, popularly (and rightly) credited with the invention of civic openness, are revealed as also part of a more Eastern tradition of seclusion. Llewellyn-Jones' work proceeds from literary and, notably, from iconographic evidence. In sculpture and vase painting it demonstrates the presence of the veil, often covering the head, but also more unobtrusively folded back onto the shoulders. This discreet fashion not only gave a privileged view of the face to the ancient art consumer, but also, incidentally, allowed the veil to escape the notice of traditional modern scholarship. From Greek literary sources, the author shows that full veiling of the head and face was commonplace. He analyses the elaborate Greek vocabulary for veiling and explores what the veil meant to achieve. He shows that the veil was a conscious extension of the house and was often referred to as 'tegidion', literally 'a little roof'. Veiling was thus an ingenious compromise; it allowed women to circulate in public while maintaining the ideal of a house-bound existence. Alert to the different types of veil used, the author uses Greek and more modern evidence (mostly from the Arab world) to show how women could exploit and subvert the veil as a means of eloquent, sometimes emotional, communication. First published in 2003 and reissued as a paperback in 2010, Llewellyn-Jones' book has established itself as a central - and inspiring - text for the study of ancient women.
