There's a new fundamentals text in town. One that centers on simple language, active learning, and a fresh new way to help you truly understand, apply, and retain important nursing information and concepts. Introducing the brand new Fundamentals of Nursing text from Yost and Crawford. Written in a warm and conversational style, this innovative text starts by guiding you towards a basic understanding of the nursing profession and then logically progresses through the nursing process and into the safe and systematic methods of applying care. Each chapter features realistic case studies and critical thinking exercises woven throughout the content to help you continually apply what you've learned to actual patient care. Conceptual care maps further your ability to make clinical judgments and synthesize knowledge as you develop plans of care after analyzing and clustering related patient assessment data. All of this paired with a wealth of student-friendly learning features and clinically-focused content offers you a fundamentally different - and quite effective - way for you to easily master the fundamentals of nursing. UNIQUE! Active learning approach centers on case studies and critical thinking exercises that are woven throughout each chapter to ensure readers are able to apply chapter content to broader nursing concepts and realistic patient scenarios. UNIQUE! Simple to complex progression of information starts by guiding readers towards a basic understanding of the nursing profession and then logically progressing through the nursing process and into the safe and systematic methods of applying care. UNIQUE! Warm, conversational style devoid of repetitive discussions and unnecessary information slows down the pace of information to give readers time to critically think and master all fundamental concepts and skills. UNIQUE! Conceptual care maps require readers to develop a plan of care after analyzing and clustering related patient assessment data. This unique learning tool assists readers in the assessment phase of the nursing process and fosters your ability to make clinical judgments and synthesize knowledge about the whole patient. Learning objectives carried throughout the chapter features the objective being showcased at the start of the chapter, tied to headings throughout the chapter, and once again reinforced at the close of the chapter. Nursing Skills sections provide information on the purpose, procedures, evidence-based practice, special circumstances, and more for a variety of important nursing skills. . All supported by rationales, photos, and illustrations. Nursing Care Guidelines highlight information including background, procedural concerns, delegation concerns, and evidence-based practice) and resources to reduce risk and ensure safety for the patient and nurse. Diverse mix of clinically focused boxes are incorporated throughout each chapter. Collaboration and Delegation boxes stress the importance of effective and accurate communication between the healthcare team about a patient's condition and treatment, as well as the importance of assigning tasks appropriately. Ethical, Legal, and Professional Practice boxes explore ethical and legal dilemmas commonly faced in nursing to prepare readers to act in a professional and nonjudgmental manner while protecting patient rights. Patient Education and Health Literacy boxes stress the importance of patient education and how to deliver information in an understandable manner based on the patient's level of health literacy. Health Assessment Questions boxes illustrate how to properly ask and use assessment questions while interviewing patients. Diversity Considerations boxes prepare readers to care for and communicate with patients of diverse ages, gender, cultural, ethnic, and religious backgrounds as well as various disability and morphological characteristics. Evidence-Based Practice and Informatics boxes provide current research and resources that, combined with clinical expertise, will contribute to improved patient care outcomes. Home Care Consideration boxes highlight issues that pertain specifically to nursing practice in the non-acute care setting. Safe Practice Alert boxes underscore significant patient safety concerns while providing information to insure both patient and nurse safety. QSEN Focus boxes illustrate application of the six Quality and Safety Education for Nurses (QSEN) competencies for pre-licensure nursing students: patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics. Five-step nursing process framework is integrated throughout the text and in the clinical skills chapters. Care planning table in each clinical chapter highlights the first nursing diagnosis discussed in the chapter and connects it to the Nursing Outcomes Classification (NOC) and the Nursing Interventions Classification (NIC). [Do Not Feature] Animations are located throughout the book to enhance student learning. Numerous full-color illustrations and photos show anatomy, procedures, and methods. 10 review questions at the end of every chapter (with an additional 10 online) help readers review what you have learned and evaluate your understanding. End-of-book appendices cover abbreviations, roots, prefixes, and suffixes; NANDA-I Diagnostic Labels; NCLEX-Style Question Study Tips; and glossary terms.

Fundamental Concepts and Skills for Nursing, 5th Edition provides all the basic theoretical and applied knowledge that the LPN/LVN nurse needs to practice in an expanded number of care settings, such as the community clinic, physician's office, long-term care facility, home, and acute-care hospital setting. With an extensive art program and thorough discussion of QSEN, this text addresses topics like the physical and psychosocial needs of the patient, critical thinking for problem solving and clinical judgment, and communication - all within a strong nursing process framework. The accessible, friendly, and clear writing style appeals to students and instructors, and its rich ancillary package, including NCLEX-PN review questions, gives students an edge on learning fundamentals. Concept maps give a visual example of concepts addressed in the text, help you visualize difficult material, and illustrate how a disorder's multiple symptoms, treatments, and side effects are associated. Over 110 skills and steps, featuring sample documentation examples and Home Care Considerations boxes where appropriate, present step-by-step procedures in an action-oriented format. Life Span Considerations: The Older Adult highlight changes that occur with aging and how they affect nursing care at LPN/LVNs working in community and long-term care. Easy-to-follow reading level and text organization presents information from simple to most complex, making it perfect for lower level students and those speaking English as a second language. Numbered objectives, divided by theory and clinical practice, provide a framework for content. Cultural Considerations cover bicultural variations, as well as health promotion for specific ethnic groups, so you provide culturally competent care. Health Promotion and Patient Teaching boxes include guidelines to prevent illness, promote health, and develop self-care strategies. Nursing process framework features application of the nursing process and nursing care plans to reinforce application of the nursing process in the clinical setting. Think Critically boxes encourage you to synthesize information and apply concepts to practice. Home Care Considerations boxes highlight the necessary adaptations of nursing skills and techniques for the patient in the home care setting. Communication boxes present examples of nurse-patient dialogues and instructive therapeutic communication techniques. Over 20 nursing care plans, which include critical thinking questions at the end of the text, provide you with a model for planning patient care. Clinical chapters provide an overview of structure and function to give you a refresher in related anatomy and physiology, including a section on aging. Key terms include phonetic pronunciations, which are helpful for ESL students, and text page references to find the definition. Standard LPN Threads features include helpful characteristics such as full-color design, key terms, numbered objectives, key points, critical thinking questions, critical thinking activities, glossary, and references. NEW! Nursing Concepts and Exemplars listed for each chapter to support concept curricula. NEW! Discussion of QSEN and Highlighted Safety information provides you with the knowledge, skills, and attitudes necessary to continuously improve the quality and safety of patient care. EXPANDED! Evidence-Based Practice boxes and highlighted best practices point out the most current, evidence-based information. UPDATED! Expanded art program with original photos and line art better illustrates nursing concepts.

