The Army Cadet Force is a youth organisation sponsored by the UK's Ministry of Defence. It instils all the best core values of Her Majesty's Forces into young people - so as to enable them to live better and more fulfilling lives. This is achieved by means of fantastic training packages that include adventure training, military skills such as shooting and field craft, first aid and even foreign travel. In an era when the youth of today are so often seen as out of control and lacking direction, Mike Ryan presents a study of an organisation that seeks to provide key skills to its members, 30% of whom go on to join the armed forces. This book honours these young people who are a credit to our country, and yet seldom get recognition for their achievements. In this respect - its praise for our young people, whatever their background - if in nothing else, The Army Cadet Force is a rare delight!

A gripping account of PTSD, and a stark reminder that, for many, wars go on long after the last shot is fired. In the shadows of army life is a world where friends become monsters, where kindness twists into assault, and where self-loathing and despair become constant companions. Whether you know it by old names like "soldier's heart," "shell shock," or "combat fatigue," post-traumatic stress disorder has left deep and silent wounds throughout history in the ranks of fighting forces. Among the Walking Wounded tells one veteran's experience of PTSD through an intimate personal account, as visceral as it is blunt. In a courageous story of descent and triumph, it tackles the stigma of PTSD head-on and brings an enduring message of struggle and hope for wounded Canadian veterans. This book is a must-read for anyone who cares about Canadian veterans and the dark war they face long after their combat service is ended.

Jonathan Fennell captures for the first time the true wartime experience of the ordinary soldiers from across the empire who made up the British and Commonwealth armies. He analyses why the great battles were won and lost and how the men that fought went on to change the world. In 1943, General Harry Crerar noted that there was still much confusion as to "what constitutes an 'Officer.'" His words reflected the preoccupation of army officials with inventing an ideal officer who would not only meet the demands of war but also conform to notions of social class and masculinity. Drawing on a wide range of sources and exploring the issue of leadership through new lenses, this book looks at how the army selected and trained its junior officers to embody the new ideal. It also sheds light on the challenges these officers faced during the war - not only on the battlefield but from Canadians' often conflicted views about social class and gender.

In August 1914, on the outbreak of the First World War, there was enormous pressure on men to enlist in Kitchener's New Armies, supplementing the tiny regular army and Territorial Force. This pressure was intense, and posters, the entreaties of local worthies, and an apparently indiscriminate scattering of white feathers, all exacerbated masculine sensitivity. We are all familiar, if only through BBC TV's 'Dad's Army', with the Home Guard of the Second World War. Far less is known of their First World War equivalent: the Volunteer Training Corps (VTC). Like their counter-parts in WW2, the VTC comprised those who were too old, too young, too unfit or too indispensable to serve in the regular forces. They fought for the right to be armed, uniformed and trained; to be employed on meaningful duties; and at first, to exist at all. This book explores the origins, development and structure of the VTC, along with those who belonged to the many supporting medical, transport, police and youth organisations who kept the home fires burning or, in some cases, tried to put them out. The VTC arose from the need of those men who were forced to stay at home to be seen to be doing their bit. They saw the removal of the bulk of both the regular army and the Territorial Force to the Western Front as their opportunity to prepare to resist the expected German invasion of Britain, and as a way of countering accusations of shirking, or even cowardice.

Among the Walking Wounded

Churchill's 21st birthday and baptism of fire both took place in Cuba in 1895. This was the year he went on his first international adventure, wrote his first military and political analyses and engaged in his first dicey diplomatic mission. Finding his footing as a journalist, and indeed a war correspondent, he also became the centre of controversy in the American and British press and, while shamelessly exploiting his connections and developing the famous 'Churchill style' became known as a public figure in his own right. Attention has previously focused on Churchill's Indian frontier and Boer War experience as the most formative moments in his youth. But now, with original research through untapped access to Spanish and Cuban archives and interviews, this book shows that his much earlier Cuban trip was really the moment when he 'came of age' and started down the path to become a man to be remembered throughout history.

