This complete self-study course on coding combines content, practice, and self-assessment into one online learning tool that the learner can follow at his or her own pace. The online program assumes the role of instructor, guiding individuals through the material and directing them when to read relevant sections from the text, checking their comprehension along the way, and providing feedback and encouragement. Users follow the program and learn at their own pace, working through chapter "lesson lectures" and reading assigned sections of the text as they progress. Interactive exercises, questions, and activities allow users to check their comprehension and learn from immediate feedback. Illustrations clarify concepts and familiarize students with the clinical procedures they are learning to code. Chapter exams are scored and incorporated in a grade book, which users can view to evaluate their progress. A series of approximately 18 SlideShows with audio narration explain and demonstrate clinical procedures. Hypertext links incorporated into the lesson lectures open pop-up boxes with further explanations and/or definitions of concepts and terms. Links to relevant web sites provide additional resources to enhance learning or stimulate discussion within a cohort group. An extensive glossary of approximately 650 terms provides correct definition for key terms throughout the course. All content has been updated to current industry standards; for use with Step-by-Step Medical Coding, 5th Edition ensuring that students learn from the most up-to-date material available. Each online chapter includes engaging "lesson lectures" by the author, guiding the learner through the online and text content. Interspersed self-comprehension questions, learning activities, and lesson quizzes throughout the online content allow learners to check their comprehension and learn from feedback. End-of-chapter review and self-assessment exercises include a specially created case-based coding activity, as well as matching, fill-in-the-blank, and multiple choice. Answers to the textbook exercises allow students to check their work on the exercises printed in the text against the answers posted within the course.

While the vast majority of providers never intend to commit fraud or file false claims, complex procedures, changing regulations, and evolving technology make it nearly impossible to avoid billing errors. For example, if you play by HIPAA's rules, a physician is a provider; however, Medicare requires that the same physician must be referred to as a supplier. Even more troubling is the need to alter claims to meet specific requirements that may conflict with national standards. Far from being a benign issue, differing guidelines can lead to false claims with financial and even criminal implications. Compliance for Coding, Billing & Reimbursement, Second Edition: A Systematic Approach to Developing a Comprehensive Program provides an organized way to deal with the complex coding, billing, and reimbursement (CBR) processes that seem to force providers to choose between being paid and being compliant. Fully revised to account for recent changes and evolving terminology, this unique and accessible resource covers statutorily based programs and contract-based relationships, as well as ways to efficiently handle those situations that do not involve formal relationships. Based on 25 years of direct client consultation and drawing on teaching techniques developed in highly successful workshops, Duane Abbey offers a logical approach to CBR compliance. Designed to facilitate efficient reimbursements that don't run afoul of laws and regulations, this resource – Addresses the seven key elements promulgated by the OIG for any compliance program Discusses numerous types of compliance issues for all type of healthcare providers access to online resources that provide continually updated information Cuts through the morass of terminology and acronyms with a comprehensive glossary Includes a CD-ROM packed with regulations and information In addition to offering salient information illustrated by case studies, Dr. Abbey provides healthcare providers and administrators, as well as consultants and attorneys, with the mindset and attitude required to meet this very real challenge with savvy, humor, and perseverance.

Recoup lost time and revenue with denials management and appeals know-how. Claim denials can sink a profit margin. And given the cost of appeals, roughly \$118 per claim, not all denials can be reworked. A practice submitting 50 claims a day at an average reimbursement rate of \$200 per claim should bring in \$10,000 in daily revenue. But if 10% of those claims are denied, and the practice can only appeal one, they lose \$800 per day—upwards of \$200K annually. Your medical claims are the lifeblood of operations. Don't compromise your financial health. Learn how to preempt denials with the Denials Management & Appeals Reference Guide. This vital resource will equip you to get ahead of payers by simplifying the leading causes of denials and showing you how to address insufficient documentation, failing to establish medical necessity, coding and billing errors, coverage stipulations, and untimely filing. Rely on AAPC to walk you through the appeal process. We'll help you establish protocols to avoid an appeals backlog and teach you how to identify and prioritize denials likely to win an appeal. What's more, you'll learn when a claim can be "reopened" to fix a problem. Collect the revenue your practice deserves with effective denials and appeals solutions: Know how to analyze your denials Defeat documentation and compliance issues for successful claims success Utilize payer policy for coverage clues Lock in revenue with face-to-face reimbursement guidance Refine efforts to avoid E/M claim denials Ace ICD-10 coding for optimum reimbursement Put an end to modifier confusion Stave off denials with CCI edits advice Navigate the appeals process like a pro And much more!

Medical Terminology and Anatomy for ICD-10 Coding integrates expanded anatomy, physiology, and pharmacology coverage with the latest medical terminology you need to correctly code in ICD-10. The ICD-10-CM classification system serves as the structure for organizing diseases and disorders, with carefully drawn, well-labeled illustrations to help you visualize the associated anatomy. ICD-10 coding guidelines and notes, along with electronic medical records and integrated exercises are interspersed throughout the text. A robust Evolve site includes games, activities, and animations to reinforce learning. Medical terminology specifically tailored to ICD-10-CM and ICD-10-PCS guidelines supply you with an excellent foundation for learning the medical terminology related to ICD-10-CM. Learn all the anatomy and physiology necessary to be able to understand medical reports and code accurately in ICD-10-CM/PCS. Pathology terms organized by ICD-10 disease and disorder categories let you learn terms in the same order they are presented in the coding manual. Guideline Alert! boxes highlight ICD-10-PCS coding information when relevant to medical terminology. Special Notes boxes present ICD-10 features that affect your understanding of the terminology presented. Root operation tables illustrate the root operations in PCS and their associated suffixes. Body Part key provides a complete list of body parts and how they should be coded in ICD-10. Pathology and procedure terminology tables list the word parts for each term, along with the definition so you become familiar with prefixes, suffixes, and combining forms. Exercises interspersed throughout the text encourage you to practice and learn as you move through the material. Be Careful! boxes warn you about similar and potentially confusing word parts and medical terms. Games and activities on accompanying Evolve website offer an easily accessible source for extra interactive practice and learning. Electronic medical record format illustrates the appearance of electronic records now being used in many healthcare settings. NEW! Pharmacology in each body system and a Pharmacology Basics appendix help you recognize drugs and medications in medical reports. NEW! More than 50 new images bring terminology to life. NEW! Additional procedural terms supply a more complete picture of the number and kind of procedures you will encounter on medical reports. NEW! Normal Lab Values appendix familiarizes you with normal and abnormal lab values so you know when to search a medical record for possible additional diagnoses. NEW! Tablet and mobile-optimized Evolve activities offer an easily accessible source for extra interactive practice and learning.

Today's fast-paced and constantly changing health-care environment demands that you find the answers you need quickly and easily. This brand-new approach to billing and coding teaches you the who, what, why, when, and how of proper diagnostic and procedural coding, claim form completion, and medical recordkeeping.

Medical Insurance is designed around the revenue cycle with each part of the book dedicated to a section of the cycle followed by case studies to apply the skills discussed in each section. The revenue cycle now follows the overall medical documentation and revenue cycle used in practice management/electronic health records environments and applications. Because of the mandate to the healthcare industry to adopt ICD-10-CM/PCS on October 1, 2015, you must work to gain expertise using this coding system. For this reason, ICD-10 is the diagnostic coding system taught and exemplified in Medical Insurance: A Revenue Cycle Process Approach.

ICD-10-CM 2019: The Complete Official Codebook provides the entire updated code set for diagnostic coding. This codebook is the cornerstone for establishing medical necessity, determining coverage and ensuring appropriate reimbursement.
