Written by Hennie Swanepoel and Frik de Beer(both based in South Africa) this development studies text, first published in 1997, is suitable for all introductory-level courses.

Contemporary Criminological Issues tackles some of today's most pressing social issues, from the criminalization of Indigenous peoples to interpersonal violence, border control, and armed conflicts. This book advances cutting-edge theories and methods, with the aim of moving beyond the scholarship that reproduces insecurity and exclusion. The breadth of approaches encompasses much of the current critical criminological scholarship, serving as a counterpoint to the growth of managerial and administrative criminologies and the rise of explicitly exclusionary and punitive state policies and practices with respect to 'crime' and 'security.' This edited collection featuring two books, one in English and one in French, includes important contributions to knowledge and public policy by eminent experts and emerging scholars. This book is published in English.

This outcomes-based textbook provides comprehensive information on the makeup of media institutions, theories in media studies, and critical issues that face the media today. With this guide media students learn the history of the media and learn how to keep up with the latest trends and developments in broadcasting, printed press, and film. Outlined is how to develop an internal media policy with company mission statements, news, and programming policies. The relationship of the media to the economy, politics, and society and how the media represents race, gender, violence, and terrorism are also discussed.

This book is above all an example of philosophical reflection in Africa, refuting traditional commonplaces concerning the continent. The texts comprising this volume disprove the misconceptions that Africa has never understood itself and has never contributed to the enrichment of knowledge, the development of rational thought, philosophy, the arts, science and technology as well as civilization. For the members of the recently established network Africa In-The-World, the contributions dealing with musical rhythms, dances and the continental humanist philosophy confirm that Africanisation is a process that continues unabated to this day. The multiple and significant African contributions are often difficult to see because they have long since been adopted and integrated into the heritage of humanity. Africa In-The-World is working toward the construction of a universal humanity - one conceived in terms of a "give and take mentality."

Building on the framework developed in the previous edition, Project Manager Competency Development Framework - Third Edition extends the framework both vertically (to include program and portfolio managers) and horizontally (to cover continued development for the roles of project/program/portfolio managers). The Project Manager Competency Development (PMCD) Framework - Third Edition - Aligns with the PMP(R) Examination Specification - Aligns with the PMBOK(R) Guide - Sixth Edition - Aligns with The Standard for Program Management - Fourth Edition (pre-publication) - Aligns with The Standard for Portfolio Management - Fourth Edition (pre-publication) - Builds upon the framework from the second edition (knowledge, performance, and personal competencies), in particular the personal competencies - Provides examples of evidence required to demonstrate competence - Recognizes and addresses the need for career development along a continuum of expertise and experience The PMCD Framework is designed so all participants in the project management process are be able to assess their current level of project/program/portfolio management competence.

The development of powerful new techniques and refmements of tech niques in molecular genetics in recent years, and the surge in interest in biotechnology based on genetic methods, has heralded a new golden age in molecular genetics, and stimulated in diverse disciplines much interest in the technologies themselves and their potential uses in basic and applied biomedical sciences. Although some excellent specialist laboratory manuals (especially the Cold Spring Harbor Laboratory manuals by I. H. Miller; R. W. Davies et al. ; and T. Maniatis et al.) on certain chapters of molecular genetics exist, no general text that covers a broad spectrum of the sub ject has thus far been published. The purpose of this manual is to pre sent most, though of necessity not all of the important methods of molecular genetics, in a series of simple experiments, many of which can be readily accomplished by the microbiologist, biochemist or biotechnologist that has had only limited exposure to genetics. The remainder of the experiments require either greater familiarity with the subject, or guidance by someone with such experience. The book should, therefore, not only enable individuals to acquire new proce dures for ongoing projects, but also serve as a basis for the teaching of molecular genetic techniques in formal predoctoral and postdoctoral laboratory courses.

The market-leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of todays student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision-making purposes within an organisation, however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real-world mini cases, the text brings home the relevance of the subject matter to the real world of business.

