This trenchant study analyzes the rise and decline in the quality and format of science in America since World War II. Science-Mart attributes this decline to a powerful neoliberal ideology in the 1980s which saw the fruits of scientific investigation as commodities that could be monetized, rather than as a public good.

Language in Social Life is a major series which highlights the importance of language to an understanding of issues of social and professional concern. It will be of practical relevance to all those wanting to understand how the ways we communicate both influence and are influenced by the structures and forces of contemporary social institutions. In all modern societies individuals are subject to tests, whether to enter educational programs, to pass from one level to the next or to grant certificates to practice. Yet, tests are powerful tools which are often introduced in undemocratic and unethical ways as disciplinary tools for carrying out various policy agendas. Tests can be detrimental to people's lives as they are capable of affecting and defining the knowledge and behaviour of those who are being tested. The Power of Tests applies a critical perspective of language tests by examining their uses and consequences in education and society and by viewing tests not as isolated events but rather as embedded in social, educational and political contexts. The book is divided into four parts: the first part establishes the power of tests through echoing the voices of test takers, describing the features of the power of tests, and the temptations that tests offer to bureaucrats who use them for power and control. The second part reports on studies that provide empirical evidence about intentions and effects of a number of large scale language tests. The third part interprets the results by examining their consequences on education and society, arriving at a model of tests' use. The final section of the book offers strategies for controlling and minimising the misuses of tests by introducing the notion of Critical Language Testing which calls for the examination of the consequences and misuses of tests, monitoring of power and pointing to their unethical uses. It also provides a comprehensive discussion of the responsibilities of language testers, including a new Code of Ethics, as well as strategies for guarding and protecting the rights of test takers.

Critically evaluates Hemingway's published workings, including Islands in the Stream, and provides a narrative on his literary life

This ground-breaking volume sets out an original model of the dynamics of language processing, which can be used to explain the structural properties of language in a simple and elegant way. The model is introduced both informally and formally, and is applied to a range of languages.

Fidel Castro is one of the most interesting and controversial personalities of our time – he has become a myth and an icon. He was the first Cuban Caudillo – the man who freed his country from dependence on the USA and who lead his people to rediscover their national identity and pride. Castro has outlived generations of American presidents and Soviet leaders. He has survived countless assassination attempts by the CIA, the Mafia, and Cubans living in exile. He has become one of the greatest politicians of the 20th Century. His biography, and the history of his country exemplify the tensions between East and West, North and South, rich and poor. As Castro's life draws to a close, the question as to what will become of Cuba is more important that ever. Will Castro open Cuba to economic reform and democratization, or stick to his old slogan socialism or death? In this remarkable, up-to-date reconstruction of Castro's life, Volker Skierka addresses these questions and provides an account of the economic, social, and political history of Cuba since Castro's childhood. He draws on a number of little-known sources, including material from the East German communist archives on Cuba, which were until recently inaccessible. This is an exciting, painstakingly researched, and authoritative account of the life of one of the most extraordinary political figures of our time.

Process drama is now firmly established, internationally, as a powerful and dynamic pedagogy. This clear and accessible book provides a practical, step-by-step guide to the planning of process drama. Grounded in theory and illustrated in practice, it identifies and explains the principles of planning and shows how they can be applied across age ranges and curricula. Drawing on the authors' wide-ranging practical experience and research, examples are built up and run throughout the book, at each step showing how and why the teachers' planning decisions were made. This second edition features: a wider range of examples illustrating the planning principles in practice two completely new chapters: one deals with planning for diverse learner groups and the other moves the reader on from the pre-action planning phase to the 'planning on your feet' required as the drama unfolds. incorporated new material to reflect recent understanding of how learning takes place Written as a conversation between reader and authors, Planning Process Drama will help practitioners to update and refine their practice and strengthen their understanding, skills and confidence. Planning Process Drama will be an essential guide for students undertaking initial teacher training at primary level, in addition to both Drama and English at secondary level, and a Masters in Drama in Education. It will also prove to be valuable reading for specialist and non-specialist teacher in both the primary and secondary sectors who teach, or wish to teach, process drama.

The development of medical mycology in the United States is assessed within the context of scientific progress as demonstrated by the creativity and scholarly contributions from research, technological activities, and training toward the management of fungal diseases. Although it focuses on American figures and events, it covers the origins of the discipline in Europe and Latin America. It describes historically significant scientific, technological and educational development and the narrative description is accompanied by an analysis of the causes of these and their perceived impact on the development of the discipline from the late 1880s into the 1990s. The development was conceptualised into five aras: the era of discovery, the formative years, the advent of antifungal and immunosuppressive therapies, the years of expansion and the era of transition.

