Build a powerful and reliable engine the first time - without wasting money on incompatible components or modifications that don't work. Burgess covers the BMC/British Leyland B-series engine (except the early 3-bearing crankshaft unit) as fitted to the MGB and MGB GT.

Provides advice on MGB/MGB GT suspension, brakes and dyno tuning.

Years of meticulous research have resulted in this unique history, technical appraisal (including tuning and motorsports) and data book of the Ford V8 Cleveland 335 engines produced in the USA, Canada and Australia, including input from the engineers involved in the design, development and subsequent manufacture of this highly prized engine from its inception in 1968 until production ceased in 1982.

Computerized Engine Controls

Ward's Automotive Yearbook

Ford Mustang

*While many will be familiar with 1960 Ford racing programmes using the very compact pushrod Small Block V8, few know the facts behind the technology employed at Ford during this time. This book gives insight to the confident, logical approach of engineers working at Ford's Engine & Foundry Division. Engineers who made outstanding technical decisions, leading to many major motorsport events being won using larger capacity derivatives of the 1961 221ci Small Block V8 production engine, a power unit introduced by Ford mid-1961 for use in 1962 model year intermediate Fairlanes and Mercurys.*

*Includes advertising matter.*

*Fifth generation / S197 2005-2014*

*How to Power Tune MGB 4-Cylinder Engines*

*Updated and Revised New Colour Edition*

Computerized Engine Controls, 5E: 1998 Update to the Fifth Edition explores the many ways in which computers affect the driveability, performance, fuel economy and emissions quality of today's vehicles. By referencing the fundamentals of electricity and computers, this text illustrates how to systematically apply the information to products of virtually all automobile manufacturers. Each chapter contains real-world examples of applications of the information presented, selected lists of technical terms introduced, diagnostic exercises and review questions.
