Industrial Hygiene is  
divided into three

section focuses on  
chemical hazards,  
presenting the basics  
of toxicology, the  
problems of skin  
contact and inhalation,  
the detection and  
control of airborne  
contaminants, and the

part describes a range of industries that are major sources of both employment and potential injury, and it applies the principles outlined in the first two parts. At the end of each chapter, the material covered is summarized in a Key Points section. References are provided both to