The inspiration for virtually all of RomeGÇÖs famous gardens, the Vatican Gardens first flourished during the Middle Ages and have awed visitors ever since. Yet despite their importance to the history of Western gardens and art, no full-length study of the gardens has previously been published. With the release of The Vatican GardensGÇ¢ the third in a series co-published with the Vatican that also includes The Sistine Chapel: A New Vision and The Loggia of Raphael: A Vatican Art TreasureGÇ¢ these important gardens have at last received their full due. Covering the period from the thirteenth century through 1930, when the Vatican became a state, The Vatican Gardens explores the plants, planters, and architectural structures of the gardens in fascinating detail. Here you will learn about such celebrated gardeners as Michele Mercate, who around 1570 introduced the rarest plants of his time to the Vatican, and the great botanist Johannes Faber. The famous Cortile del Belvedere courtyard, designed by Donato Branmante for Pope Julius II and envisioned as a vast outdoor room, is brought to vibrant life through word and image. Discussion of the GardensGÇÖ symbolic significance, agricultural functions, and upkeep by such gardening popes as Leo XIIIGÇ¢ as well as of the gardens at Castel Gandolfo, the pope's four-centuries-old summer residenceGÇ¢ completes this authoritative volume. Illustrated throughout with newly commissioned images and plans as well as historic pictures and diagrams, and featuring research thatGÇ¢ among much elseGÇ¢ establishes the Vatican Gardens as the oldest botanical garden in Italy, this original volume belongs in the libraries of landscape gardeners, architects, historians, and visitors to Rome.

As the 'thresholds' through which readers and viewers access texts, paratexts have already sparked important scholarship in literary theory, digital studies and media studies. Translation and Paratexts explores the relevance of paratexts for translation studies and provides a framework for further research. Writing in three parts, Kathryn Batchelor first offers a critical overview of recent scholarship, and in the second part introduces three original case studies to demonstrate the importance of paratextual theory. Batchelor interrogates English versions of Nietzsche, Chinese editions of Western translation theory, and examples of subtitled drama in the UK, before concluding with a final part outlining a theory of paratextuality for translation research, addressing questions of terminology and methodology. Translation and Paratexts is essential reading for students and researchers in translation studies, interpreting studies and literary translation.

Probes the metaphor of environmental catastrophe in American literature of the last 150 years. Lee Rozelle examines the natural environment's place in American literature and culture through the lens of what he calls the "ecosublime," an aesthetic moment that in its awe and terror provokes a cognitive and spiritual re-conception of place. Focusing on a variety of literary works and cultural artifacts, Ecosublime explores 19th-century, modern, postmodern, and millennial texts as they portray the changing ecological face of America. In the 19th century, Rozelle argues, Isabella Bird and Edgar Allan Poe represent the western wilderness as culturally constructed and idealized landscapes--gardens, forests, and frontiers--conceptual frameworks that either misrepresent or uphold ecological space. Modernists like Nathanael West and William Carlos Williams, on the other hand, portray urban space as either wastelands or mythical urban gardens. A chapter on Charles W. Chesnutt and Rebecca Harding Davis analyzes a new breed of literary eco-advocate, educating and shocking mainstream readers through depictions of ecological disaster. A later chapter probes the writings of Edward Abbey and the Unabomber Manifesto to delve into the sublime dimensions of environmental activism, monkey-wrenching, and eco-terrorism. In each instance, Rozelle finds evidence that the ecosublime--nature experienced as an instance of wonder and fear--profoundly reflects spiritual and political responses to the natural world, America's increasingly anti-ecological trajectory, and the ascendance of a post-natural landscape.

This book looks at current research and future directions in e-lexicography. Online dictionaries and reference tools are increasingly prevalent in a digitized and internet-led era in language study that has embraced computational linguistics. This book responds with theoretical and practical analysis of key topics, from a global range of contributors. Since COBUILD in the 1980s, lexicographers have found it essential to engage with and utilize electronic computational tools. Internet dictionaries, online reference tools and even search engine optimization demand a knowledge of electronic lexicography and force a reassessment of the field. This volume looks at, amongst other topics: • Polyfunctional versus monofunctional dictionary tools • Developing theories of lexicography for electronic mediums • Distinguishing between the database and the dictionary • Online dictionaries not as data repositories but as sophisticated search engines This volume will appeal to scholars in lexicography and to practicing lexicographers.

Shari'ah Compliant and Sustainable?

