Achieve high standards in patient-focused care. Health Services Assistance provides complete coverage of core and elective units for assisting in nursing work in acute care. Exercises throughout the text provide students with the means to self-assess and extend their skills and knowledge. Foundation skills are developed early, underpinning understanding of the specialist acute care chapters that follow. Students are encouraged to reflect and contextualise their learning and to practise techniques in small groups. Activities break up the material so information is easier to retain. Self-check, extension activities and discussion questions can be incorporated into an institution's assessment strategy. Health Services Assistance is structured by competency for HLT33115 Certificate III in Health Services Assistance, supporting nursing in acute care, and is packed with specific cases and examples, as well as including additional content on palliative care and mental health. Each chapter addresses a competency, with a volume of learning that underpins the assessment requirements. The book is structured so that elements and criteria are communicated by the section headings. Teach following the qualification structure, using the print book, eBook or LMS integration.

A vital member of the health care team, the contemporary enrolled nurse faces increasing challenges and an increasing level of responsibility. Nursing & Health Survival Guide: Nutrition and Hydration

"This book is suitable for those preparing for entry to healthcare programmes as well as those undertaking pre-registration programmes, post-registration courses and those just needing to make a 'quick check' whilst in practice. Clear step-by-step explanations are given to each of the exercises, demonstrating a variety of strategies to arrive at the same answer. Each chapter gives clear examples as to when the calculation would be used which helps the reader to link theory and practice." Nicci Whiteing, Lecturer in Adult Nursing, School of Community & Health Sciences, City University, London

"Designed for use by students of all branches of nursing and midwifery, this book covers the calculations they need to know with remarkable clarity. Written to engage with students' learning in both theory and practice, it is ideal for all those entering the nursing or midwifery register." Philip Scullion, Department of Nursing, Midwifery and Health Care, Coventry University "There are easy to understand worked examples in each section along with practice exercises. All of the practice questions have been put in the context of real life situation which makes them easier to understand. I would recommend this book to anyone undertaking a pre registration nursing or midwifery course, I found it extremely useful in helping me to prepare for my recent drug calculations exam." Nina Griffiths, Nursing Student, Swansea University Worried about your calculation skills? Looking for some help to make sure you are up to scratch? As a healthcare practitioner, you need to be confident that you can deal

competently with any numerical situation you may come across. This handy book provides a guide to common numerical calculations found in healthcare practice and uses everyday examples to enable you to apply numerical principles correctly in your own practice. This user-friendly book is: Suitable for a wide variety of healthcare practitioners, including all nurses and midwives Full of authentic worked examples Features core clinical charts, prescription models, labels and diagrams Types of calculation covered include: Decimals Fractions Percentages and ratios Ratios and proportion The book shows you how to calculate doses correctly for tablets, capsules, fluids and injections. Meriel Hutton encourages you to find a method which suits you personally - with the emphasis always on patient safety. The increasing complexity of problems throughout the book builds as you progress, helping you calculate with confidence!

"Designed to be carried around on clinical or on campus, this is a user-friendly, quick-find handbook to common medical-surgical nursing situations that students will face during their clinical experience."--Provided by publisher.

This textbook is primarily intended for student nurses, students studying for National Vocational Qualifications (levels II and III Health Care) and those students who are undertaking an Access to Nursing Course. It provides these students with a user-friendly and contemporary understanding of some of the key clinical practice issues that they will experience in clinical areas. The book presents the reader with an institutional perspective as well as a community approach to general aspects of adult nursing care. The text is clearly written with useful illustrations. A well known model of nursing is used in which to frame the information - Roper et al's Activities of Living Model. The reader will begin to develop his/her practical nursing skills with a sound knowledge base underpinning the delivery of care. There are 14 chapters, a detailed glossary and a comprehensive list of "normal values" is included at the end. The book is designed to be used as a reference book in either the clinical setting, the classroom or at home.

This open access book aims to primarily support nurses as leaders and champions of multimodal, Interdisciplinary nutrition care for older adults. A structured approach to fundamentals of nutrition care across Interdisciplinary settings is combined with additional short chapters about special topics in geriatric nutrition. The book is designed to provide highly accessible information on evidence-based management and care for older adults, with a focus on practical guidance and advice across acute, rehabilitation, and primary and secondary malnutrition prevention settings. The cost of malnutrition in England alone has been estimated to be 119.6 billion per year, or more than 15% of the total public expenditure on health and social care. ^65 years). The importance and benefit of specialised nutrition care, delivered by experts in field, is well established for those with complex nutrition care needs. However, despite the substantial adverse impact of malnutrition on patient and healthcare outcomes, specialised management of this condition is often under-resourced, overlooked and under-prioritised by both older adults and their treating teams. As an alternative, timely, efficient, and effective supportive nutrition care opportunities may be appropriately implemented by nurses and non-specialist Interdisciplinary healthcare team members, working together with nutrition specialists and the older adults they care for. Practical, low-risk opportunities should be considered across nutrition screening, assessment, intervention, and monitoring domains for many patients with, or at risk of malnutrition. Whilst a variety of team members may contribute to supportive nutrition care, the nursing profession provide a clear focal point. Nurses across diverse settings provide the backbone for Interdisciplinary teamwork and essential patient care. The nursing profession should consequently be considered best placed to administer Interdisciplinary, multimodal nutrition care, wherever specialist nutrition care referrals are unlikely to add value or are simply not available. As such, the book is a valuable resource for all healthcare providers dedicated to working with older patients to improve nutrition care.

The 2nd edition has been updated against the background of the new Dip.HEN syllabus, policy & management changes within the NHS & the Patient's Charter. The original feature of patient vignettes, based on real case studies has been retained."

Developing Practical Nursing Skills helps you learn and perfect the practical skills required to become a qualified nurse. Adopting a patient-focused and caring approach, this essential text helps you integrate nursing values alongside physical skills in your daily practice. Now in its fifth edition, the text takes into account the NMC standards of proficiency and is relevant to nurses across all fields. Key features of the book include: i) New chapters on mental health assessment and end-of-life care, along with expanded content on sleep, pain and medication management. ii) Full-colour text design with clear illustrations and clinical photographs to aid visual learning. iii) Reader-friendly style with learning outcomes, activities and reflection points to help you link theory to practice. iv) Scenarios from a range of settings, including community, mental health and learning disabilities nursing. v) A focus on adults and young people, and with 'pointers' on caring for children and pregnant women to promote a lifespan approach.
