ÊIf my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight polesÑthat is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.

A guide to weight loss is designed to address the psychological aspects of overeating that cannot be resolved through diet and exercise, drawing on 20 years of clinical and personal experience to counsel readers on how to nurture the body with whole foods and hunger-balancing activities. Original.

Here is the concise, hands-on guide to troubleshooting and repairing foundations* Covers expansive soil conditions, problems, and control solutions* Repair, troubleshooting, and failure issues* Highly accessible, with very little math and theory

"The Thomas Jefferson School of Law originated in the 1960s as the San Diego branch campus of a for-profit, non-ABA accredited Orange County law school that served principally part-time evening students. Although it was proud of educating working adults and produced some outstanding alumni, its attrition rates ranged between 50 and 75 percent and its pass rate on the California bar exam sometimes fell below 25 percent. In a half dozen years during the 1990s, the law school radically transformed itself. It separated from its parent, adopted a new name, became the first for-profit law school to gain ABA accreditation, and converted to a nonprofit. Admissions applications soared tenfold resulting in a nationally based student body second in California only to Stanford's for geographic diversity, the academic dismissal rate dropped below 10 percent and its California bar pass rate climbed above 75 percent. Graduates received offers from prestigious law firms in New York, Los Angeles and other cities. The law school was ranked 5th in the nation for the quality of academic life and 55th worldwide for the number of its faculty publications downloaded by scholars and practitioners. This story demonstrates what can be achieved through a commitment to excellence and a belief that people matter."--Page [4] of cover.