The field of androgen excess disorders has advanced substantially since the original publication of this book. The Androgen Excess Society (AES) was founded to bring together investigators in the field. A better understanding of the screening, progression, and molecular genetics of nonclassic adrenal hyperplasia (NCAH) has improved the clinical care and diagnostic accuracy of these patients. New criteria for the diagnosis of the polycystic ovary syndrome (PCOS) were proposed in Rotterdam, criteria that have resulted in controversy and, hopefully, initiation of new studies. The association of insulin resistance with PCOS has been strengthened, and the role of metformin in tre- ing the infertility of the PCOS has been validated. Risks for diabetes and, more cont- versially, cardiovascular disease in women with PCOS have received substantial investigation. Our understanding of the epidemiology and economic impact of these disorders has expanded, emphasizing their critical importance. These are but a few highlights of how the terrain has changed in a relatively brief period of time. In keeping with these advances, the title of this book has been revised to reflect the growing importance of PCOS as the most prevalent androgen excess disorder in women, and arguably, as the one that might have the most serious adverse consequences for general health. There are fewer chapters were penned by new (and young) authors who are conducting cutting-edge research in the field.

We study the boundary behaviour of a conformal map of the unit disk onto an arbitrary simply connected plane domain. A principal aim of the theory is to obtain a one-to-one correspondence between analytic properties of the function and geometrie properties of the domain. In the classical applications of conformal mapping, the domain is bounded by a piecewise smooth curve. In many recent applications however, the domain has a very bad boundary. It may have nowhere a tangent as is the case for Julia sets. Then the conformal map has many unexpected properties, for instance almost all the boundary is mapped onto almost nothing and vice versa. The book is meant for two groups of users. (1) Graduate students and others who, at various levels, want to learn about conformal mapping. Most sections contain exercises to test the understand ing. They tend to be fairly simple and only a few contain new material. Pre requisites are general real and complex analyis including the basic facts about conformal mapping (e.g. AhI66a). (2) Non-experts who want to get an idea of a particular aspect of confor mal mapping in order to find something useful for their work. Most chapters therefore begin with an overview that states some key results avoiding tech nicalities. The book is not meant as an exhaustive survey of conformal mapping. Several important aspects had to be omitted, e.g. numerical methods (see e.g.

