To help the researcher understand why and how children react to adults who are doing ethnographic research, Fine and Sandstrom explore the methodological and ethical problems of qualitative research with minors. They correct numerous fallacies held by researchers that children think like adults and that they cannot hide their thoughts and feelings from adults, especially strangers. Recognizing that age is an important determinant of children’s response, they discuss problems and present strategies for conducting research with three age groups of children: preschool children (4 to 6 year olds), preadolescents (10 to 12) and middle adolescents (14 to 16). This is the first major methodological statement on doing participant observation work

Allison Zmuda analyzes and dispels harmful untruths that have inhibited student learning for decades and offers ideas for combating them. --from publisher description

Following the Pulitzer prize-winning collection Stag’s Leap, Sharon Olds gives us a stunning book of odes. Opening with the powerful and tender “Ode to the Hymen,” Olds addresses and embodies, in this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its structures and pleasures. The poems extend parts of her narrative as a daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. In such poems as “Ode to My Sister,” “Ode of Broken Loyalty,” “Ode to My Whiteness,” “Blow Job Ode,” and “Ode to the Last Thirty-Eight Trees in New York City Visible from This Window,” Olds treats us to an intimate examination that, like all her work, is universal, by turns searing and charming in its honesty. From the bodily joys and sorrows of childhood to the deaths of those dearest to us, Olds shapes the world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

Outback Survival is a timeless, practical run down on everything you need to know to survive in the outback. Bob Cooper’s incredible bushcraft skills have been developed through more than 25 years of experience in Australia’s harsh outback. He has picked up tools of survival from the experiences of living with traditional Aboriginal communities, instructing with Special Forces Units, lecturing with the Texas Parks and Wildlife Service on desert survival in the Mexican Desert, delivering wilderness lessons in the UK and learning the skills of the bushmen of the Kalahari Desert in Botswana. Bob has put his own lessons to the test, dropping himself off in the 42C heat of the Australian desert with only a map and soap box sized survival kit, no food, water or sleeping gear, and a 10 day walk across 160km of rough terrain back to safety. He did this alone and showed that with the right knowledge of the land, you can survive in even the harshest of conditions. The outback of Australia is one of the most unforgiving regions of the world, but Bob is committed to protecting and enhancing the experience people have when venturing out into the bush.

As the United States marks its first presidential election of a new century, Witcover shows us how professional mercenaries -- with little party loyalty and diminished political principles, driven by an insatiable need for money -- are poisoning public life. At the same time, politicians themselves have condoned and even encouraged these developments, responding to the demands of a media-driven age in which the press corps pursues its own quest for celebrity and financial reward. Sharp, revealing, and rich with anecdotes, No Way to Pick a President offers a wealth of presidential history, from the role of the vice president’s office to campaign funds, television and the electoral college.

Thoroughly updated to reflect all of the latest concepts and advances in the field, this concise, extensively illustrated text presents the basic science and clinical application of cellular and molecular biology. Functioning as a combined text and atlas, it is essentially two books for the price of one providing a comprehensive, visually engaging histology education from the ground up. Illustrations, tables, chapter summaries and multiple choice questions facilitate comprehension of concepts, and clinical correlations underscore the practical relevance of the material. Superb illustrations—including photomicrographs, electron micrographs, schematic diagrams and drawings—provide a visual grasp and easier retention of difficult concepts. Clinical correlations throughout the text demonstrate clinical applications and reinforce the idea that histology is pertinent not only to pathology and physiology, but in fact comprises one of the essential bases of clinical practice. New! "Pathological Considerations" section at the end of each chapter. Helpful tables provide an at-a-glance summary statement of key points. Bolded key terms, bulleted lists and chapter summaries emphasize the "need to know" information in every chapter. A combination of USMLE-style questions and image based questions in each chapter.