Paul Baker has experienced many ups and downs in his life, but it's how he dealt with these moments and learned from them that really sets his story apart. He is accustomed to failure, having learned how to turn negative experiences into positive outcomes, and he continues to remain focused on his ambitions by continually setting himself new goals. Covering themes such as ambition, determination, and the importance of mindset and exercise when it comes to personal growth, Finding Fame illustrates Paul's drive to constantly improve both himself and his life. Paul has enjoyed many major milestones over the years, from being awarded the Kyokushinkai Karate black belt at just age 16 to serving with the British Army, a career that led him all over the world to places like Belize and the Falkland Islands. This book showcases how important it is to fail in life – to get knocked down but then to rise up again, stronger and wiser and ready for the next obstacle. His martial arts background and army training taught Paul the importance of discipline and resilience, traits he took with him and used in all other areas of his life. Underlining everything he does is his knowledge of how your mindset can set you up for success, and the understanding that bad experiences aren't ultimately bad, as they can teach you the tools and techniques you need to navigate through the challenges of life. Paul also understands the power of setting goals in life, and in being ambitious with those goals. Without a clear, set plan, you won't know which direction to go in – which path to take – and, even if you end up going down a path you hadn't previously considered, you simply have to take that first step. What you learn along the way is often far more important than the destination you initially had in mind. Paul acknowledges the

impact his environment had on him when he was younger, from his home life to his schooldays and his extracurricular activities. He attributes his positive growth mindset to several people from his youth: his parents, his middle school teacher, and his martial arts instructors. These individuals moulded who he was as a person and encouraged him to view circumstances and obstacles from a different perspective; by shifting his mindset, he opened himself up to all the wonderful opportunities this world has to offer. Exercise is another key theme in the book; Paul looks at how it's helped him physically and mentally. As he says, the earlier you start physical activity, the faster the payback – in all areas of your life. Not only does exercise improve your health and help with weight loss, but it also encourages a happier, more positive mindset, increases your energy levels, and gives you the confidence required to go after what you really want. Without exercise, Paul simply would not have accomplished everything he's achieved in his life so far. Finding Fame also looks at the music and world events that shaped Paul's adolescence as he grew up in the '80s, as well as his fitness victories – including the time he climbed Mont Blanc, a personal challenge he set himself to celebrate his 40th birthday. This book is an excellent example of how mindset is everything, how failure is a learning experience, and that – in order to keep growing as a person – you simply must carry on, no matter what. Finding Fame will give you the knowledge, motivation, and inspiration you need to identify your goals and go after what you really want in life.

For 13-year-old Cairns high school student, Willy Williams, life is not going smoothly. He has developed a passionate interest in girls, particularly the beautiful and mysterious Petra. But Willy is also bedevilled by temptation and is torn between his desire for Petra, admiration for red-head Barbara, and hopeful lust for Marjorie, his best friend's sister. Were the makeshift rockets and drone really good ideas? Willy is also fascinated in all things that fly and is an avid model aircraft hobbyist. As a First-Year member of the Australian Air Force Cadets, his dream is to one day become a pilot in the RAAF. But even as an Air Cadet he has enemies and challenges. But when a major crisis happens, his skills at piloting radio-controlled model aircraft is vital. Will his model of the Red Baron's triplane bring him rewards or end his cadet career in disgrace?

In this study, the author traces the reasons for the British Army's tactical weakness in Normandy to flaws in its training in Britain. The armour suffered from failures of experience. Disagreements between General Montgomery and the War Office exacerbated matters.

THE SNIPER S STORY will tell for the first time the truth about one of Britain s most bizarre and chilling crimes, as well as examining in depth, that age old question; Are Some People Born To Kill?

The unbelievable account of life as a hitman from a man who has been doing it for decades Hitmen commit heinous crimes virtually every day of the week and, in most instances, we don't even realize. He's been a killer for hire for more than twenty years

now, but life as a fulltime professional assassin has never been easy. There have been close calls, failed attempts and a lot of looking over his shoulder. And now, he has decided to come clean and seek atonement for his life as a murderer and one of the most covertly dangerous men alive. An account of a life lived between our world and a shadowy underworld of criminals, a life lived under the radar of the law, a life lived in death. This is the true story of a hitman.

