History of the United States (Reproducible Study Guides for Online learning) comes with a series of worksheets that can be used in conjunction with online sources to guide students through significant events in American history, from the explorations of Christopher Columbus in 1492 to major historical events of the 21st Century. The guides provide a rich amount of information about the historical events, while also requiring students to use online resources to answer the specific questions, whether it be by watching the suggested videos or by using other sources of online information. Maps, photographs, and historical paintings are also provided on the guides to give students a visual depiction of events as they unfold. Students will learn how the United States became a nation of its own and expanded from the 13 original colonies to the 50 present-day states. Major wars involving the United States will be covered, as well as the formation of the United Nations, which strives to prevent wars from happening through peaceful resolutions. Certain questions even require students to make their own assessments of certain historical events, such as whether or not they feel the Iraq War was justified, and several essay suggestions are also included throughout the book. The final worksheet is used to familiarize students with some noteworthy inventors, both American and non-American. (Please see the table of contents for a complete list of topics included in this study guide.) For the benefit of teachers, an answer key has been provided at the back of the book. In addition, specially designed computer-based tests to assess a student's knowledge of these study guides are available by visiting the website of Habakkuk Educational Materials at the address below.<https://www.habakkuk.net/>

From the creator of the hit TV series *The Bold Type* comes an empowering and heartfelt novel about a future female president in her senior year of high school. Ava, CJ, Jordan, and Martha (listed in alphabetical order out of fairness) have been friends since kindergarten. Now they're in their senior year, facing their biggest fears about growing up and growing apart. But there's more than just college on the horizon. One of these girls is destined to become the president of the United States. The mystery, of course, is which girl gets the gig. Is it Ava, the picture-perfect artist who's secretly struggling to figure out where she belongs? Or could it be CJ, the one who's got everything figured out...except how to fix her terrible SAT scores? Maybe it's Jordan, the group's resident journalist, who knows she's ready for more than their small Ohio suburb can offer. And don't overlook Martha, who will have to overcome all the obstacles that stand in the way of her dreams. This is the story of four best friends who have one another's backs through every new love, breakup, stumble, and success--proving that great friendships can help young women achieve anything...even a seat in the Oval Office.

These topics are covered: - How to get college-ready and admissions-ready; - Benefits of community colleges and public - colleges; - Selective admissions factors and expectations; - Activities, internships and sports; - Practice for standardized tests and subject tests; - Application checklists and procedures; - Financial aid and cost comparisons; - Meeting admissions officials; and - Essays and interviews. But the great options of public colleges aren't neglected, as the benefits of community colleges, public honors colleges, tuition discounts in nearby states, affordable regional colleges and flagship universities are explained. Finances and financial aid are covered, with estimates of what to expect from both public and private colleges, with examples for various household income levels. Students and parents will find advice on how to meet admissions staff. Learn how to build an impressive record based on what the colleges are looking for. Students will find practical advice on how to make the best impression with their attire, conversational interactions, paperwork and correspondence. Learn which questions to ask and how to best convey your story, while knowing what things to avoid doing (and there are a few). High school guidance counselors will like the reference information on testing (test by test, 8th grade to 12th grade, in reference summary pages) and admissions statistics. The book covers test schedules, reporting, fees, fee waivers, test cancellation procedures, information websites, admissions events, admissions statistics for 120 colleges in one spot (the publisher looked them up and calculated them so you don't have to). See about fine print admissions details, like the lowest test scores for admissions at a college. The Starter Guide to College for Clueless Students & Parents is a good value. It doesn't have to be read all at once, but can guide a student and the parents as time passes, even loaned to others.
