While some of the stories actually are about cars found in barns or sheds, author Wyss has taken the liberty of expanding the definition of "barn find" to include any collector car found derelict, ignored, in pieces, or generally found in circumstances belying its stature. This could include

cars parked in fields, found in cellars, left in parking garages, or even found under a pile of cars in a junkyard. What the cars do have in common is that they are valuable and exotic and have histories chock full of unimaginable twists and turns. Take, for instance the Two Rotor Corvette, a car that cost GM \$2 million to build and then they flat gave it away to the first guy that asked. Same thing for a GT40 roadster, one of four built, and

Ford goes and hands the keys to a movie car customizer who kept it for decades and never quite got it up on the big screen. That car today is worth \$4 million. So, if you're into collector cars and love the thrill of the hunt, then you'll truly appreciate the 50 stories Wyss has selected for this first in the series.

Sweden's answer to Germany's people's car arrived some 20 years earlier, and quickly paved the way for safe and dependable vehicles. This book chronicles the evolution of the Volvo estate car, with every model featured. Whether you are a Volvo lover or just have a general interest in cars, this book offers an informative and interesting look into a car that has had very little media coverage, despite its vast global sales success and the affection with which it is held by so many.

Named after Elisa, the granddaughter of Lotus's owner at the time, Romano Artioli of Bugatti fame, the Lotus Elise was launched at the Frankfurt Show in 1995. In the subsequent twenty-five years it has not only established itself as the embodiment of what Lotus stands for, it retains a unique place in the international sports car market. No other manufacturer came up with a car to seriously rival the Elise, nor the Exige, in terms of handling dexterity on both road and racetrack, and it aptly characterizes the definition of a sports car. Written in

Johnny Tipler's inimitable style this book includes a detailed evolution of the Elise and Exige, including full specification tables; interviews with key individuals involved in their design and development, including Richard Rackham, Gavan Kershaw, Neil Thomas, Russell Carr, Barney Hatt and Andy Pleavin; Elisa Artioli on her namesake, its past and future; motor sport adaptations and successes and finally, driving experiences on road and track. The production of the Elise and Exige was sustained through four corporate upheavals. Now in Geely ownership, the future for Lotus looks bright.

The Group B cars marked one of the most thrilling yet most tragic periods in the history of world rallying and beyond. The 037, the S4, the EVC and the ECV2, "ephemeral player" of a still-born Group S, were the unforgettable protagonists of the 1982-1986 seasons that for the Lancia marque were constellated by a series of World, European and Italian titles, but also by terrible accidents that cost the lives of Attilio Bettega, Henri Toivonen and Sergio Cresto. Sergio Remondino, a

This invaluable book is completed by the evocative images of Reinhard Klein, one of the most successful rallying photographers.

In deciding which models to choose for inclusion in this book selected from Fiat's huge inventory, the author concentrated on three criteria - greatness, size and emotion. Where size is an easy parameter to qualify, greatness is more complicated because it is a combination of of both the manufacturer's and the public's opinion. A car that is highly regarded by the public may not have been a commercial success and vice verse. A truly great car is one that works well for

Bookmark File PDF Fiat And Abarth 124 Spider And Coupe Inneu

both parties. Emotion may be considered to be an element of greatness in that the public's 'love' for a car is a fantastic benefit for a manufacturer and must be treasured. Fiat have made the mistake of 'improving' an icon on several occasions only to find that public opinion went against them. Fortunately Fiat has been magnanimous enough to respond by giving the car buying public more of what it wants. As long as they continue to do so then Fiat's reputation as the world's greatest small car manufacturer is set to continue. The author chose the Topolino as the starting point as the car fulfils all the criteria and it was the first Fiat built in the late 1930s to satisfy the Italian public's new-found desire

for mobilisation. The old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost. These principals continued via a succession of models which include the 500, 850, 126, 127 through to more recent models like the Cinquecento and Seicento. Running in parallel with these 'cheeky' Fiats, this book covers a range of slightly larger cars that were built in huge numbers. Though rather staid in appearance, the 1950s Millecento was family transport for millions of Italians covering three decades, four when the Indian-built cars are included. Similarly the 128,

This portfolio covers one of Fiat's iconic cars, the Pininfarina-designed 124 Spider. Production started in 1966 at which time Fiat also introduced the Coupe. The sixties was a great time for sports cars with the 124 Spider competing with Alfa Romeo Spider, MGB, Triumph TR4 and 5 and the Datsun Fairlady. As the years rolled on by - the Spider would remain in production for almost two decades - Fiat kept up a program of continual improvements that involved regular engine capacity increases to 1608cc, then to 1756cc and

Bookmark File PDF Fiat And Abarth 124 Spider And Coupe Inneu

finally to 1995cc. Along the way there were only minor cosmetic changes to the styling of the 124 Spider - it remained as pure a design as any during a time of some turmoil in the world's automobile industry and production ended in 1985.

The 124 Spider was based on a shortened Fiat 124 floorpan and never officially imported into Britain. It could have been a rival to the MGB and with a production run of 190,000 came close to matching the Abingdon total. In 1974 it was produced exclusively for the American market. In 1979 it became known as