'His book reads as an inspirational text (Emmanuel is an altruistic entrepreneur and activist who started his first charity as a teenager), and a rousing heartfelt testimony in which self-love trumps self-loathing ... his graceful book fulfils its humble ambition to act as "a guide to recognising the nightmare - and a blueprint for dreaming your way out of it." OBSERVER 'A moving and powerful memoir.' THE BRITISH BLACK LIST 'Both personal and political, weaving tales of his own life with advice for other young people and a call for everyone to do their part in creating an equal society ... Emmanuel is a great communicator; he writes and speaks with confidence. It's easy to see how, from such a young age, he has been able to engage people on the issues he wants to tackle.' EVENING STANDARD _____ I wanted to change the world, but the world I was born into changed me first. My name is Jeremiah Emmanuel. I'm twenty one years old. I'm an activist, an entrepreneur, a former deputy young mayor of Lambeth and member of the UK Youth Parliament. Raised in south London, I lived in an area where crime and poverty were everywhere and opportunities to escape were rare. Violence was accepted, prison was expected. That was the world I knew; the only one I thought was possible for people like me. Then I discovered another world, one with opportunities round every corner. As I grew my network, I realised that the system actively works against certain members of society, silently preventing people from succeeding. I made it my mission to change this, and to teach people like me about the secret rules of society that empower some to get ahead and keep others down. This is my story of how I made it, and how others can too. Memoir meets manifesto, Dreaming in a Nightmare is a powerful account of the challenges faced by a new generation and how readers can rally to create change.

Since the 1860s hundreds of thousands of school-aged Australians have undergone military and youth development training in various army cadet schemes. Given the proportion of eligible youth this represents, the movement has surely exerted a tangible and lasting influence upon Australian society, yet its record is small, scattered and insufficient. Specifically lacking is any attempt to tell the cadet story across both time and space in a single narrative. This book closes the gap by presenting a general history of the army cadet movement in Australia from 1866 to 2006.

OVER 100 APPROVED BRITISH ARMY CHALLENGES

Among students of military history, the genius of Field Marshal Erich von Manstein (1887-1973) is respected perhaps more than that of any other World War II soldier. He displayed his strategic brilliance in such campaigns as the invasion of Poland, the Blitzkrieg of France, the sieges of Sevastopol, Leningrad, and Stalingrad, and the battles of Kharkov and Kursk. Manstein also stands as one of the war's most enigmatic and controversial figures. To some, he was a leading proponent of the Nazi regime and a symbol of the moral corruption of the Wehrmacht. Yet he also disobeyed Hitler, who dismissed his leading Field Marshal over this incident, and has been suspected by some of conspiring against the Führer. Sentenced to eighteen years by a British war tribunal at Hamburg in 1949, Manstein was released in 1953 and went on to advise the West German government in founding its new army within NATO. Military historian and strategist Mungo Melvin combines his research in German military archives and battlefield records with unprecedented access to family archives to get to the truth of Manstein's life and deliver this definitive biography of the man and his career.

"This is a brilliant account of how leadership is made." - Andy McNab This is the true story of 21 young men desperately trying to survive the most brutal leadership course of modern times. A throw back to the Highland Fieldcraft Training Center, the revolutionary brain child of Lord Rowallan during the Second World War, this fascinating insight explains the extraordinary lengths Sandhurst goes to in pursuit of generating the world's greatest military leaders. No one could have known that the intensity of their training was coincidentally little more than a prelude to a decade of war in Afghanistan and Iraq where attrition rates became comparable to those reached during the Second World War. This captivating story is full of emotion brought on by physical and mental endeavor that leads to success and failure. This intimate and revealing story of camaraderie is the first of its kind. But learning how to lead subordinates during the darkest of hours, living in the most austere of environments comes at a price. Unconventional and at times controversial, this is the only authentic account of life in Rowallan Company Sandhurst at a time when the world teetered on the brink of war with insurgents and dictators armed with weapons of

mass destruction.
