Capitalist Nigger is an explosive and jarring indictment of the black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive race, a consumer race that depends on other communities for its culture, its language, its feeding and its clothing. Despite enormous natural resources, blacks are economic slaves because they lack the 'devil-may-care' attitude and the 'killer instinct' of the Caucasian, as well as the spider web mentality of the Asian. A Capitalist Nigger must embody ruthlessness in pursuit of excellence in his drive towards achieving the goal of becoming an economic warrior. In putting forward the idea of the Capitalist Nigger, Chika Onyeani charts a road to success whereby black economic warriors employ the 'Spider Web Doctrine' - discipline, self-reliance, ruthlessness - to escape from their victim mentality. Born in Nigeria, Chika Onyeani is a journalist, editor and former diplomat.

The Truth About Managing People offers real solutions for the make-or-break problems faced by every manager. This new, even better edition contains 10 brand new rules to take you further, faster. In Wired to Care, top business strategist Dev Patnaik tells the story of how organizations of all kinds prosper when they tap into a power each of us already has: empathy, the ability to reach outside of ourselves and connect with other people. When people inside a company develop a shared sense of what's going on in the world, they see new opportunities faster than their competitors. They have the courage to take a risk on something new. And they have the gut-level certitude to stick with an idea that doesn't take off right away. People are Wired to Care, and many of the world's best organizations are, too.

Fundamentals of Investments was written to: 1. Focus on students as investment managers, giving them information they can act on instead of concentrating on theories and research without the proper context. 2. Offer strong, consistent pedagogy, including a balanced, unified treatment of the main types of financial investments as mirrored in the investment world. 3. Organize topics in a way that makes them easy to apply--whether to a portfolio simulation or to real life--and support these topics with hands-on activities. The approach of this text reflects two central ideas. First, there is a consistent focus on the student as an individual investor or investments manager. Second, a consistent, unified treatment of the four basic types of financial instruments--stocks, bonds, options, and futures--focusing on their characteristics and features, their risks and returns, and the markets in which they trade.

Fundamentals of Investments is aimed at the introductory investments class with students who have relatively little familiarity with investments. The text is written in a relaxed, informal style that engages the student and treats him or her as an active participant rather than a passive information absorber. Fundamentals appeals to intuition and basic principles whenever possible because the authors found that this approach effectively promotes understanding. The text also makes extensive use of examples, drawing on material from the world around us and using familiar companies wherever appropriate. Throughout, the text strikes a balance by introducing and covering the essentials while leaving some of the details to follow-up courses. Topics are organized in a way that would make them easy to apply—whether to a portfolio simulation or to real life—and support these topics with hands-on activities. This ninth edition provides a terrific framework and introduction for students looking to pursue a

career in investments—particularly for those interested in eventually holding the CFA charter.
