*domination is a great evil, the suffering of which ought to be minimized so far as possible. Surprisingly, however, political and social theorists have failed to provide a detailed analysis of the concept of domination in general. This study aims to redress this lacuna. It argues first, that domination should be understood as a condition experienced by persons or groups to the extent that they are dependent on a social relationship in which some other person or group wields arbitrary power over them; this is termed the 'arbitrary*

*power conception' of domination. It argues second, that we should regard it as wrong to perpetrate or permit unnecessary domination and, thus, that as a matter of justice the political and social institutions and practices of any society should be organized so as to minimize avoidable domination; this is termed 'justice as minimizing domination', a conception of social justice that connects with more familiar civic republican accounts of freedom as non-domination. In developing these arguments, this study*
