*The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.*

*Odd though it may be, a mechanics lien has little to do with auto mechanics. Instead, it involves builders. Contractors and subcontractors, materials suppliers and equipment suppliers -- these are the folks who use mechanics liens.A mechanics lien enables workers to collect debts owed for work or materials they've contributed to a project. By making a legal claim on the real estate of an owner, the lien ensures that workers don't leave a project empty-handed if the owner refuses payment. Consequently, it's important that both laborers and owners understand the ins and outs of these liens.Whether a reader is a general contractor, a carpenter, a lumber supplier or simply a diehard fan of home improvement projects, Everybody's Guide to Mechanics' Liens is the place to go for strategies and answers.The book does not cover public property owners and publicly-funded projects.*

The Mechanics' Lien Law of the State of Ohio, Including the Liens of Contractors, Material Men, Subcontractors and Manual Laborers, and Liens Upon Railroads, with Pleading, Practice, Evidence and Forms

**The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the United States Federal Government.**

**The topics in the book are organized in the same manner as they would actually arise in a construction project. First, the book deals with pre-construction issues licensing, bidding, and the formation of the construction contract. It then discusses what happens when things go wrong with breach of contract by the owner and/or the contractor. An in-depth analysis is provided with regard to claims involving delay, disruption, and acceleration. Several chapters are then devoted to statutory remedies-mechanics' liens, stop notices, and bonds both on public and private works. Finally, coverage is provided on other issues and subjects involving the construction industry, including expanding liability, home improvement contracts, bankruptcy, and alternative dispute resolution.**
