

## Gcse Chemistry B Ocr

**This title is carefully matched to the exam board specification for focused study. It includes clear explanations and supporting diagrams to ensure understanding and help students to prepare for the exam with confidence.**

**This is an OCR endorsed resource Stretch and challenge your students' knowledge and understanding of Chemistry, build their mathematical and practical skills, and provide plenty of assessment guidance with this OCR Year 2 Student Book. - Build understanding with a summary of prior knowledge and diagnostic questions at the start of each chapter to help bring students up to speed - Support practical assessment with Practical Skill summaries that help develop your students' knowledge and skills - Test understanding and provide plenty of practice to assess progression, with Test Yourself Questions and multiple choice questions - Provide mathematical support with examples of method integrated throughout and a dedicated 'Maths in Chemistry' chapter - Develop understanding with free online access to Test yourself Answers, an Extended Glossary, Learning Outcomes and Topic Summaries**

**A new series of bespoke, full-coverage resources developed for the 2015 GCSE Mathematics qualifications. Endorsed for the OCR J560 GCSE Mathematics Foundation tier specification for first teaching from 2015, this Student Book provides full coverage of the new GCSE Mathematics qualification. With a strong focus on developing problem-solving skills, reasoning and fluency, it helps students understand concepts, apply techniques, solve problems, reason, interpret and communicate mathematically. Written by experienced teachers, it also includes a solid breadth and depth of quality questions set in a variety of contexts. GCSE Mathematics Online - an enhanced digital resource incorporating progression tracking - is also available, as well as Problem-solving Books, Homework Books and a free Teacher's Resource.**

**A revision guide covering the core content of the OCR Science B (single award) specification from the Gateway Science suite.**

**The Official Guide to the BioMedical Admissions Test**

**Gcse Biology Stugy Guide**

**OCR A Level Chemistry Student**

### GCSE Mathematics for OCR Higher Student Book

Unlock your full potential with these revision guides which focus on the key content and skills you need to know. With My Revision Notes for OCR GCSE Food and Nutrition you can: - Take control of your revision: plan and focus on the areas you need to revise with content summaries and commentary from authors Anita Tull and Megan Pratt - Show you fully understand key topics by using speed issues and processes - Apply food and nutrition terms accurately with the help of definitions and key words on all topics - Improve your skills to tackle specific exam questions with self-testing and exam-style questions and answers - Get exam-ready with last-minute quick quizzes at <http://www.hodderplus.co.uk/myrevisionnotes>

Helps students to develop the thinking skills required for success in the BMAT, which is required by seven universities for entrance onto competitive courses, such as medicine and veterinary science.

Learning to Teach Science in the Secondary School is an indispensable guide with a fresh approach to the process, practice and reality of teaching and learning science in a busy secondary school. This fourth edition has been fully updated in the light of changes to professional knowledge and practice and revisions to the national curriculum. Written by experienced practitioners, this popular text is essential reading for citizenship, Sex and Health Education and learning outside the classroom • assessment for learning and external assessment and examinations Every unit includes a clear chapter introduction, learning objectives, further reading, lists of useful resources and specially designed tasks – including those to support Masters Level work – as well as cross-referencing to essential advice in the core text

Learning to Teach Science in the Secondary School is designed to support student teachers through the transition from graduate scientist to practising science teacher, while achieving the highest level of personal and professional development.

All-in-one Collins Revision Guides and Workbooks give you everything you need to improve your exam grade in GCSE AQA Chemistry. Accessible content, practical guidance and sample questions with detachable answers help you revise and practise, check your progress and improve your level.

A companion to school experience

The A-Z subject guide

GCSE Chemistry Foundation for OCR B.

New 2015 A-level Chemistry

GCSE Mathematics for OCR Foundation Problem-solving Book

This student book contains the extension material that follows on from the GCSE science (modules 1 and 2) and GCSE additional science (modules 3 and 4) textbooks. It provides material to prepare students for GCSE biology, chemistry and physics with complete coverage of the OCR GCSE science

specification for B5, B6, C5, C6, P5, P6.

Synopsis coming soon.....

With My Revision Notes: OCR A Level Chemistry A you can: - Manage your own revision with step-by-step support from experienced teacher and examiner Mike Smith - Apply biological terms accurately with the help of definitions and key words - Plan and pace your revision with the revision planner

- Test understanding with questions throughout the book - Get exam ready with last minute quick quizzes available on the Hodder Education website

This workbook offers accessible practice to help manage GCSE Science revision and prepare for the exam efficiently. The content is broken into manageable sections and advice is given to help build confidence. Tips and techniques provide support throughout the revision process.

This Success Revision Guide offers accessible content to help students manage their revision and prepare for the exam efficiently. The content is broken into manageable sections and advice is offered to help build students' confidence. Exam tips and techniques are provided to support students throughout the revision process.

