This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

This highly regarded reference is relied on by a considerable part of the accounting profession in their day-to-day work. This handbook is the first place many accountants look to find answers to practice questions. Its comprehensive scope is widely recognized and relied on. It is designed as a single reference source that provides answers to all reasonable questions on accounting and financial reporting asked by accountants, auditors, bankers, lawyers, financial analysts, and other preparers and users of accounting information.

Principles of Accounting Volume 1 - Financial Accounting

"Introductory Financial Accounting, 9e" provides a unique and perfect blend of robust financial statement analysis with early statement of cash flows coverage. It is directed at those who will analyze real financial statements, and make business decisions based upon that analysis. Real statements are used throughout (Starbucks).

Statement of Cash Flows comes earlier in this book than most. Material is focused on analysis of financial statements -- ratios introduced early and often, special "Portfolio" section provides a "road map" to financial statement analysis, and special section in end-of-chapter problems focuses on analyzing financial statements (using Starbucks financial statements). Features strong coverage of statement of cash flows (Ch 5) --an essential financial statement, one of growing importance, and should be regarded as a basic statement. For financial accountants.

This book presents empirical evidence on the convergence of financial and management accounting in the Italian context. The author provides an overview of the development paths of financial accounting including its evolution, role of non-financial, forward looking and voluntary disclosures, and internal determinants such as corporate governance and business culture. The author uses the premises of agency, signalling, legitimacy and institutional theories in understanding this evolution, and includes the perspective of professional associations and academics on the topic. Based on survey data, the reader is provided with valuable insights into the Italian accounting scene.
