This classic text offers an in-depth examination of major issues in child psychotherapy and highlights frequently encountered challenges in working with children and parents. Basic concepts of adult dynamic psychotherapy – such as the therapeutic alliance, resistance, transference and countertransference, and insight – are redefined and adapted to the special requirements of therapy with 4- to 12-year-olds. Readers are guided through a number of cases as treatment unfolds, gaining insight into all of the attendant problems, strategies, and opportunities. Yielding unique insights into the emotional and cognitive world of the child, the volume presents effective treatment strategies for a wide range of clinical problems. New chapters in the second edition provide step-by-step coverage of two major cases, from intake through termination.

Aimed at helping students master the final hurdle to becoming a licensed, certified psychologist, the second edition of this authoritative content review for the EPPP is expanded to include 20% more content, the DSM-5, contributions from esteemed new authors, and an easily navigable mobile APP to enhance test-taking skills. Additional practice questions, along with well-known test-taking strategies, further facilitate exam success. Proven as one of the best teaching tools for building competence in CBT, this new edition will enrich readers' understanding and practice of CBT.

This ground-breaking text provides a comprehensive guide to occupational therapy in Australia, from its role in the healthcare system to the scope and nature of its practice. The authors begin with an overview of the history of occupational therapy in Australia, the ethical and legal aspects of its practice and its role in population health and health promotion. The values and philosophy of occupational therapy are considered next, together with the roles and responsibilities of practitioners and specific practice features, including client-centred practice, evidence-based practice, research in occupational therapy and clinical reasoning. Key issues, including occupational analysis, the development of occupations across the lifespan, occupational therapy assessment, Indigenous issues, practice in rural and remote areas and advocacy, leadership and entrepreneurship, are also examined in detail. The first text specifically written for Australian entry-to-practice students by Australian authors, this book is destined to become an essential reference for both students and professionals in the field. Truly a valuable resource for all Australian occupational therapy students and practitioners.' Professor Jenny Ziviani, Children's Allied Health Research, The University of Queensland 'This is a text that will have many editions and document the evolution of the profession for decades to come.'
