p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} Without question, the 1964-1/2 Mustang is one of the most important and influential cars in automotive history. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich ' s detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca ' s, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World ' s Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.

Ford's 4.6-liter-powered Mustang is the last remaining "classic" muscle car in the world and is incredibly popular with performance enthusiasts. More than 1,000,000 Mustangs have been built since 1996. Covers all 4.6 and 5.4-liter "Modular" motors--Ford's only V8 engine for Mustangs, fullsize cars, and light trucks from 1996 to 2004.

The 2005 Mustang, to be released by Ford forty years after the original Mustang, will be both a departure and a return to tradition, as Ford steps away from the aging Fox chassis for its flagship car, yet brings back styling cues from the most popular Mustangs of the past. Ford found inspiration for the new Mustang from its 1967 Fastback model. The 2005 retro-look pony car will include a 4.6-liter, V-8 engine with 300 horsepower — the highest horsepower of any previously built Mustang. This book traces the new Mustang's evolution from the drawing board to the production line to the street. A photographic celebration of the new car, this book delivers the inside story behind the rejuvenation of one of the most

storied cars in automotive history.

Create effective community-based programs for substance abusers with HIV/AIDS! Substance abusers are the fastest-growing population of people with HIV/AIDS in the US--and one of the hardest to reach and treat. Evaluating HIV/AIDS Treatment Programs offers new strategies for providing care for this vulnerable population. The programs evaluated and discussed in this volume were funded as part of the DHHS Health Resources and Services Administration through its Special Projects of National Significance Program. Collectively known as the SPNS Cooperative Agreement, these 27 projects represent a diverse group of organizations with a common goal: to improve the health, quality of life, and access to health care for traditionally underserved populations living with HIV/AIDS. Evaluating HIV/AIDS Treatment Programs reports in detail the efforts of several community-based HIV/AIDS organizations in the SPNS program. You will learn how these organizations provide high-quality care for persons with HIV who are unlikely to obtain it in the traditional hospital-based service system. This volume offers specific, proven strategies designed to overcome the linguistic, cultural, racial, and economic barriers that make it difficult for some sick people to get the health care they need. It also offers specialized medical care models that work within the context of a continuum of services in a medical clinic. Evaluating HIV/AIDS Treatment Programs also highlights other aspects of the Cooperative Agreement projects, including: a study of end-stage AIDS care an overview of the HRSA HIV/AIDS Bureau SPNS Cooperative Agreement grant initiative a study of conceptual issues in implementing program evaluation in real-world community organizations discussion of the online Knowledge Base that summarizes and disseminates information from the Cooperative Agreement projects studies of ways to reach and care for specific populations with HIV/AIDS, including women, Latinos, Haitians, adolescents, and rural people This valuable volume offers solid data on treating people who are all too often neglected by the medical community even before they contract HIV/AIDS. The programs and ideas presented in Evaluating HIV/AIDS Treatment Programs can be applied to other community-based health initiatives and clinics offering medical care to underserved and vulnerable populations. This essential resource deserves a permanent place on their bookshelf of any physician, administrator, or policymaker working in the fields of HIV/AIDS, epidemiology, public health, or substance abuse.