10 Kasım 1938 Perşembe Saat 09:05 Türk ve Dünya tarihinin kaydettiği en önemli liderlerden biri, Gazi Mustafa Kemal ATATÜRK hayata gözlerini yumdu. ATATÜRK; varlığı, mücadelesi, liderliği, yaptıkları ve etkiledikleri ile bir devrin tarihi seyrini değiştirmiştir. 10 Kasım 1938'de ölümü de tarihin seyrini değiştiren önemli olaylardan biridir. 20. yüzyıla varoluş mücadelesi ile başlayan Devlet-i Aliye ve kurucu unsuru I. Dünya Savaşı ile milletler ve devletler muvazenesinde tarihindeki en büyük kayıplarla karşı karşıya kalmıştır. Büyük harbin hemen ardından başlatılan büyük istiklal mücadelesi sadece Anadolu'nun değil istiklal peşinde koşan tüm milletlerin ümit ışığı olmuştur. Gazi Mustafa Kemal ATATÜRK bu hengamenin içinde doğmuş, büyümüş ve tarihin seyrini değiştirmeyi başarmış bir liderdir. Hiç beklenmedik şekilde ortaya çıkan rahatsızlığı, tedavi edilememesi ve erken yaşta ölümü sarsıcı etkiler oluşturmuştur. 10 Kasım 1938'de ölüm haberi ile sarsılan Türkiye'nin bu habere verdiği; hüzün, keder, birlik ve beraberlik ile yoğrulmuş duygusal tepkiler dönemin gazete ve mecmualarından detaylı olarak takip edilebilmektedir. Gazetelerin 10 Kasım ve 11 Kasım 1938 tarihli baskılarının manşetlerinde, ilk sayfa ve iç sayfalarda verdikleri haberler, köşe yazıları, dönemin önde gelen isimlerinin Atatürk hakkındaki açıklamaları, taziye mesajları, fotoğraflar, resmi tebliğler, ATATÜRK'ün hayatı hakkındaki yazılar olayın tüm sıcaklığını ve çarpıcılığını yansıtmaktadır. Tüm sosyal bilim araştırmalarında konunun aydınlatılması, problemin çözümü verinin netliği, niceliği, niteliği ne kadar kıymetli ise; tekil olayın ve olaya bağlı gelişmelerin takibinde ham verinin niteliği de o kadar kıymetlidir. Bu bağlamda ATATÜRK'ün ölümü ile ilgili yapılan yayınlara dair oluşturulan ham veri kümesi belirli bir metodik sıralama ile sunulduğunda olayı tüm detayları ile yansıtma gücüne sahiptir. Çalışma, okullarda oluşturulan ATATÜRK haftasına özel duvar gazetelerinde uygun görsel kullanma ihtiyacı ile ortaya çıkmıştır. İkinci el kaynakların takibi ile başlayan araştırma süreci, sahaflarda rastlanan nadir gazetelerden rastlanan dökümanlar ile geliştirilmiş web kaynaklarının artması ile bir duvar gazetesinin ihtiyacından öteye geçmiştir. Gazi Mustafa Kemal Atatürk'ün ölüm haberini manşetlerinden duyuran ve Türkiye'de yayımlanan gazeteler haberi 10 Kasım 1938'te, diğerleri 11 Kasım 1938'de geçmişlerdir. Eski takvime göre 10 Kasım, 10 Teşrin-i Sani veya Son Teşrin'in 10. gününe karşılık gelmektedir. Atatürk'ün ölümüne dair duyulan derin hüznün tüm detaylarını yansıtan gazetelerin bazıları iç sayfalarında Atatürk'ün hayatına dair tefrikalar ve fotoğraflar yayınlamışlardır. Bu nedenle sadece ilk sayfalara değil ilgili iç sayfalara da yer verilmiştir. Çalışmada yer alan gazeteler aşağıdaki gibidir: . Akşam · Anadolu · Aydın · Beyoğlu · Cumhuriyet · Haber · Kurun · Münakaşa · Son Posta · Son Telgraf · Tan · Türk Sözü · Türk Dili · Ulus · Yeni Mersin · Yeni Sabah Eser araştırmacılar için ham veri niteliğinde olmakla birlikte, içerik akademik bir dil kullanmadığından genel okuyucu da rahatlıkla yararlanabilir. Araştırmacıların 10 Kasım 1938'de Türkiye ve Dünya gündemine dair birlikte tetkik yapabilmelerine imkan tanımak için kullanılan gazetenin tüm sayfalarına yer verilmiştir. Okullarımızın, öğretmenlerimizin ve öğrencilerimizin okul içi çalışmalarda rahatlıkla kullanabilmeleri için içerik yüksek çözünürlükte dijitalleştirilmiştir. A3 ve A4 ebadında afiş, poster, broşür vd. çalışmalar için uygun görsel transferi yapılabilir veya doğrudan baskı alınabilir. Gazi Mustafa Kemal ATATÜRK ile Milli Mücadele kahramanlarını saygı ve rahmetle anıyoruz. İstanbul 2021

This volume explores the economies of countries in Asia, as well as the former Soviet socialist bloc countries of Central Asia and the Balkans. It analyses the region from the perspective of globalization and regional economic integration, economic growth and sustainable development, international trade and finance, money market and banking systems, labor market and external migration, energy and agricultural sectors. This book will appeal to anyone who is interested in economies of this region, their transition process towards a market economy regime, and their integration in the global world, including academicians from any field of social sciences, as well as decision makers, politicians, businessmen and journalists.

"Designing the School Curriculum" takes a practical, step-by-step approach, giving students the thorough grounding in the process that leads to confident and effective practitioners. The author emphasizes the discretionary judgment of the individual teacher and acknowledges that the curriculum design process is completed only in the unique and spontaneous learning exchanges between students and teachers. Practical ideas on the formation of school purposes, the design of school-wide experiences, effective implementation, and the creation of responsive evaluative mechanisms help students to fulfill the goal of the textto design an authentic and effective curriculum. After an introductory chapter examining the role of the teacher in the design process and two brisk chapters leading students through the theoretical foundations of curriculum development, the text launches into the curriculum design process, giving a close look to each element. Hlebowitsh makes a valuable contribution to the field with this new text, offering a contemporary treatment of classic curriculum design theory and, most importantly, equipping students to engage in effective curriculum design themselves. Exploring one of the largest and most populated cities of the world, this exhaustive travel guide demonstrates Istanbul's unique place in world history. Presenting detailed explanations on historic areas and reputable restaurants, this is a timely reference for the metropolis that welcomes millions of tourists throughout the year and has been named European Capital of Culture in 2010. All historical and cultural sites—such as the Blue Mosque, the Hagia Sophia, Topkapi Palace, and Dolmabahce Palace—are succinctly described with illustrations, maps, and up-to-date information. Precise directions and the amount of time needed to visit each landmark are also included.

