A provocative, strategic plan for a humane immigration system from the nation's leading immigration scholars and activists During the past decade, right-wing nativists have stoked popular hostility to the nation's foreign-born population, forcing the immigrant rights movement into a defensive posture. In the Trump years, preoccupied with crisis upon crisis, advocates had few opportunities to consider questions of long-term policy or future strategy. Now is the time for a reset. Immigration Matters offers a new, actionable vision for immigration policy. It brings together key movement leaders and academics to share cutting-edge approaches to the

urgent issues facing the immigrant community, along with fresh solutions to vexing questions of so-called “future flows” that have bedeviled policy makers for decades. The book also explores the contributions of immigrants to the nation’s identity, its economy, and progressive movements for social change. Immigration Matters delves into a variety of topics including new ways to frame immigration issues, fresh thinking on key aspects of policy, challenges of integration, workers’ rights, family reunification, legalization, paths to citizenship, and humane enforcement. The perfect handbook for immigration activists, scholars, policy makers, and anyone who cares about one of the most contentious issues of our age, Immigration Matters makes accessible an immigration policy that both remediates the harm done to immigrant workers and communities under Trump and advances a bold new vision for

As some of the authors in this book make clear - it is a theme that runs throughout this book - “carrots” and “soft law” need to be backed up by “sticks” and “hard law”. The authors of

Intelligence and Spirit Reza Negarestani formulates the ultimate form of intelligence as a theoretical and practical thought unfettered by the temporal order of things, a real movement capable of overcoming any state of affairs that, from the perspective of the present, may appear to be the complete totality of history. Intelligence pierces through what seems to be the totality or the inevitable outcome of its history, be it the manifest portrait of the human or technocapitalism as the alleged pilot of history. Building on Hegel's account of Geist as a multiagent conception of mind and on Kant's transcendental psychology as a functional analysis of the conditions of

possibility of mind, Negarestani provides a critique of both classical humanism and dominant trends in posthumanism. The assumptions of the former are exposed by way of a critique of the transcendental structure of experience as a tissue of subjective or psychological dogmas; the claims of the latter regarding the ubiquity of mind or the inevitable advent of an unconstrained superintelligence are challenged as no more than ideological fixations which do not stand the test of systematic scrutiny. This remarkable fusion of continental philosophy in the form of a renewal of the speculative ambitions of German Idealism and analytic philosophy in the form of

Created by SHAPE America – Society of Health and Physical Educators (formerly AAHPERD) – this text unveils the new National Standards for K-12 Physical Education. The standards and text have been retooled to support students’ holistic development. This is the third iteration of the National Standards for K-12 Physical Education, and this latest version features two prominent changes:

- The term physical literacy underpins the standards. It encompasses the three domains of physical education*

(psychomotor, cognitive, and affective) and considers not only physical competence and knowledge but also attitudes, motivation, and the social and psychological skills needed for participation. • Grade-level outcomes support the national physical education standards. These measurable outcomes are organized by level (elementary, middle, and high school) and by standard. They provide a bridge between the new standards and K-12 physical education curriculum development and make it easy for teachers

to assess and track student progress across grades, resulting in physically literate students. In developing the grade-level outcomes, the authors focus on motor skill competency, student engagement and intrinsic motivation, instructional climate, gender differences, lifetime activity approach, and physical activity. All outcomes are written to align with the standards and with the intent of fostering lifelong physical activity. National Standards & Grade-Level Outcomes for K-12 Physical Education presents the standards

and outcomes in ways that will help preservice teachers and current practitioners plan curricula, units, lessons, and tasks. The text also • empowers physical educators to help students meet the Common Core standards; • allows teachers to see the new standards and the scope and sequence for outcomes for all grade levels at a glance in a colorful, easy-to-read format; and • provides administrators, parents, and policy makers with a framework for understanding what students should know