Building on the strengths of the fourth edition, Basic Nursing: Essentials for Practice is back in a new edition! Thoroughly updated and revised to provide a more focused and engaging presentation, this new edition offers the basic principles, concepts, and skills needed by nursing students. The five-step nursing process returns to provide a consistent, logical organizational framework, with a clear writing style and numerous learning aids. An increased emphasis on caring, along with new boxes on Focused Client Assessment and Outcome Evaluation, reflect current practice trends. This new edition is better than ever! Five-Step Nursing Process provides a consistent organizational framework. More than 40 nursing skills are presented in a clear, 2-column format with rationales for all steps. Procedural Guidelines boxes provide streamlined step-by-step instructions for performing basic skills. Growth and Development chapter and age-related considerations throughout clinical chapters help prepare students to care for clients of all ages. Sample Nursing Care Plans highlight defining characteristics in assessment data, include client goals and expected outcomes in the planning section, and provide rationales for each nursing intervention. Progressive Case Studies follow the interactions of a client and nurse throughout the chapter to illustrate steps in the nursing process and develop critical thinking skills. Brief coverage of higher level concepts including research, theory, professional roles, and management, maintains the text's focus on essential, basic content. The narrative style makes the text more engaging and appealing. Focused Client Assessment boxes provide specific guidelines for factors to assess, questions and approaches, and physical assessment. Content on delegation is discussed throughout the narrative and specific guidelines are included for each skill. Skills now include Unexpected Outcomes and Interventions to alert for potential undesirable responses and provide appropriate nursing actions. Caring in Nursing is presented in a new chapter and as a thread throughout the text. Outcome Evaluation are based on the chapter's case study and provide guidelines on how to ask questions and evaluate care based on the answers received. NIC and NOC are discussed in the Nursing Process chapter to provide an overview of these taxonomies encountered in practice. NCLEX-style multiple-choice questions at the end of each chapter help students evaluate learning.

This guide offers 5 full-length A2 practice tests just like the real exam, with answers and complete explanations for every question. The tests simulate the real exam in content, question format, and level of difficulty. Students get intensive practice with A2-style questions in English language, mathematics, and science. Features · 5 full-length sample tests that match the actual A2 exam in content, format, and level of difficulty · The only full-length A2 sample tests available outside of the official Admission Assessment Exam Review from the test-makers · The only reasonably-priced alternative to the \$39.95 official guide. · Thousands of test-takers every year

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents—in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery—such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Here - ' s all of the crucial coverage you need to succeed in class and confidently prepare for the NCLEX-RN. From nursing theory, legal and ethical issues, and leadership and management to psychological support, infection control and medication administration—easy-to-follow outlines in every chapter review exactly what you need to know.

This must-have workbook helps students learn the prioritization and delegation skills needed to survive nursing school, pass the NCLEX-RN® examination, and make the transition to practice in today's healthcare environment. Consisting of three parts plus an answer key, this resource provides numerous opportunities for students to review cases and answer questions similar to those they will see on the NCLEX-RN examination - including questions in alternate-item formats. Part 1, written by delegation expert Ruth Hansten, is an introduction that provides a practical review of clinical delegation skills and serves as a framework for the exercises that follow. Part 2 consists cases of patients who have relatively straightforward health problems followed by NCLEX examination-style questions focusing on prioritization, delegation, and assignment. Part 3 consists of complex, unfolding cases involving patients who have multiple health conditions, as well as complex patient assignments. An introduction by prioritization and delegation expert Ruth Hansten explains the importance of developing sound clinical skills and judgment in the areas of prioritization, delegation, and assignment. NCLEX-style questions help students develop fundamental skills in prioritization, delegation, and assignment and become familiar with the NCLEX examination format. Questions in Parts 2 and 3 are organized by body system and by complexity, respectively, to allow for easy use with any medical-surgical nursing text. Both sections of exercises give students essential hands-on practice in prioritizing (deciding what to do first), delegating (giving specific tasks to assistive personnel and supervising/satisfactory completion of those tasks), and assignment (giving responsibility for the overall care of particular patients to appropriate personnel). The questions in Part 3 are more complex than those in Part 2, allowing students to master core concepts using unambiguous cases before applying this knowledge to patients with more complicated, multidimensional case presentations. Flexible organization allows the workbook to be used with any Elsevier medical-surgical nursing text. The answer key provides rationales for correct as well as incorrect answers, reinforcing the concepts presented in each unit. Questions follow NCLEX style, and about 10% represent the new alternate-item question format. The workbook is three-hole punched and perforated for convenience.