The poetry of Salim Barakat aims to recapture the ancient oral culture of the â oeKurda, â and, in so doing, re-invent a distinctly Kurdish culture. Through poetic innovation, this intensely Kurdish poet brings modernity to ancient Kurdish structures. This book provides an overview of new developments in modern Arabic poetry, as seen through the creativity of its leading exponents. Barakat and Mahmud Darwish, as well as the elder Syrian poet Adunis. Its unsurpassed translations of the work of these poets open up possibilities for the reader to enjoy first-hand what modern Arabic poetry has to offer. Translating Barakatâ (TM)s poetry, and understanding something of what this great poet has to say has thrown new light on the output of his friend Mahmud Darwish. It becomes clear that the Palestinian poet uses a semblance of Barakatâ (TM)s Kurdish Shahnama and also his Ballade, genres that hail from orality. Analyzing Darwishâ (TM)s â oeFever Roses, â and â oeThe Hoopoe, â we find that the former is an epic with 50 episodes telling of the wanderings of Palestinians in exile. â oeThe Hoopoeâ is specifically a Sufi poem based in the literary Sufism of medieval poets. Darwish has left us with clear instructions on how to translate his poetry, which this book carefully follows.

Human Systems Management is an important work that integrates knowledge, management and systems into a unified world of thinking and action in business, decision-making and economics. It presents a modern synthesis of the fields of knowledge management, systems science and human organization. A biological rather than mechanistic perspective pervades the text. Microfinance institutions are today reaching hundreds of millions of clients throughout the global South, but the special needs of Muslim borrowers and savers, who wish to avoid any form of fixed interest, are badly served. The purpose of Islamic Microfinance is to introduce readers to the tenets of Islam and how they are applied to microfinance. It questions why, when mainstream Islamic finance is growing rapidly, are efforts to reach poor Muslim customers so far behind? Can Islamic microfinance as it grows maintain its original spirit of fairness, transparency and sharing, principles that seem to have been almost forgotten in the world of conventional microfinance? The book contains fifteen detailed case studies of individual Islamic microfinance institutions, which include examples of successful and unsuccessful clients, and financial data about the performance of the institutions themselves. The case studies include institutions from Yemen, Afghanistan, Pakistan, India and Bangladesh, Indonesia, Sudan, Somalia, Kyrgyzstan, Palestine, and Kosovo. The case study institutions are between them using a wide range of Shari'ah-compliant financing methods, which include pure interest-free loans, profit-sharing products and a variety of other tools, including micro-savings as well as micro-debt. In the accompanying commentary the editors critically examine the performance of the fifteen institutions and demonstrate how Islamic methods can efficiently satisfy the needs of some types of client but not all. It asks which types of products are affordable and beneficial, for which purposes and for whom. This book is essential reading by all those interested in microfinance and development in the Muslim world, including researchers and students, practitioners of microfinance, NGOs and multi-lateral and bi-lateral development agencies, and staff of development banks.

The Book of Dede Korkut is a collection of twelve stories set in the heroic age of the Oghuz Turks, a nomadic tribe who had journeyed westwards through Central Asia from the ninth century onwards. The stories are peopled by characters as bizarre as they are unforgettable: Crazy Karchar, whose unpredictability requires an army of fleas to manage it; Kazan, who cheerfully pretends to necrophilia in order to escape from prison; the monster Goggle-eye; and the heroine Chichek, who shoots, races on horseback and wrestles her lover. Geoffrey Lewis's classic translation retains the odd and oddly appealing style of the stories, with their mixture of the colloquial, the poetic and the dignified, and magnificently conveys the way in which they bring to life a wild society and its inhabitants. This edition also includes an introduction, a map and explanatory notes.

Exercise training provokes widespread transformations in the human body, requiring coordinated changes in muscle composition, blood flow, neuronal and hormonal signaling, and metabolism. These changes enhance physical performance, improve mental health, and delay the onset of aging and disease. Understanding the molecular basis of these changes is therefore important for optimizing athletic ability and for developing drugs that elicit therapeutic effects. Written and edited by experts in the field, this collection from Cold Spring Harbor Perspectives in Medicine examines the biological basis of exercise from the molecular to the systemic levels. Contributors discuss how transcriptional regulation, cytokine and hormonal signaling, glucose metabolism, epigenetic modifications, microRNA profiles, and mitochondrial and ribosomal functions are altered in response to exercise training, leading to improved skeletal muscle, hippocampal, and cardiovascular function. Cross talk among the pathways underlying tissue-specific and systemic responses to exercise is also considered. The authors also discuss how the understanding of such molecular mechanisms may lead to the development of drugs that mitigate aging and disease. This volume will therefore serve as a vital reference for all involved in the fields of sports science and medicine, as well as anyone seeking to understand the molecular mechanisms by which exercise promotes whole-body health.
