For introductory courses in Financial Accounting taught from a more traditional “preparer” approach. Financial Accounting, 8e helps students “nail” the accounting cycle! Financial Accounting helps students “nail” the accounting cycle up front in order to increase success and retention later on. The concepts and mechanics students learn in the critical ‘accounting cycle’ chapters are used consistently and repetitively—and with clear-cut details and explanations—throughout the remainder of the text, minimizing confusion. MyAccountingLab, the text’s online homework system, then provides students with a personalized learning environment that tests and strengthens their skills and understanding through unlimited practice. Together, Financial Accounting 8e and MyAccountingLab will help students have more of those “I Get It!” moments. A solid enhancement to already solid fundamentals, the eighth edition now features new co-author Bill Thomas of Baylor University who brings his expertise on auditing, ethics, and internal controls to key sections of the book.

Financial accounting (or financial accountability) is the field of accounting concerned with the summary, analysis and reporting of financial transactions pertaining to a business. This involves the preparation of financial statements available for public consumption. Stockholders, suppliers, banks, employees, government agencies, business owners, and other stakeholders are examples of people interested in receiving such information for decision making purposes.Financial accountability is governed by both local and international accounting standards. GAAP (which stands for Generally Accepted Accounting Principles) is the standard framework for guidelines for financial accounting used in any given jurisdiction. It includes the standards, conventions and rules that accountants follow in recording and summarising and in the preparation of financial statements. On the other hand, IFRS (International Financial Reporting Standards) is a set of international accounting standards stating how particular types of transactions and other events should be reported in financial statements. IFRS are issued by the International Accounting Standards (IASs). With IFRS becoming more widespread on the international scene, consistency in financial reporting has become more prevalent between global organisations.Whilst financial accounting is used to prepare accounting information for people outside the organisation or not involved in the day-to-day running of the company, management accounting provides accounting information to help managers make decisions to manage the business.
