that the reader can begin with the mineralogy and textural properties of sands and sandstones, progress through their organization and classification and their study as a body of rock, to consideration of their origin-prove nance, transportation, deposition, and lithification-and finally to their place in the stratigraphic column and the basin. The last decade has seen the rise of facies analysis based on a closer look at the stratigraphic record and the recognition of characteristic bed ding sequences that are the signatures of some geologic process-such as a prograding shallow-water delta or the migration of a point bar on an alluvial floodplain. The environment of sand deposition is more closely determined by its place in such depositional systems than by criteria based on textural characteristics-the "fingerprint"

Tom Petty, illustrated biography.

From the theme of the lost father-figure in stories, 'Fathers and Sons' and 'Nameless,' to the openness of sexual relationships in the 'Orgy' and 'Two men and a plan', O Thiam Chin daringly explores the contrasting and contemplative facets of daily living and experience in Singapore. With boldness and ingenuity, he juxtaposes real-life events with a touch of fictional narrative in 'Crash and Burn,' 'Suicide Bomber' and 'Another Day in the Life of a Domestic Helper,' and illuminates the secret lives hidden behind these events.