Selecting the right A levels is more important than ever in helping you shape your future path, whether through securing a place at your ideal university, or starting out on your chosen career. But with such a huge variety of subject options and combinations on offer, where do you begin and indeed what are the 'right' choices? In truth, what's 'right' is what's best for you, and any decisions you make should be informed and personal to you, to ensure you find the perfect match to suit your own individual interests, skills and learning style. Giving you all the knowledge you need at your fingertips to support you in making these important decisions, Choose the Right A levels is your one-stop source of practical information, answering key questions such as: What does the course outline look like and how does it fit with your subject? What subjects are preferred or required for certain degree courses and careers? What will I need at GCSE to study the subject and how does the subject compare to GCSE? What subjects combine well together? This comprehensive and impartial guide also features comparative data on national pass rates for each subject, and insightful student case studies on what to expect from an expert Careers Adviser, and laid out in a simple format for ease of use, this accessible guide is your essential aid to navigating the wide range of subject options available and making the best choices for you and your future.

Help students pull together the chemical ideas in the course and apply them to fresh contexts in exam questions.

Reflective practice is at the heart of effective teaching, and this book helps you develop into a reflective teacher of Science. Everything you need is here: guidance on developing your analysis and self-evaluation skills, the knowledge of what you are trying to achieve and why, and examples of how experienced teachers deliver successful lessons. It includes advice about obtaining your first teaching qualification and professional development. The book shows you how to plan creative lessons, how to make good use of resources and how to assess pupils' progress effectively. Each chapter contains points for reflection, which encourage you to break off from your reading and think about the challenging questions that you face as a new teacher. The book comes with access to a companion website, [www.sagepub.co.uk/](http://www.sagepub.co.uk/)

you can see the skills discussed in the text in action - Links to a range of sites that provide useful additional support - Extra planning and resource materials. If you are training to teach science this book will help you to improve your classroom performance, by providing you with practical advice, but also by helping you to think in depth about the key issues. It also supplements guidance on understanding research evidence that is needed in academic work at Masters level, essential for anyone undertaking an M-level PGCE.

**Learning to Teach Science in the Secondary School**

Puts the development of chemical ideas in the context of social and industrial needs. This book uses OCR terminology, and contains a glossary of the key terms from the specification. It is structured in line with the OCR specification with colour content, photographs and illustrations.

Written by the University of York project team for Salters Advanced Chemistry, this Student Book supports and extends students through the new linear course while delivering the breadth, depth, and skills needed to succeed in the new A Levels and beyond. It develops true subject knowledge while also developing essential exam skills. The fourth edition combines the Chemical Storyline and Chemical Ideas into a single, integrated volume for the first time, providing ideal support for the new specification.

This series is for schools following OCR A double or separate award for GCSE science. The resources offer preparation for the OCR exams with teacher support to minimise time spent on administration. The teacher's resources are available on CD-ROM in a fully customizable format.

These new resources have been written to match the 2016 OCR GCSE Gateway Science (9-1) specifications. Built-in assessment and differentiation supports students of all abilities and makes progress tracking easy. Maths skills and practical skills are developed throughout with ramped practice questions and differentiated learning outcomes.

This revision guide provides in-depth coverage of all the externally assessed course content for GCSE OCR B Chemistry. This book can be used to support study throughout the course and as a revision aid in the build up to exams. / In-depth coverage provides everything required for thorough exam preparation / Detailed explanations and diagrams help consolidate and build on knowledge throughout the course / Clear design and direct references to the specification provide structured revision and maximum assurance. This revision guide provides in-depth coverage of all the externally assessed course content for GCSE OCR B Chemistry. This book can be used to support study throughout the course and as a revision aid in the build up to exams. / In-depth coverage provides everything required for thorough exam preparation / Detailed explanations and diagrams help consolidate and build on knowledge throughout the course / Clear design and direct references to the specification provide structured revision and maximum assurance.

This workbook can be used at home or in the classroom to provide excellent preparation for tests and exams. It includes GCSE-style questions for every topic on the OCR Gateway chemistry specification and clearly differentiates higher tier questions.

Student Unit Guides are perfect for revision. Each guide is written by an examiner and explains the unit requirements, summarises the relevant unit content and includes a series of specimen questions and answers. There are three sections to each guide: Introduction - includes advice on how to use the guide, an explanation of the skills being tested by the assessment objectives, an outline of the unit or module and, depending on the unit, suggestions for how to revise effectively and prepare for the examination questions. Content Guidance - provides an examiner's overview of the module's key terms and concepts and identifies opportunities to exhibit the skills required by the unit. It is designed to help students to structure their revision and make them aware of the concepts they need to understand the exam and how they might analyse and evaluate topics. Question and Answers - sample questions and with graded answers which have been carefully written to reflect the style of the unit. All responses are accompanied by commentaries which highlight their respective strengths and weaknesses, giving students an insight into the mind of the examiner.

With short questions at the end of each section that make students stop and think about the topic, this work provides tips on common pitfalls and advice on how to tackle different types of exam question and exam preparation. It also includes practice exam-style questions.
