Harper's Weekly

The CEO Handbook to cover the innovations and new developments in the textile machinery. This feature shall be a voice through which the machinery companies can narrate their story of innovations. They can present their innovative machineries and new development to the textile leaders through the medium of this print feature that will be circulated to CEOs and top decision makers of textile companies within India and South East Asia. This feature will not only render visibility to their innovations but also act as a positive catalyst of success. In today's world, textile manufacturers need to keep upgrading their machineries to stay competitive. In fact, it is the latest machinery that drives the growth of the textile and garment industry by providing efficiency and optimisation in production. To meet customers' demands and needs, global leaders in textile machineries strive hard to come up with innovative and more efficient textile machines. The newer machines are intelligently designed to give maximum quality and optimum economic efficiency with outstanding features. The trends in shipments of machineries give an indication of which machineries are in demand. Shipments of flat-knitting machines rose by 52 per cent, while deliveries of shuttle-less looms increased by 14 per cent year-on-year in 2015, according to the 38th annual International Textile Machinery Shipment Statistics (ITMSS) released by the International Textile Manufacturers Federation (ITMF). On the other hand, shipments in some textile machinery segments experienced declines in 2015. Deliveries of new short-staple spindles fell by nearly 8 per cent from 2014 to 2015. Shipped long-staple spindles and open-end rotors decreased by 61 per cent and 6 per cent, respectively. The number of shipped draw texturing spindles fell by 26 per cent and shipments for new circular knitting machines by 6 per cent year-on-year. However, 2015 was a very good year for the segment of electronic flat knitting machines as global shipments grew by 52 per cent to 70,100 machines, the highest level since 2011. Not surprisingly, Asia received the highest share of shipments (93 per cent). China remained the world's largest investor for flat knitting machines in 2015. Thereby, Chinese investments increased from 19,000 units to 35,500 units. But, due to rising labour and production costs, textile and garment manufacturing is shifting, to a certain extent, from China. As a result, new plants are being set up in other countries, especially in Asia and Africa. This is where the new machineries would be in demand. 'Innovations in Machinery — The CEO Handbook' tries to explain the advantages of various machines that will help technocrats in choosing the right machine. This volume is a collection of top most companies that inform readers about the latest innovations in textile machinery. It presents some of the leading machinery entrepreneurs from different textile verticals who have contributed to the textile industry with their innovations. New technologies and techniques in textile production are sure to draw the attention of top textile technocrats. Going beyond, this volume attempts to give a glimpse of the future of textile machinery and production. This handbook will reach the top technocrats in the textile and apparel organisations throughout the world. It will serve as an extensive source of information regarding upcoming technologies

and innovations in the global textile machinery industry.

Machine-quilting pro Lori Kennedy has taught hundreds of quilters how to start and, more importantly, how to improve their machine quilting. Now she's packed her vast knowledge, and more than 150 up-close photos, into 25 hands-on lessons you can turn to anytime you need guidance. Each lesson has a practice session and questions to help you evaluate what worked and where you may need a bit more practice. Whether you stitch your way through a lesson a day or save them for weekend quilting time, you'll soon be building skills and confidence, and quilting your projects with ease. You'll learn: Why it's important to start doodling (page 19) How to prevent drag or resistance when quilting a big quilt (page 44) When to mark, and ways to avoid marking pitfalls (page 72) How to create focal points and contrast with your quilting (page 116)

Do you want to learn free machine thread sketching and thread painting, but have no idea where to begin? Are you frustrated that no-one tells you the basics? Do you want tools and techniques explained clearly and methodically? Tired of wasting hours searching for simple answers? Do you want a handy reference tool by your side? This guide covers everything the beginner needs for free machine embroidery, thread sketching and thread painting: Equipment and Tools Machine Needles-which ones to use Thread for Thread Sketching Setting up your Machine for Free Motion Stitching Understanding Tension Fabric All about Stabilizers Stitch Basics Puckering (and How to Avoid It!) Free Bonus! 6 Free Projects to help you get started! Creative Thread Sketching: A Beginner's Guide Begin an exciting journey into drawing and painting with thread and sewing machine. You'll be guided through the 'start-up' phase of thread sketching, thread painting and free machine embroidery, and introduced to some more advanced techniques. After years of working in the creative arts, teaching and guiding people through techniques from basic to advanced, Deborah is ready to offer this complete guide that reveals everything you need to know as a beginner. You can do it, even if you're a complete novice! Frustratingly, the basics are so often glossed over, leaving your creative mind with a rich palette of ideas, but absolutely no idea where to begin, or how to solve some of those pesky little problems that face us all from time to time. This book will answer your questions and solve your problems. Take the first step towards mastering the arts of thread sketching and thread painting. Scroll to the top of this page and click the 'BUY NOW' button NOW! About the Author Australian textile and digital artist, teacher, writer and musician, Deborah Wirsu, shares how to make wonderful thread sketched and thread painted textile art, offering creative ideas, easy-to-follow advice, along with informative tips, tutorials and online classes. Early forays into a range of sewing and textile arts and crafts led, over time, to a fascination with 'painting' with thread, creating visually appealing works of art using surprisingly easy-to-master techniques. As long as you can use a sewing machine, you can learn to draw and paint with thread. Deborah's work has been exhibited and sold worldwide, and her passion for teaching online has allowed her to reach out to thousands of students around the globe. Other business pursuits and interests involve Classical Music, and Proofreading, Editing and Writing.
