

French Wine Guide Book

The remarkable untold story of France's courageous, clever vinters who protected and rescued the country's most treasured commodity from German plunder during World War II. "To be a Frenchman means to fight for your country and its wine." -Claude Terrail, owner, Restaurant La Tour d'Argent In 1940, France fell to the Nazis and almost immediately the German army began a campaign of pillaging one of the assets the French hold most dear: their wine. Like others in the French Resistance, winemakers mobilized to oppose their occupiers, but the tale of their extraordinary efforts has remained largely unknown-until now. This is the thrilling and harrowing story of the French wine producers who undertook ingenious, daring measures to save their cherished crops and bottles as the Germans closed in on them. Wine and War illuminates a compelling, little-known chapter of history, and stands as a tribute to extraordinary individuals who waged a battle that, in a very real way, saved the spirit of France.

This comprehensive wine atlas leaves no centimeter of terroir unexplored. After a thorough introduction to France, French winemaking and the concept of terroir, Jefford (Wine Tastes Wine Styles) gets to the heart of the matter with lengthy chapters on each of France's 14 regions. Each of these consists of an overview of the region and its history, profiles of the

area's major winemakers, a description of the land and listings and descriptions of the local wineries. Some of the latter are lengthy, while others are brief, but all include an address and phone number, making this book useful as a guidebook as well. Jefford is refreshingly opinionated: the Loire Valley is in the throes of a "long and refined stone age," while Zind-Humbrecht in Alsace is the domain "most emblematic of the New France as a whole." The effort here is encyclopedic, but the writing rises above the usual dry discussion, comparing the quest to understand Burgundy to doing crossword puzzles. Even the most matter-of-fact information is presented with a certain flair: in a description of the Rhone Valley, Jefford explains that the area's mistral wind is both destructive and useful, in that it blows away "fugs and fungal diseases." Numerous maps and photographs-including portraits of the winemakers profiled-and a full list of vintages round out this entertaining addition to its field.

Robert V. Camuto's interest in wine turned into a passion when he moved to France and began digging into local soils and cellars. Corkscrewed recounts Camuto's journey through France's myriad regions and how the journey brought about a profound change in everything he believed about wine. The world of great wines was once dominated by great Bordeaux ch'teaux. As those ch'teaux were bought up by moguls and international corporations, the heart of French winemaking moved into the realm of small producers, whose wines reflect the stunning diversity of regional environment, soil, and culture terroir. In this book we follow Camuto across France as he works harvesting grapes in Alsace, learns about wine and bombs in Corsica, and eats and drinks his way through the world's greatest bacchanalia in Burgundy. Along the route he discovers a new generation of winemakers who have rejected chemicals, additives, and technologically altered wines. His book charts an odyssey into this new world of French wine, a world of biodynamic winegrowing, herbal treatments, lunar cycles, and grape varieties long ago dismissed as difficult. A celebration of the

diversity that makes French wine more than a mere commodity, Camuto's work is a delightful look beyond the supermarket to the various flavors offered by the true vintners of France.

A Natural Wine-Soaked Memoir

From the publisher of Pipette Magazine, discover a natural wine-soaked memoir about finding your passion—and falling in love. It was Rachel Signer's dream to be that girl: the one smoking hand-rolled cigarettes out the windows of her 19th-century Parisian studio apartment, wearing second-hand Isabel Marant jeans and sipping a glass of Beaujolais redolent of crushed roses with a touch of horse mane. Instead she was an under-appreciated freelance journalist and waitress in New York City, frustrated at always being broke and completely miserable in love. When she tastes her first p é tillant-naturel (p é t-nat for short), a type of natural wine made with

no additives or chemicals, it sets her on a journey of self-discovery, both deeply personal and professional, that leads her to Paris, Italy, Spain, Georgia, and finally deep into the wilds of South Australia and which forces her, in the face of her "Wildman," to ask herself the hard question: can she really handle the unconventional life she claims she wants? Have you ever been sidetracked by something that turned into a career path? Did you ever think you were looking for a certain kind of romantic partner, but fell in love with someone wild, passionate and with a completely different life? For Signer, the discovery of natural wine became an introduction to a larger ethos and philosophy that she had long craved: one rooted in egalitarianism, diversity, organics, environmental concerns, and ancient traditions. In *You Had Me at P é t-Nat*, as Signer begins to truly understand these revolutionary wine producers upending the industry, their deep commitment to making their wine with integrity and with as little intervention as possible, she is smacked with the realization that unless she faces, head-on, her own issues with commitment, she will not be able to live a life that is as freewheeling, unpredictable, and singular as the wine she loves.

Wine drinking culture in France has traditionally been a source of pride for the French and in an age of concerns about the dangers of 'binge-drinking', a major cause of jealousy for the British. Wine drinking and the culture associated with it are, for many, an essential part of what it means to be French, but they are also part of a national construction. Described by some as a national product, or as a 'totem drink', wine and its attendant cultures supposedly characterise Frenchness in much the same way as being born in France, fighting for liberty or speaking French. Yet this traditional picture is now being challenged by economic, social and political forces that have transformed consumption patterns and led to the fragmentation of

wine drinking culture.

