Multimodality and  
Literacy in the New  
Media Age

Teaching and  
learning involve  
more than just  
language. The  
teachers' use of

# Read Free Gce A Level General Paper

gestures, the classroom spaces they occupy and the movements they make, as well as the tools they use, work together with language as a multimodal ensemble of meanings. Embodied teaching is about

applying the understandings from multimodal communication to the classroom. It is about helping teachers recognise that the moves they make and the tools they use in the classroom are part of their pedagogy and

# Read Free Gce A Level General Paper

contribute to the design of the students' learning experience. In response to the changing profile and needs of learners in this digital age, pedagogic shifts are required. A shift is the evolving role of

teachers from  
authority of  
knowledge to  
designers of  
learning. This  
book discusses  
how, using  
examples drawn  
from case studies,  
teachers can use  
corporeal  
resources and  
(digital) tools to

design learning experiences for their students. It advances the argument that the study of the teachers' use of language, gestures, positioning, and movement in the classroom, from a multimodal

perspective, can  
be productive.

This book is  
intended for  
educational  
researchers and  
teacher  
practitioners, as  
well as curriculum  
specialists and  
policy makers. The  
central proposition  
is that as teachers

develop a semiotic awareness of how their use of various meaning-making resources express their unique pedagogy they can use these multimodal resources aptly and fluently to design meaningful learning

experiences. This book also presents a case for further research in educational semiotics to understand the embodied ways of meaning-making in the pedagogic context.

The Committee considers a number of options to change incentives, including:

- (i) A single board. This offers a simpler system, with no risk of competition, but the Committee believes the cost, risk and disruption outweigh the benefits;
- (ii) Franchising of subjects to exam

boards. This removes syllabus competition, but again has downsides; (3) Or the current system of multiple boards. The Committee sees no benefit in competition on syllabus content, but the setting and marking of exams and associated administration, if properly regulated,

could generate incentives and drive quality up, offering value for money to schools and colleges. The Committee also recommends the development of national syllabuses, accredited by Ofqual. The syllabuses would be developed by exam boards in

conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate.
