Current Affairs Yearly 2022 (E)

The book, on the basis of empirical and historical investigations, convincingly demonstrates that the process of change in India involved a great degree of ambivalence, but there is no clear-cut indication except that various strategies have tended to strengthen the position of the already privileged sections of the society. The underprivileged are the last to benefit.

A National and International Perspective

World Bank Technical Paper No. 382. This technical paper compares and contrasts the governance and regulation of new style power pools in Australia, Canada, Norway, Sweden, and the United Kingdom. These trading markets in electricity commodities and services are explored in various ways. The authors review the basic governance models, compare decisionmakers in the industry, examine market surveillance methods used, and explore the role of government and the regulator. The paper emphasizes the lessons that can be learned from international experiences.

Pricing Mechanism And Practices Of Agricultural Commodities - A Study Of Major Commodities In Selected Districts Of Telangana State

India is home to the world's largest hungry population and has a long way to go before it is anywhere near the mammoth task of achieving the United Nations' goal of ending hunger in 2030. It is ironic that this book raises the issue of "Hunger" in a state where it is least expected. Punjab is a state with mountains of food grains and overflowing godowns, with highest yields, and largest area under irrigation. Not only that, it is the Green Revolution state of India, that has played the most prominent role in helping India achieve its goal of food self-sufficiency. By investigating the hydra-headed concept of food security in Indian Punjab, this book brings to fore the different dimensions of the deprivation of human capabilities and the intricate relationship between food security and economy, ecology, and state policy. Moreover, it is a wakeup call for India; for if, this is the state of affairs in one of the more prosperous primarily agrarian states, what would be the situation in the poorer ones? The primary objective is to divert urgent attention to the issue of food security, as an important ingredient of human resource development. With a strong commitment to achieving the primary goal of human resource development, India's biggest burden could well become India's greatest asset in the path to inclusive development.

Being a Commentary on Control Orders Passed by the Uttar Pradesh as Well as Central Government with U.P. Control of Supplies (Temporary Powers) Act, 1947, Essential Supplies (Temporary Powers) Act 1946, and Price of Goods Act

India's Public Distribution System

A Comprehensive Reference Book on India

Debates

Report - Government of India, Ministry of Industry and Civil Supplies

This is one of the first single-author comparisons of different South Asian states around the theme of religious conflict. By research and syntheses of the literature on 'communalism', it argues that religious conflict in this region in the modern period is simply based on sectarian or theological differences or the clash of civilizations. Instead, the book proposes that the connection between religious radicalism and everyday violence relates to the actual (and perceived) weaknesses of political and state structures. Religious and ethnic mobilisation has provided a means of protest, where representative institutions failed. For others, it is about dealing with an uncertain political and economic future. For many it has no concrete or deliberate function, but has effects on social stability, paternalism and local power, in the face of globalisation and the growing aspirations of the region's most citizens.

TULIP

Modern technologies are central to creation of wealth through business expansion leading to economic development. This is visible in the fast-paced technology-induced economic growth experienced by most countries, especially by rapidly growing economies such as India, China, Brazil, South Korea, among others. Increasing individual scientific contribution, nurturing entrepreneurial talent, promoting innovative competence, strategically prioritizing and investing in technologies and enhancing national economic wealth are some of the important Technology Management goals. Technology Management has emerged as a strategic and knowledge domain of interest to academicians, practitioners, and policy makers across the globe. Technology Management has also evolved into an interdisciplinary concern which requires national and international collaborations and exchange of insights. Keeping this objective in mind the International Conference on Technology Management is organized by the Department of Management Studies, Indian Institute of Science, Bangalore, a leader in research and education in Technology Management for the last several decades. This conference aims at integrating experiences of academicians, industry leaders, Technology Managers and Innovators towards effective knowledge creation and economic development. The contributions of the present volume are presented at the International Conference on Technology Management-2012 during 18-20 July 2012.

Strategies of Social Change in India

The International Year Book and Statesmen's Who's who

The Kumbh Mela (congregation), organized after every 12 years in four cities of India, Haridwar Ujjain, Nasik, Allahabad on the bank of sacred rivers Ganga, Shipra, Godavari, and confluence of Ganga and Yamuna respectively. This is the largest congregation of faith and can be considered as one of the biggest religious events on our planet earth. A dip in the holy river during this

period is regarded as very auspicious and believed to purify one's soul and lead to the righteous path. The Mela begins on the auspicious day of Makar Sankranti that falls on 14th January and draws to close around mid April. It draws millions of pilgrims over the course of this period including Ascetics, Saints, Sadhus, Sadhvis, Kalpvasis, and foreigners from various countries of the world. In the holy city of Hardwar, on the bank of sacred river Ganga, Kumbh Mela, was successfully organized in the year 2010. Managing millions of pilgrims in a small city was an arduous task due to geographical and other hurdles. As a Chief Minister of State Dr. Ramesh Pokhriyal "Nishank" was instrumental in organizing the event successfully. The success of Haridwar Kumbh congregation was highly appreciated on various fronts and won several accolades including a nomination for the prestigious Nobel prize. Taking cognizance of the repeated demands from India, UNESCO has declared Kumbh congregation as a world cultural heritage event that is attended by millions of believers of Hindu faith in disciplined and peaceful manner. For this reason, Kumbh 2010 came into the limelight once again, when people were overwhelmed with joy at the sensitivity of the "Nishank" Government to facilitate their needs. This book is inspired by a lecture in ISB Hyderabad where the students, faculty, and the director unanimously vouched for the idea that the story of this festival and its management should see the light of the day and be known to the whole world. Organizing this mega event required various innovative measures and enormous strategic planning and the same need to be shared. The idea is that this present book on the managerial perspective of the Kumbh will benefit all those interested in India's glorious traditions and will be fruitful for all the stakeholders who are involved in organizing mega-events like Kumbh.