Business Analysis for Practitioners

Business Analysis for Practitioners: A Practice Guide provides practical resources to tackle the project-related issues associated with requirements and business analysis—and addresses a critical need in the industry for more guidance in this area. The practice guide begins by describing the work of business analysis. It identifies the tasks that are performed, in addition to the essential knowledge and skills needed to effectively perform business analysis on programs and projects.

Introduction to Auditing has been written by a group of experienced teachers for T.Y.B.Com students of University of Mumbai. This book has been designed to provide comprehensive coverage of the syllabus prescribed by the University of Mumbai. It covers the topics as mentioned in the syllabus for the subject in a simple and lucid style. A significant value addition is the inclusion of questions related to each topic from previous examinations. KEY FEATURES • Theoretical questions with answers given in each chapter • Numerous questions with hints for answers from previous university examinations • Students will know the trend and pattern of examinations by using this book

Most students, regardless of their major, need to understandinformation systems and technologies and their importance to thesuccess of business organizations. While many of today's studentshave lived with technology their whole lives, they do not see theconnection between what they use every day and what they need tounderstand to be successful in the businessworld. Introduction toBusiness Information Systems, Third CanadianEdition by James Norrie, Michelle Nanjad and MarkHuber focuses on IT as a source of business value and outlines theinnovative technologies, as well as the innovative ways to usetechnology, that help businesses excel. The goal of this book is toteach students that the effective integration of IS with knowledgecan drive the creation of significant business value. Introduction to Business InformationSystems, Third Canadian Edition is written for boththe IT and non-IT major. It is written in a friendly, accessiblestyle that will draw students in and engage them with the content.Expanded coverage of highly technical concepts is included in theTechnology Core box found in each chapter as well as the TechGuides.

Note: This is the loose-leaf version of Child and Adolescent Development and does not include access to the Enhanced Pearson eText. To order the Enhanced Pearson eText packaged with the loose-leaf version, use ISBN 0133831515 . Child and Adolescent Development takes a chronological approach to the study of child development, with an applied focus. Authors Anita Woolfolk and Nancy Perry describe the characteristics and the developmental milestones of the major developmental periods -- infancy and toddlerhood, early childhood, middle childhood, and adolescence -- and discuss the implications and applications of research in child development. The text provides reliable and practical guidelines to help prospective teachers and other professionals working with children to recognize typical and atypical development and to support the development of children and adolescents in positive ways. The Enhanced Pearson eText features embedded video, video analysis exercises, and assessments. Improve mastery and retention with the Enhanced Pearson eText The Enhanced Pearson eText provides a rich, interactive learning environment designed to improve student mastery of content. The Enhanced Pearson eText is: Engaging. The new interactive, multimedia learning features were developed by the authors and other subject-matter experts to deepen and enrich the learning experience. Convenient. Enjoy instant online access from your computer or download the Pearson eText App to read on or offline on your iPad® and Android® tablet.* Affordable. Experience the advantages of the Enhanced Pearson eText along with all the benefits of print for 40% to 50% less than a print bound book. *The Enhanced eText features are only available in the Pearson eText format. They are not available in third-party eTexts or downloads. *The Pearson eText App is available on Google Play and in the App Store. It requires Android OS 3.1-4, a 7" or 10" tablet, or iPad iOS 5.0 or later. From reviews of the First Edition: "[W]ell written with a clear focus on the undergraduate audience, it covers a wide range of relevant topics that undergraduates are interested in, it makes human development theories accessible to undergraduates, and it integrates multiple cultural lenses ... I absolutely love it compared to the other options on the market in this field ." -- Michelle Tichy, University of Northern Iowa "The writing style is excellent! ...The Introductory 'What would you do' scenarios are great for stimulating critical thinking at the beginning of the class discussions. . . . 'Connecting with Children' sections provide helpful guidelines for teachers, families and other professionals. . . . [The text makes an] intentional effort to cover diversity and culture." -- Winnie Mucherah, Ball State University "One of the reasons I changed to this text was the very clear and interesting writing style. I found myself absorbed in the information even though I have been using these types of texts for decades. The level is appropriate for the students. In addition, if a topic is introduced, it is presented in some depth. . . . There is a great deal of material on practical considerations related to parenting and teaching as well as to cross-cultural issues and diversity. Topics are covered thoroughly and related to one another. I also like the layout of the material in terms of how it appears on the page, ease of reading the print, etc." -- Sandra Twardosz, University of Tennessee, Knoxville*

