Read award-winning journalist Frank Bruni's New York Times bestseller: an inspiring manifesto about everything wrong with today's frenzied college admissions process and how to make the most of your college years. Over the last few decades, Americans have turned college admissions into a terrifying and occasionally devastating process, preceded by test prep, tutors, all sorts of stratagems, all kinds of rankings, and a conviction among too many young people that their futures will be determined and their worth established by which schools say yes and which say no. In Where You Go is Not Who You'll Be, Frank Bruni explains why this mindset is wrong, giving students and their parents a new perspective on this brutal, deeply flawed competition and a path out of the anxiety that it provokes. Bruni, a bestselling author and a columnist for the New York Times, shows that the Ivy League has no monopoly on corner offices, governors' mansions, or the most prestigious academic and scientific grants. Through statistics, surveys, and the stories of hugely successful people, he demonstrates that many kinds of colleges serve as ideal springboards. And he illuminates how to make the most of them. What matters in the end are students' efforts in and out of the classroom, not the name on their diploma. Where you go isn't who you'll be. Americans need to hear that--and this indispensable manifesto says it with eloquence and respect for the real promise of higher education.

The truth about America's elite colleges and universities—who gets in, who succeeds, and why Against the backdrop of today's increasingly multicultural society, are America's elite colleges admitting and successfully educating a diverse student body? No Longer Separate, Not Yet Equal pulls back the curtain on the selective college experience and takes a rigorous and comprehensive look at how race and social class impact each stage—from application and admission, to enrollment and student life on campus. Arguing that elite higher education contributes to both social mobility and inequality, the authors investigate such areas as admission advantages for minorities, academic achievement gaps tied to race and class, unequal burdens in paying for tuition, and satisfaction with college experiences. The book's analysis is based on data provided by the National Survey of College Experience, collected from more than nine thousand students who applied to one of ten selective colleges between the early 1980s and late 1990s. The authors explore the composition of applicant pools, factoring in background and "selective admission enhancement strategies"—including AP classes, test-prep courses, and extracurriculars—to assess how these strengthen applications. On campus, the authors examine roommate choices, friendship circles, and degrees of social interaction, and discover that while students from different racial and class circumstances are not separate in college, they do not mix as much as one might expect. The book encourages greater interaction among student groups and calls on educational institutions to improve access for students of lower socioeconomic status. No Longer Separate, Not Yet Equal offers valuable insights into the intricate workings of America's elite higher education system.

The Admissions brilliantly captures the frazzled pressure cooker of modern life as a seemingly perfect family comes undone by a few desperate measures, long-buried secret ðand college applications! The Hawthorne family has it all. Great jobs, a beautiful house in one of the most affluent areas of Northern California, and three charming kids whose sunny futures are all but assured. And then comes their eldest daughter’s senior year of high school . . . Firstborn Angela Hawthorne is a straight-A student and star athlete, with extracurricular activities coming out of her ears and a college application that’s not going to write itself. She’s set her sights on Harvard, her father’s alma mater, and like a dog with a chew toy, Angela won’t let up until she’s basking in crimson-colored glory. Except her class rank as valedictorian is under attack, she’s suddenly losing her edge at cross-country, and she can’t help but daydream about a cute baseball player. Of course Angela knows the time put into her schoolgirl crush would be better spent coming up with a subject for her English term paper—which, along with her college essay, has a rapidly approaching deadline. Angela’s mother, Nora, is similarly stretched to the limit, juggling parent-teacher meetings, carpool, and a real estate career where she caters to the mega-rich and super-picky buyers and sellers of the Bay Area. The youngest daughter, second-grader Maya, still can’t read; the middle child, Cecily, is no longer the happy-go-lucky kid she once was; and their dad, Gabe, seems oblivious to the mounting pressures at home because a devastating secret of his own might be exposed. A few ill-advised moves put the Hawthorne family on a collision course that’s equal parts achingly real and delightfully screwball—and they learn that whatever it cost to get their lucky lives it may cost far more to keep them. Sharp, topical, and wildly entertaining, The Admissions shows that if you pull at a loose thread, even the sturdiest lives start to unravel at the seams of high achievement.

**An “invaluable” memoir by a counselor who left the elite private-school world to help poor and working-class kids get into college (Washington Monthly). Winner of the Studs and Ida Terkel Award Joshua Steckel left an elite Manhattan school to serve as the first-ever college guidance counselor at a Brooklyn public high school—and has helped hundreds of disadvantaged kids gain acceptance. But getting in is only one part of the drama. This riveting work of narrative nonfiction follows the lives of ten of Josh’s students as they navigate the vast, obstacle-ridden landscape of college in America, where students for whom the stakes of education are highest find unequal access and inadequate support. Among the students we meet are Mike, who writes his essays from a homeless shelter and is torn between his longing to get away to an idyllic campus and his fear of leaving his family in desperate circumstances; Santiago, a talented, motivated, and undocumented student, who battles bureaucracy and low expectations as he seeks a life outside the low-wage world of manual labor; and Ashley, who pursues her ambition to become a doctor with almost superhuman drive—but then forges a path that challenges received wisdom about the value of an elite liberal arts education. At a time when the idea of “college for all” is hotly debated, this book uncovers, in heartrending detail, the ways the American education system fails in its promise as a ladder to opportunity—yet provides hope in its portrayal of the intelligence, resilience, and everyday heroics of young people whose potential is too often ignored. “A profound examination of the obstacles faced by low-income students . . . and the kinds of reforms needed to make higher education and the upward mobility it promises more accessible.” —Booklist**
