At the age when sexual, educational and family values are at their highest exploration point, the lives of Israeli teenage girls are interrupted. They are trained as soldiers in the Israeli Defense Forces, a rigorous institution where individuality comes second to nationalism. Under a militaristic, masculine environment engaged in daily conflict, these girls must become women. Rachel Papo, who was Serial No. 3817131, explores the personal, complex and delicate spectrum of emotions inherent in all adolescents, exposing the vulnerable side of the righteous soldier.

Updated, expanded, and covering the latest software, this new edition of the bestselling Digital Landscape Photography brings the amazing techniques pioneered by Ansel Adams and his contemporaries to every digital photographer. Ansel Adams' imagery - especially his iconic vision of the American National Parks - is widely published and instantly recognisable. Many photographers will have heard of his renowned Zone System, but that is just the tip of the iceberg; his unparalleled attention to detail, which once required hours in the darkroom with specialist tools, is finally accessible to all. Michael Frye's own photography provides many stunning examples of the results that can be achieved, and as one of Adams' natural successors in the field, he is well placed to analyse the many inspirational shots from the great masters of landscape photography. Combining the cutting edge of today's digital work with some of the best-known photos ever taken, this book a must-read for any landscape or nature photographer. After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend, and her soul makes a first step to healing.

Finally, the entire body of our scientific knowledge of the universe is available in one definitive volume. Scientific

American, the oldest and most popular science magazine in the world, has prepared the most comprehensive and comprehensible book on the subject ever. Under the direction of renowned astronomer David H. Levy, this spectacular book assembles the

best minds in science to give clear and accessible explanations of the nature of the cosmos. Newly commissioned essays by working scientists at the top of their fields and classic writings by such luminaries as Albert Einstein, Francis Crick, and Carl Sagan take us to the frontiers of space and time—from sub-atomic particles to the edge of the universe. Both thoughtful and provocative, this book asks—and answers—the big questions, such as: o How did our solar system evolve? o What forces lie at the center of the atom? o What is the size of the universe? o What is dark matter? o What is the possibility of extraterrestrial life? o What is the importance of superstrings? o How do galaxies form? Dazzling full-color and black-and-white photographs aid in articulating the latest theories about the size, age, nature, and expansion of the universe, and make this book a delight to behold. Essays are grouped by topic, from the largest phenomena, such as the formation of the universe, down to the smallest detail, such as the makeup of an atom. In addition, each section contains an illuminating introduction by David Levy that binds the essays together and creates a whole picture. The Scientific American Book of the Cosmos is a valuable addition to the bookshelf of both professional astronomers and science enthusiasts alike.

A Big Bear Romance He might growl, but she's not afraid to bite. Hands full taking care of his clan, the last thing this Kodiak bear needs is a woman poking her cute little nose into his affairs. But when she refuses to back down—and shows the courage to stand up to him—he can't resist the allure of a curvy city girl. She's mine. All mine. And when a rival clan thinks to use her to force his paw, he'll show them why you never piss off a Kodiak, or threaten what's his. Tammy is convinced all men are scum, even gorgeous ones like Reid Carver. She knows he's hiding something. Something big. She just never expected a real freaking bear hid underneath all those yummy muscles. But when the truth comes out and he tries to scare her off with a roar, she shows him not just bears have bite. Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

The full spectrum of Ansel Adams' work in a single volume, offering the largest available compilation from his legendary photographic career capturing American landscapes. The photographs are arranged chronologically into five major periods, from his first photographs made in Yosemite and the High Sierra in 1916 to his work in the National Parks in the 1940s up to his last important photographs from the 1960s. An introduction

and brief essays on selected images provide information about Adams' life, document the evolution of his technique, and give voice to his artistic vision. Few artists of any era can claim to have produced four hundred images of lasting beauty and significance. It is a testament to Adams' vision and lifetime of hard work that a book of this scale can be compiled. ANSEL ADAMS: 400 PHOTOGRAPHS is a must-have for anyone who appreciates photography and the allure of the natural world.

Providing a critical framework for the consideration of the relationship between modern social anthropology and linguistics, this volume covers topics such as classification, symbolism, and structuralism. The relevance of the works of Saussure, Lévi-Strauss and Chomsky is considered. There are two case-studies: the first outlines a 'social history' of the succession of pidgins that are documented on the West African coast, ending with Pidgin English. The second analyzes the status of three language varieties used in a 'trilingual' community in the Carnian Alps. Originally published in 1971.

Ansel Adams: 400 Photographs

A Biography

Science, Technology and Cultural Heritage

Ansel Adams (1902-1984) produced some of the 20th century's most iconic photographic images and helped nurture the art of photography through his creative innovations and peerless technical mastery. The Camera--the first volume in Adams' celebrated series of books on photographic techniques--has taught generations of photographers how to harness the camera's artistic potential. This time-honored handbook distills the knowledge gained through a lifetime in photography and remains as vital today as when it was first published. Along with visualization, image management, Adams' famous Zone System, and other keys to photographic artistry, The Camera covers 35mm, medium-format, and large-format view cameras, while offering detailed advice on camera components such as lenses, shutters, and light meters. Beautifully illustrated with photographs as well as instructive line drawings, this classic manual belongs on every serious photographer's bookshelf. "Adams is a clear-thinking writer whose concepts cannot but help the serious photographer." - New York Times "A master-class kind of guide from an undisputed master." - Publishers Weekly Over 1 million copies sold. Publisher's Note: This ebook of The Camera works best as a digital companion to the print edition. The ebook was produced by electronically scanning and digitizing a print edition, and as a result, your reading device may display images with halftone or moiré patterns. Trouble with Fate Leigh Evans My name is Hedi Peacock and I have a secret. I'm not human, and I have the pointy Fae ears and Were inner-bitch to prove it. As fairy tales go, my childhood was damn near perfect, all fur and magic until a werewolf killed my father and the Fae executed my mother. I've never forgiven either side. Especially Robson Trowbridge. He was a part-time werewolf, a full-time bastard, and the first and only boy I ever loved. That is, until he became the prime suspect in my father's death... Today I'm a half-breed barista working at a fancy coffee house, living with my loopy Aunt Lou and a temperamental amulet named Merry, and wondering where in the world I'm going in life. A pretty normal existence, considering. But when a pack of Weres decides to kidnap my aunt and force me to steal another amulet, the only one who can help me is the last person I ever thought I'd turn to: Robson Trowbridge. And he's as annoyingly beautiful as I remember. That's the trouble with fate: Sometimes it barks. Other times it bites. And the rest of the time it just breaks your heart. Again...

Cosmos DeHaag is a fast-thinking, law-bending, teenage songwriter from Seattle. In trouble with the law, he is sent to live with his conservative Christian relatives in Iowa and he splits his personality in two: William the Nice will play along, while Cosmos Coyote stays true. When he meets Cherlyn, a beautiful charismatic Christian, their passion takes them both by surprise and the lines between truth and falsehood, Cosmos and William, begin to blur. Now even Cosmos himself is unsure: is he being true when he lies, or lying when he's being true? Jim Heynen explores teenage passion and spiritual yearning in Cosmos Coyote