For the second year, the new edition of the Gilbert & Gaillard Wine Guide is available in English for wine lovers all over the world. Over the past twenty years, The Gilbert & Gaillard Wine Guide has built a solid reputation in France. The reason it's so successful is simple: all the wines presented are tasted according to the same protocol, ensuring a rigorous and impartial selection. The samples

that are sent by the producers are blind tasted by Gilbert & Gaillard and their team. There are more than five thousand wines selected, along with their wine comments, their notes, and recommendations on how to serve them. All the crus class and the most prestigious wines are present, but there are also many smaller less well-known wine growers to discover too. Each wine-growing region is represented along with a detailed map. The Gilbert & Gaillard Wine Guide is the essential guide to discovering French wines.

A tour of the French winemaking regions to illustrate how the soil, underlying bedrock, relief, and microclimate shape the personality of a wine. For centuries, France has long been the world's greatest wine-producing country. Its wines are the global gold standard, prized by collectors, and its winemaking regions each offer unique tasting experiences, from the spice of Bordeaux to the berry notes of the Loire Valley. Although grape variety, climate, and the skill of the winemaker are essential in making good wine, the foundation of a wine's character is the soil in which its

grapes are grown. Who could better guide us through the relationship between the French land and the wine than a geologist, someone who deeply understands the science behind the soil? Enter scientist Charles Frankel. In Land and Wine, Frankel takes readers on a tour of the French winemaking regions to illustrate how the soil, underlying bedrock, relief, and microclimate shape the personality of a wine. The book's twelve chapters each focus in-depth on a different region, including the Loire Valley, Alsace, Burgundy, Champagne, Provence, the Rhône valley, and Bordeaux, to explore the full meaning of terroir. In this approachable guide, Frankel describes how Cabernet Franc takes on a completely different character depending on whether it is grown on gravel or limestone; how Sauvignon yields three different products in the hills of Sancerre when rooted in limestone, marl, or flint; how Pinot Noir will give radically different wines on a single hill in Burgundy as the vines progress upslope; and how the soil of each château in Bordeaux has a say in the blend ratios of

Merlot and Cabernet-Sauvignon. Land and Wine provides a detailed understanding of the variety of French wine as well as a look at the geological history of France, complete with volcanic eruptions, a parade of dinosaurs, and a menagerie of evolution that has left its fossils flavoring the vineyards. Both the uninitiated wine drinker and the confirmed oenophile will find much to savor in this fun guide that Frankel has spiked with anecdotes about winemakers and historic wine enthusiasts—revealing which kings, poets, and philosophers liked which wines best—while offering travel tips and itineraries for visiting the wineries today.

Announcing the completely revised and updated edition of The Wine Bible, the perennial bestselling wine book praised as “The most informative and entertaining book I’ve ever seen on the subject” (Danny Meyer), “A guide that has all the answers” (Bobby Flay), “Astounding” (Thomas Keller), and “A magnificent masterpiece of wine writing” (Kevin Zraly). Like a lively course from an expert teacher, The Wine Bible

grounds the reader deeply in the fundamentals while layering on informative asides, tips, amusing anecdotes, definitions, glossaries, photos (all new for this edition), maps, labels, and recommended bottles. Karen MacNeil's information comes directly through primary research; for this second edition she has tasted more than 10,000 wines and visited dozens of wine regions around the world. New to the book are wines of China, Japan, Mexico, and Slovenia. And through it all the reader becomes ever more informed—and, because of the author's unique voice, always entertained: "In great years Pétrus is ravishing, elegant, and rich—Ingrid Bergman in red satin." Or, describing a Riesling: "A laser beam. A sheet of ice. A great crackling bolt of lightning."

A compact illustrated guide to the emerging and enormously popular category of natural wine, a style that focuses on minimal intervention, lack of additives, and organic and biodynamic growing methods. Today, wine is more favored and consumed than it's ever been in the United States—and millennials are leading the charge, drinking more wine than

*any other generation in history. Many have been pulled in by the tractor beam of natural wine--that is, organic or biodynamic wine made with nothing added, and nothing taken away--a movement that has completely rocked the wine industry in recent years. While all of the hippest restaurants and wine bars are touting their natural wine lists, and while more and more consumers are calling for natural wine by name, there is still a lot of confusion about what exactly natural wine is, where to find it, and how to enjoy it. In *Natural Wine for the People*, James Beard Award-winner Alice Feiring sets the record straight, offering a pithy, accessible guide filled with easy definitions, tips and tricks for sourcing the best wines, whimsical illustrations, a definitive list to the must-know producers and bottlings, and an appendix with the best shops and restaurants specializing in natural wine across the country, making this the must-buy and must-gift wine book of the year.*
