Forests represent a remnant wilderness of high recreational value in the densely populated industrial societies, a threatened natural resource in some regions of the world and a renewable reservoir of essential raw materials for the wood processing industry. In June 1992 the United Nations Conference on the Environment and Development (UNCED) in Rio de Janeiro initiated a world-wide process of negotiation with the aim of ensuring sustainable management, conservation and development of forest resources. Although there seems to be unanimous support for sustainable

development from all quarters, there is no generally accepted set of indicators which allows comparisons to be made between a given situation and a desirable one. In a recent summary paper prepared by the FAO Forestry and Planning Division, Ljungman et al. (1999) find that forest resources continue to diminish, while being called upon to produce a greater range of goods and services and that calls for sustainable forest management will simply go unheeded if the legal, policy and administrative environment do not effectively control undesirable practices. Does the concept of sustainable forest management represent not much more than a

magic formula for achieving consensus, a vague idea which makes it difficult to match action to rhetoric? The concept of sustainable forest management is likely to remain an imprecise one, but we can contribute to avoiding management practices that are clearly unsustainable.

Palermo - the capital of Sicily - is a destination with a difference. The city is a treasure trove of original monuments and works of art, combined with architecture of grand proportions. Yet it also has a grittier side, shown by the continuing influence of the mafia. Jeremy Dummett here provides a concise overview of Palermo's eventful history, together with a survey of its

most important monuments and sites. He looks at the influences of the city's various ancient rulers - the Phoenicians, Romans, Arabs and Normans - as well as its more recent incarnation as part of the Italian state. In addition to being an essential companion for visitors to Palermo, this book can be equally enjoyed as a standalone history of the city and its place at the heart of Sicily.

Sicily is at the crossroads of the Mediterranean, and for over 2000 years has been the gateway between Europe, Africa and the East. It has long been seen as the frontier between Western Civilization and the rest, but never definitively part of either.

Despite being conquered by empires - Romans, Byzantines, Arabs, Normans, Hapsburg Spain - it remains uniquely apart. The island's story maps a mosaic that mixes the story of myth and wars, maritime empires and reckless crusades, and a people who refuse to be ruled. In this riveting, rich history Jamie Mackay peels away the layers of this most

mysterious of islands. This story finds its origins in ancient myth but has been reinventing itself across centuries: in conquest and resistance. Inseparable from these political and social developments are the artefacts of the nation's cultural patrimony – ancient amphitheatres, Arab gardens, Baroque Cathedrals, as well as great literature such as Giuseppe di Lampedusa's masterpiece *The Leopard*, and the novels and plays of Luigi Pirandello. In its modern era, Sicily has been the site of revolution, Cosa Nostra and, in the twenty-first century, the epicentre of the refugee crisis. *The Invention of Sicily* is a dazzling introduction to the island, its history and its people.