This exceptional text builds your knowledge of pharmacology by first providing an overview of pharmacologic principles and then teaching you how to apply those principles to clinical practice. Focusing on applying pharmacologic scientific knowledge to clinical practice, it explains diagnostic and treatment reasoning and rational drug selection, while providing useful clinical pearls from experienced practitioners.

This book is for a two-semester Introduction to Financial Mathematics course for undergraduates. It focuses on preparing students for the actuarial exam, motivates through a discussion of personal finances and portfolio management and goes on to cover higher level mathematics, such as stochastic calculus and Brownian Motion. The author blends the better topic coverage, examples and exercises from the various available books and also attempts to standardize the course syllabi with a very well-thought and attractive table of contents.

After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.

This third edition, like the first and second, strikes a balance between the theory of the law of evidence and its practical application in a constitutional issues, the impact of these sections on the Anglo-South African law of evidence, and the extent to which some of them may be subject to constitutional challenges. Stock is also taken of the provisions of the Electronic Communications and Transactions Act 25 of 2002 and the consequences of the repeal of s 66 of the Internal Security Act 74 of 1982.

The manner in which criminal investigators are trained is neither uniform nor consistent, ranging from sophisticated training protocols in some departments to on-the-job experience alongside senior investigators in others. Ideal for students taking a first course in the subject as well as professionals in need of a refresher, Introduction to Crimin

This volume on mathematical control theory contains high quality articles covering the broad range of this field. The internationally renowned authors provide an overview of many different aspects of control theory, offering a historical perspective while bringing the reader up to the very forefront of current research.

Within the domains of morality, is there a distinction that can be properly drawn by using the concepts of applied and theoretical ethics? Could not all ethics be an application of something that has no theoretical foundation - or perhaps only another kind of foundation? Or, perhaps ethics could also be a theory about something that is altogether inapplicable? Moral philosophers have not managed to rule out the possibilities indicated by questions such as these, and this fact could perhaps be taken as a reminder that a relevant moral philosophy should probably not distance itself too much from either the putatively theoretical or applied aspects of moral issues. In this volume, a number of writers wrestle with the problem concerning applied and theoretical ethics, illuminating it from different angles. (Series: Applied Philosophy / Anvendt Filosofi - Vol. 5)

Contemporary Issues in Human Resource Management 4th edition presents both global and local perspectives on the issues that human resource management face in the modern workplace.

Environmental engineering has a leading role in the elimination of ecological threats, and deals, in brief, with securing technically the conditions which create a safe environment for mankind to live in. Due to its interdisciplinary character it can deal with a wide range of technical and technological problems. Since environmental engineering uses the knowledge of the basic sciences – biology, chemistry, biochemistry and physics – it is able to neutralise pollution in all the elements of the environment, i.e. the hydrosphere, atmosphere and lithosphere. Moreover, environmental engineering deals with the design and maintenance of systems of water supply, sewage disposal, heating, ventilation and air-conditioning in buildings. Environmental Engineering IV contains 77 peer reviewed papers selected from 527 presented at the 4th Congress of Environmental Engineering (Lublin, Poland, 2-5 September 2012). The contributions are divided in 7 chapters: • Water supply • Water and wastewater treatment • Neutralization of solid wastes and sludge • Air protection and quality • Indoor microclimate • Energy • Biology and technology Environmental Engineering IV assesses the state of scientific research in various areas of environmental engineering, evaluates the organizational, technical and technological progress made in contributing to ecological security, and determines the place of environmental engineering in sustainable development, taking into account current political and economic conditions, and is a valuable source of information for the environmental engineering professional and academic community.
