Carrera Panamericana: the Mexican Road Race. In its day it was the longest, fastest and likely wildest international automobile race ever staged. A World Championship event along with Le Mans, the Mille Miglia, Nüburgring and the Tourist Trophy, most drivers considered it the best-and the worst-of them all. From 1950 to 1954, it was witnessed by ten million spectators along a nearly 2,000-mile course that featured deserts where the faster cars could reach 180 mph and 10,000-foot mountain passes requiring first-gear operation. Carrera Panamericana influenced engineering and marketing from Michigan to Modena. Ferrari

designed and named a model specifically for the race. Lincoln emerged as a high-performance sedan and Porsche's Carrera was named in honor of its wins. The Pan-Am was so unconventional and fascinating that it came to hold the world's attention for a full week each year. It was one of the last of the great open road events and the first in which European and American cars could be compared and marked the return of US factory support to racing in America.

This much needed book is the first to provide a comprehensive history of the profession and aesthetics of American automobile design. The author reveals how the appearance of the automobile was shaped by the social conflicts arising from America's mass production system. He connects the social struggles of American society with the organizational struggles of designers to create symbol-laden substitutes for the American dream. Theoretically sophisticated, lucid and compelling, *Auto-Opium* will appeal to all interested in the American obsession with the car.

In July 1917 Ford Motor Company introduced a one-ton chassis for commercial trucks, marking what many historians feel was its official entry into the dedicated truck business. Prior to this the company had offered commercial cars, including depot hacks and delivery van bodies mounted on its standard passenger car chassis. Dealers had also offered small after-market pickup beds that could be placed on the rear of a Model T car to convert it to a pickup. But with the debut of the rugged Model TT truck chassis, Ford was firmly in the truck market. Eight years later it introduced its first factory-

produced pickup, a sturdy half-ton job that met with great acceptance. During the century that has passed since that first Ford truck chassis, the F-series has become the best-selling truck in the world, and the best-selling vehicle of any type in America. Every year the company sells over 700,000 F-series trucks, and well over 1.5 million trucks of all types, just in the U.S. It's an amazing success. Ford Tough: 100 Years of Ford Trucks tells the entire Ford truck story from the very beginning, when Ford got its start in truck production. This book provides the history of the wide array of models Ford has
