Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into

that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint

weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.

2017, world-class ultrarunner Hillary Allen was at the top of her sport--and it felt like she was running on top of the world as she competed in Norway's Troms ø Skyrace. Allen was nearly halfway through the 50-kilometer race when she fell 150 feet off an exposed ridge, fracturing her back and breaking multiple ribs, both feet, and both of her lower arms. Beginning with the dramatic story of her accident and rescue, *Out and Back: A Runner's Story of Survival Against All Odds* recounts Allen's fight to return to the life she loves. With vulnerability that reveals remarkable strength and introspection that yields wisdom, Allen shares the story of her recovery both physically and mentally, and hard-earned knowledge that the path forward is not always linear, that

This handbook supersedes FAA-H-8261-16, Instrument Procedures Handbook, dated 2014. It is designed as a technical reference for all pilots who operate under instrument flight rules (IFR) in the National Airspace System (NAS). It expands and updates information contained in the FAA-H-8083-15B, Instrument Flying Handbook, and introduces advanced information for IFR operations. Instrument flight instructors, instrument pilots, and instrument students will also find this handbook a valuable resource since it is used as a reference for

the Airline Transport Pilot and Instrument Knowledge Tests and for the Practical Test Standards. It also provides detailed coverage of instrument charts and procedures including IFR takeoff, departure, en route, arrival, approach, and landing. Safety information covering relevant subjects such as runway incursion, land and hold short operations, controlled flight into terrain, and human factors issues also are included.

It's no secret that if you plan to run in the toughest endurance races, you need to physically prepare for the extreme demands you will be subjecting your body to. But successful runners will be quick to note that physical preparation is only part of the equation. You need to be mentally strong to withstand, and overcome, the challenges of this grueling sport. That's where Mental Training for Ultrarunning comes in. Sport psychology consultant Addie Bracy has

coached and provided mental performance consulting to elite athletes in many sports, and she herself has been a competitive distance runner for more than two decades. In Mental Training for Ultrarunning, she combines her firsthand coaching and running experience, along with profiles of ultrarunners who've experienced the highs and lows of the sport, to explain what you need to know and practice in order to cross that finish line. In this book, you will learn tools and techniques to help you prepare for and overcome some of the biggest mental and emotional challenges you may encounter in ultrarunning. You'll find more than 35 practical activities that will guide you in taking an introspective look at your own potential roadblocks so you can develop and strengthen the skills you need to run with confidence. Whether you're training for your first ultra or looking to compete at a higher level, Mental Training

The book received the Emme Award for Astronautical Literature at the March 20 2000 luncheon of the Goddard Memorial Symposium, sponsored by the American Astronautical Society. Named in honor of the first NASA Historian, Eugene Emme, the Emme award was created in 1982 to annually recognize an outstanding book that increases public understanding of the past and potential impact of the field of astronautics.
