

militant extremists and modern states in the region, and most recently in many European countries, it became more important than ever before to understand the dialectics of education in conflict in different local contexts, starting in this book by the Egyptian context. The book focuses on education in Egypt during the time of the revolution as perceived by university students, youth activists, educational professionals, government officials and civil society organizations. Its chapters reveal the tension, contradiction and/or coherence among different players as related to their respective role in education for civic engagement, national identity, global citizenship, peace-building, teacher professional development, and women's and students' empowerment. The book illustrates the dialectics of education in conflict by articulating diverse meanings and perspectives given by Egyptian stakeholders when describing their actions and reality(ies) during the time of the revolution and its aftermath.

The boundaries of citizenship have been blurred by global information systems—while the public and private spheres have been reshaped through globalization (and colonialism and capitalism). This collection of new essays explores information and citizenship in the digital age from a range of perspectives, presenting cautionary tales along with possibilities for "decolonizing" digital information and literacy. Topics include Wikileaks and the dissolution of information: ethical issues for teachers, policy makers and librarians; and creating safe spaces through ethical librarianship.

This accessible text—now revised and updated—has given thousands of future educators a solid grounding in developmental science to inform their work in schools. The book reviews major theories of development and their impact on educational practice. Chapters examine how teaching and learning intersect with specific domains of child and adolescent development—language, intelligence and intellectual diversity, motivation, family and peer relationships, gender roles, and mental health. Pedagogical features include chapter summaries, definitions of key terms, and boxes addressing topics of special interest to educators. Instructors requesting a desk copy receive a supplemental test bank with objective test items and essay questions for each chapter. (First edition authors: Michael Pressley and Christine B. McCormick.) New to This Edition *Extensively revised to reflect a decade's worth of advances in developmental research, neuroscience, and genetics. *Greatly expanded coverage of family and peer relationships, with new content on social-emotional learning, social media, child care, and early intervention. *Discussions of executive function, theory of mind, and teacher/student relationships. *Increased attention to ethnic/racial, gender, and LGBT identity development. *Many new and revised practical examples and topic boxes.
